Calix and Infosys Enter Strategic Co-Creation Partnership to Accelerate Time to Market for New Capabilities on AXOS Platform

The partnership represents a major step forward in the development of the AXOS ecosystem, focusing the technology and engineering expertise of Infosys on creating new offerings on the AXOS software platform

PETALUMA, CA and BENGALURU, INDIA – April 10, 2018 – Calix (NYSE: CALX) today announced a strategic multi-year partnership with Infosys (NYSE: INFY), that will accelerate communications service provider (CSP) adoption of AXOS, its Software Defined Access (SDA) Platform. Calix and Infosys will jointly invest to co-create new services and value-added offerings on the award winning AXOS platform. By reducing time-to-market for new AXOS capabilities and greatly broadening AXOS offerings, the partnership will enable service providers to accelerate deployments of next generation access networks that will dramatically reduce their operating cost and enable them to deploy new services at a rapid pace.

"To have a global technology leader like Infosys be our first co-creation partner is an honor and it speaks directly to the dramatic leverage our customers get when they deploy the AXOS platform. Infosys shares our vision for the future of the universal, unified access network and understands the value of a collaborative, standards-based and open approach to innovation," said **Carl Russo, President and CEO at Calix**. "Our journey to create the world's only Software Defined Access platform has been challenging and exciting. This is the next major step in that journey."

Calix has pursued the vision of the unified access network for a decade, and AXOS delivers on the promise of the software defined network. With AXOS, any CSP can deliver all services on a single, elastic network that is always on. Because AXOS is a standards-based, modular software platform, Calix is creating a vibrant ecosystem that will rapidly extend and expand the capabilities that are available to CSPs via the platform.

"The digital revolution, driven by the proliferation of devices and hyper connectivity, has forced nearly every organization to reassess their core business and operating models," said **Ravi Kumar, President and Deputy Chief Operating Officer, Infosys**. "The rapid digitization of business processes has also opened up new opportunities for organizations to innovate and create new products and services that address unmet customer needs. We are evolving our business model by partnering with innovators such as Calix, that can leverage our market scale, unparalleled expertise, and deployment capabilities to help our customers digitize their businesses. For our CSP customers, we will extend the capabilities of AXOS to help them remain essential to their subscribers. Ultimately,

our goal is to help them transform their access and subscriber networks, evolve their business models and generate entirely new revenue streams."

Through this partnership, Infosys will develop and deliver new software modules for the AXOS platform. With these new capabilities, service providers can reduce the cost of operating their networks, improve network intelligence and deliver improved subscriber experiences. The fully abstracted, modular, standards-based architecture of the AXOS platform makes it an ideal innovation platform for technology leaders who want to deliver break-through capabilities to CSPs.

"Over 200 Calix customers have already deployed AXOS - from relatively small regional service providers to Verizon, one of the world's largest and most innovative service providers," said **Michel Langlois, Senior Vice President, Products and Strategy at Calix**. "Infosys is one of the largest and most capable software development firms in the world. By embracing the AXOS platform, they are dramatically increasing the resources that are developing new capabilities on the platform. This agreement represents a significant enhancement to the ecosystem enabling our customers to achieve their transformation objectives."

About Calix

Calix, Inc. (NYSE: CALX) - Innovative communications service providers rely on Calix platforms to help them master and monetize the complex infrastructure between their subscribers and the cloud. Calix is the leading global provider of the cloud and software platforms, systems, and services required to deliver the unified access network and smart premises of tomorrow. Our platforms and services help our customers build next generation networks by embracing a DevOps operating model, optimize the subscriber experience by leveraging big data analytics and turn the complexity of the smart home and business into new revenue streams.

Safe Harbor

Certain statements in this press release concerning our future growth prospects are forward-looking statements regarding our future business expectations intended to qualify for the 'safe harbor' under the Private Securities Litigation Reform Act of 1995, which involve a number of risks and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The

risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding fluctuations in earnings, fluctuations in foreign exchange rates, our ability to manage growth, intense competition in IT services including those factors which may affect our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, industry segment concentration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks or system failures, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which Infosys has made strategic investments, withdrawal or expiration of governmental fiscal incentives, political instability and regional conflicts, legal restrictions on raising capital or acquiring companies outside India, and unauthorized use of our intellectual property and general economic conditions affecting our industry. Additional risks that could affect our future operating results are more fully described in our United States Securities and Exchange Commission filings including our Annual Report on Form 20-F for the fiscal year ended March 31, 2017. These filings are available at www.sec.gov. Infosys may, from time to time, make additional written and oral forward-looking statements, including statements contained in the company's filings with the Securities and Exchange Commission and our reports to shareholders. In addition, please note that any forward-looking statements contained herein are based on assumptions that we believe to be reasonable as of the date of this press release. The company does not undertake to update any forward-looking statements that may be made from time to time by or on behalf of the company unless it is required by law.
