Pyramid Technoplast Limited – Update on Solar Power Project

Pyramid Technoplast Limited (“the Company”) wishes to inform that it has received the necessary permissions and approvals for the installation of additional captive solar power capacity aggregating 7.25 MW, comprising 5.00 MW in the State of Gujarat and 2.25 MW in the State of Maharashtra.

The Company further informs that the entire solar power capacity of 2.25 MW in Maharashtra has been fully commenced and is operational.

With reference to the Company’s earlier press release issued vide **Letter No. SEC: 33/2024-25 dated August 29, 2024**, the Company had inadvertently mentioned the planned solar power capacity in Gujarat as 13 MW due to an aggregation error instead of 12 MW.

The Company hereby clarifies that the total planned solar power capacity in Gujarat is 12 MW.

Further, the Company has commenced operations of Solar Power Project in Gujarat of 11 MW (6 MW+ 5 MW) of the planned solar power capacity. Accordingly, the balance capacity of 1 MW capacity out of 12 MW in Gujarat is pending, for which the requisite permissions and approvals are currently under process

These developments are in continuation of the Company’s phased implementation of its captive solar power project, aimed at optimising energy costs, improving operational efficiency, and strengthening its commitment to sustainability and renewable energy adoption.

The Company will keep its stakeholders informed of further material developments, including the commissioning of the remaining solar power capacities, in compliance with applicable regulatory requirements.
