

PRESS RELEASE

Cyient commences operations from TSIIIC Incubation Center, Warangal

Hyderabad, India, January 22, 2017 — Cyient, a global provider of engineering, manufacturing, digital and technology services, announced that it has commenced operations in Warangal from the Incubation Center of the Telangana State Industrial Infrastructure Corporation (TSIIC). The facility was inaugurated in the presence of Honorable Deputy Chief Minister and Education Minister of Telangana, Mr. Kadiyam Srihari along with Mr. BVR Mohan Reddy, Founder and Executive Chairman Cyient and Mr. Sunil Kumar Makkena, Sr. Vice President - Utilities & Geospatial Business Unit Cyient.

Cyient has established a Center of Excellence (CoE) in TSIIC Incubation Center to help its Communications business expand operations for its global client base. The CoE will undertake fiber and coaxial network planning and design, MDU engineering, cell site design and drafting, RF planning, and network optimization services. Cyient will also leverage the Center to provide geospatial services and solutions for the company's Smart City engagements

Commenting on the initiative, the **Executive Chairman, Mr. BVR. Mohan Reddy** said " *This is our fourth center in tier2 cities and we are confident that access to good resource pool of engineers passing out from reputed institutes located in close vicinity of the city will help us do some good work out of this center. Telangana Government has good infrastructure and Warangal is one of the fastest growing cities in Telangana. The city has the potential to become an important commercial hub and we hope to contribute to the socio-economic development of the region.* "

Cyient has already laid a foundation stone for a 70,000 square feet state-of-the-art Technology Development Center in Warangal, in the Madikonda Special Economic Zone (SEZ) of the Telangana State Industrial Infrastructure Corporation (TSIIC), which will become operational within the next 18 to 24 months. Once the center is operational, the company will ramp up operations in the region by employing around 1,000 professionals who will work on advanced geographic information systems (GIS), remote sensing, LiDAR, and photogrammetry technologies that address requirements of the rail transportation, utilities, and communications sectors. The facility spread over a 5-acre area will support Cyient's worldwide digital technology initiatives in areas like Internet of Things, Analytics, and Smart Cities.

About Cyient Limited

Cyient is a global provider of engineering design, manufacturing, digital and technology services. We collaborate with our clients to help them achieve more and together shape a better future.

Backed by 25 years of industry experience, Cyient's portfolio spans product engineering, process engineering, networks and operations and geospatial services. Our industry focus covers aerospace and defense, rail transportation, industrial, energy, natural resources, communications, utilities, geospatial, semiconductor and medical. Cyient's domain knowledge, technical expertise and industry offerings differentiate us as a Design-Build-Maintain partner that takes solution ownership across our customer's value chain. With over 13,800 employees in 21 countries, Cyient combines global delivery with close proximity to over 300 clients.
