The Deputy Lord Mayor of Gothenburg Inaugurates HCL's Delivery Centre

HCL's new office strengthens European presence and commitment to customers in the Nordics

Gothenburg, Sweden; Noida, India – 29th August 2017 – HCL Technologies (HCL), a leading global IT services company, has opened a new delivery centre in Gothenburg, Sweden. The new centre will be a key hub in HCL's global delivery network, providing cutting–edge transformational IT services as part of the global shared services model. In addition, the Gothenburg office will also become HCL's global headquarters for its mainframe services and automotive centre of excellence.

With the opening of the Gothenburg office, HCL now has 36 delivery centres in Europe and 12 delivery centres across Nordics. Initially, more than 150 people will be located at the new Gothenburg office to serve customers in the Nordics and globally.

Åse-Lill Törnqvist, Deputy Lord Mayor of Gothenburg, said: "We are positive when it comes to this type of initiatives in Gothenburg and hope that we will continue to see many more in the future."

Pankaj Tagra, Senior Vice President and Head of Nordics at HCL Technologies, said: "The Nordics is a strong growth market for HCL and we have been continuously investing in local delivery centres to give more value to our customers. Our new Gothenburg delivery centre supports this growth and enables us to get closer to many of our customers in the Nordics. At the same time, the new site allows us to further increase our global shared services capabilities and provide customers with high quality, industrialized mainframe, open systems and digital services through our new centres of excellence."

Patrik Andersson, CEO at Business Region Göteborg, said: "For the leading innovative companies of the Gothenburg Region acting on the global scene, excellent partners are essential. We are very glad to see the investment of HCL in the city and are looking forward to a future of positive sustainable growth."

HCL has been present in the Nordics since 1999 and has experienced significant growth in the region. HCL acquired Volvo's external IT business in February 2016 and the company is currently working with more than 50 different Nordic customers. The new location in Gothenburg further strengthens HCL's presence in Europe, where it has 10,000 people and serves over 200 European clients.

About HCL Technologies
