L&T Hydrocarbon Engineering Wins Significant Order for Cracker Furnace Project

Mumbai, July 17, 2018: L&T Hydrocarbon Engineering (LTHE), a wholly owned subsidiary of Larsen & Toubro, has won a significant onshore EPC contract from HPCL-Mittal Energy for setting up 07 (Seven) Cracker Furnaces of 1200 KTPA Dual Feed Cracker Unit (DFCU) at their Bathinda Refinery in Punjab. This unit is part of their Guru Gobind Singh Polymer Addition Project.

LTHE has won the contract through a competitive bidding process, where reputed global EPC organizations participated. The scope of work under the contract covers Project Management, Residual Engineering, procurement and supply of Cracker Furnace systems, components, auxiliaries, fabrication in modules, erection, construction and commissioning. LTHE shall use its Modular Fabrication Facilities in Hazira, Gujarat for fabrication of furnace modules.

The order reinforces LTHE's unique capability to design, engineer, fabricate, erect and commission large size units in petrochemical complexes.

The process licensor for the Cracker Unit is CB&I (now McDermott).

L&T has been serving the onshore hydrocarbon sector since early 1990s. The Company's track record includes successful completion of several challenging projects for domestic and International Clients.

Background:

Larsen & Toubro is an Indian multinational engaged in technology, engineering, construction, manufacturing and financial services with over USD 18 billion in revenue. It operates in over 30 countries worldwide. A strong, customer-focused approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business for eight decades.
