For Immediate Release

TAKE Supply Chain announces upgraded version of OneSCM SaaS-based Supply Chain collaboration solution

New version of OneSCM delivers global tax support, integrated web help, and enhancements including data integration for customers running JDEdwards

Chennai, India, 17 June, 2014-TAKE Solutions, a leader in the Supply Chain Management (SCM) and Life Sciences (LS) domains, today announced release of OneSCM®, a leading SaaS-based supply chain collaboration software solution focused on helping mid-market companies manage their extended supply chain operations.

OneSCM Enterprise delivers on the promise of supporting global supply chains with the addition of global tax support. OneSCM now provides a variety of tax-related fields that originate from the integrated ERP. When a purchase order is created or changed in the ERP, the information flows into OneSCM for display and verification on the PO and Invoice screens.

This new version also includes web help integrated into the software for easy access to product explanations. The general help is available by clicking on the help button on each screen, while context-sensitive help is available by clicking on the help icon within each module. Web help accessible by users within the application helps improve user productivity and efficiency.

The screenshot displays the OneSCM web application interface. At the top, there's a navigation bar with tabs: PTes, Credit Invoices, SCNs, Payments/Purchase, JDEs, OneSCM Orders, and Returns. Below this, a search bar and a 'POPI020210T3' identifier are visible. The main content area is divided into two sections: 'Header Information' and 'Line Information'. The 'Header Information' section contains fields for Supplier (RANZENSTEL INNOVATIVE AGEN LLC), Payment Terms (NET 30), and Tax Information. The 'Line Information' section shows a table with columns for Item, Qty, Unit Price, and Amount, listing items like MAT and CAP COVER HEADNET-PART #30556A.

OneSCM also includes greater control over PO Change Acknowledge requirements, enabling greater automation of change communications with suppliers and buyers. Certain fields are monitored as a default for changes and require a PO Change Acknowledgement by the trading partner when changes occur. With this latest release, additional fields can be set for monitoring as well.

Integration with JDEdwards is also now available for collaboration of Purchase Order and Purchase Order Acknowledgment transactions. This expands the reach of OneSCM ERP integration and enables additional support for mid-market companies with mid-size ERPs.

Donna Fritz, Vice President, Marketing & Product Management, TAKE Supply Chain said, "Mid-market companies, their customers, and their trading partners are increasingly located in different geographies, in the additional support of global tax helps both buyers and suppliers maintain clear visibility and real time management of taxes from purchase order to invoicing, we are excited to now support companies running JD Edwards systems with OneSCM's supply chain management features and benefits."

A demonstration of the new OneSCM release can be requested through the company's website at takesupplychain.com or by calling 1-800-324-5143. For more information about OneSCM, please visit onescm.com.

About TAKE Solutions:

TAKE Solutions, Ltd. [BSE: 532890 | NSE: TAKE] is a leading global business technology company with domain expertise in Life Sciences (LS) and Supply Chain Management (SCM).
