Wipro Partners with and Invests in Tricentis to Deliver End-to-End Hyper Automation across Quality Lifecycle

Wipro's Strong Managed Services Quality Assurance Platform Offerings combined with Tricentis' Continuous Testing capabilities to deliver enhanced Quality Engineering for DevOps

Cupertino, California and Bangalore, India — August 2, 2017 : Wipro Limited (NYSE: WIT, BSE: 507685, NSE: WIPRO), a leading global information technology, consulting and business process services company and Tricentis, a software testing company and a thought leader in the automated testing space, today, announced a partnership for Quality Engineering.

This partnership with Tricentis will strengthen Wipro's Quality Engineering and Testing Services capabilities, by integrating Tricentis Tosca, a continuous testing platform, with Wipro AssureNXT, a managed services QA platform combined with the capabilities of Wipro HOLMES Artificial Intelligence Platform™ as a part of the broader automaton ecosystem.

The Wipro - Tricentis partnership will enable clients to successfully achieve their business outcomes in today's digital landscape by enabling continuous integration, delivery and in turn, DevOps. The joint offering will also help improve time-to-market and quality by augmenting end-to-end automation across the software testing lifecycle.

"We believe that clients will see this partnership as a game changer as the two prominent leaders in the industry get together to create a truly disruptive proposition for continuous testing. It will help them drive speed in their business while bringing effectiveness and experience to their automation journey, through the powerful combination of Wipro AssureNXT, Wipro HOLMES and Tricentis Tosca," said **Hiral Chandrana, Senior Vice President, Business Application Services, Wipro Limited.**

"As organizations increasingly adopt transformation initiatives, such as DevOps, the reliance on legacy testing tools and approaches are holding organizations back, throttling the speed of innovation," said **Sandeep Johri, CEO of Tricentis.** "Software development has evolved dramatically in the shift from waterfall processes to Continuous Delivery pipelines. Software testing must also change in order to control business risks in a faster, more flexible manner."

Along with the partnership agreement, Wipro Ventures, the strategic investment arm of Wipro Limited, has made an investment in Tricentis, as part of their most recent funding round.

About Wipro Limited

Wipro Limited (NYSE: WIT, BSE: 507685, NSE: WIPRO) is a leading global information technology, consulting and business process services company. We harness the power of cognitive computing, hyper-automation, robotics, cloud, analytics and emerging technologies to help our clients adapt to the digital world and make them successful. Forward-looking and Cautionary Statements

Certain statements in this release concerning our future growth prospects are forward-looking statements, which involve a number of risks, and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding fluctuations in our earnings, revenue and profits, our ability to generate and manage growth, intense competition in IT services, our ability to maintain our cost advantage, wage increases in India, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which we make strategic investments, withdrawal of fiscal governmental incentives, political instability, war, legal restrictions on raising capital or acquiring companies outside India, unauthorized use of our intellectual property, and general economic conditions affecting our business and industry. Additional risks that could affect our future operating results are more fully described in our filings with the United States Securities and Exchange Commission. These filings are available at www.sec.gov. We may, from time to time, make additional written and oral forward-looking statements, including statements contained in the company's filings with the Securities and Exchange Commission and our reports to shareholders. We do not undertake to update any forward-looking statement that may be made from time to time by us or on our behalf.
