This is for your information and records.

Thanking You,
Yours faithfully,

Darshit Parikh (Company Secretary)
For Ducon Infratechnologies Limited

Ducon's successful completion of Dedusting system

Enables pollution Control Compliance for NALCO

Thane, India, November 11, 2016: Ducon Technologies India("DTIPL"), the Company under amalgamation with **Ducon Infratechnologies Limited** (BSE:534674, NSE: DUCON) today announced that it has successfully completed a de-dusting system project for National Aluminum Company Ltd. (NALCO) in India.

NALCO's two years' turnkey project was secured by DTIPL through a national competitive bidding process. Its scope included design, engineering, supply, erection and commissioning of the entire de-dusting system for the smelter plant, rodding shop and butt handling plant of Nalco in Angul, Orissa. The decision taken by Nalco to install efficient de-dusting system is to maintain clean working environment and comply with the standards of ISO 9001, ISO 14001 & OHSAS 18001. With the installation, the Ducon's de-dusting system has reduced the dust concentration in the plant to 5 mg/Nm³ and the stack emission to 30 mg/Nm³, thereby allowing NALCO to comply with the regulations of both central and state pollution control boards for overall pollution control for both surface and air.

Commenting on the developing, **Mr. Aron Govil, Chairman of DTIPL and Ducon Infratechnologies** said *"This installation was one of the most challenging jobs for us as it had to be carried out in an operating smelter. We are happy to share that our team has completed the project as per the specifications and commitments to the client."* He further said *"At Ducon, this adds another milestone to our credential list and as we move forward, we continue to remain optimistic on the overall business and environment"*

About Ducon Technologies India Private Limited ("DTIPL")

Started in 2005, Ducon Technologies India Private Limited is an affiliate of Ducon Technologies Inc, (DTI) USA which is an established player since 1938. DTI is a world leader in providing the most advanced and custom engineered equipment and systems for environmental control, material handling, waste incineration, and power transmission for a wide variety of industries including power, refineries, cement, pulp & paper, glass, biomass, food, steel, mining & incineration. DTI has completed over 30,000 global installations, and has compiled an enviable track record of completed projects which perform reliably and economically year after year. Its Indian subsidiary- DTPL is also a leading technology provider and EPC Company having broad based technology in the field of Air Pollution Control and Material Handling Systems in India. To its credit, DTPL has executed projects for BHEL, NTPC, IOCL, Hindalco, Vedanta group, Aditya Birla group, NALCO, Reliance Industries amongst others. It has also won prestigious awards like "Niche market player in pollution control systems" from Frost and Sullivan in 2009 and "Leaders of Tomorrow in Engineering Industries" from ET Now in 2010.
