Asst. Company Secretary

For Immediate Release

Business Intelligence Dashboards added to OneSCM Mid-Market SaaS Supply Chain Solution from TAKE Supply Chain

Powered by MicroStrategy, new dashboards offer instant insight into multiple performance metrics at affordable SaaS subscription pricing.

Chennai, India, June 10, 2014: TAKE Solutions Ltd. [BSE: 532890 | NSE: TAKE], a global business technology solutions provider, announced the addition of Business Intelligence Dashboards to OneSCM®, a leading SaaS-based supply chain collaboration software solution focused on helping mid-market companies increase operating margin through better performance of extended supply chain operations.

The new dashboards feature a variety of standard information and graphical reports for key performance areas such as Procurement, Shipping, and Invoicing, all delivered within the OneSCM SaaS application. Selecting the 'Dashboard' tab in the top navigation, users are able to access aggregate information, such as running averages for spend and change order frequency, along with time-based information such as Purchase Orders by Month, Purchase Order Value, On Time Shipment performance and Invoice Accuracy.

Complex graphs can be configured to show current metrics against Key Performance Indicators (KPIs) to identify the extent of any corrective action that may need to be taken. Graphs and charts can also be changed to a different display of the data and exported for inclusion various documents. Changes to graphs can be session only, or saved to user preference.

"Customers using dashboards also have access to supplier performance information such as on-time delivery based on supplier promise date, on-time delivery based on buyer required date, average time to acknowledge a purchase order, and the status of all purchase order acknowledgements by month," said Donna Fritz, VP of Marketing & Product Management, TAKE Supply Chain. "Performance can also be isolated by individual suppliers and time frames. All dashboard reports are available for pdf download for use in internal reviews or supplier performance analysis and contract negotiations."

A demonstration of the new OneSCM business intelligence dashboards can be requested through the company's website at takesupplychain.com or by calling 1-800-324-5143. For more information about OneSCM, please visit onescm.com.
