SONATA SOFTWARE

Sonata Software, Aeris to offer next-gen IoT and mobile solutions for enterprises

Bengaluru, August 30th, 2016

Sonata Software, a global technology services and solutions company, today announced it formed an alliance with Aeris, a pioneer and leader in the Internet of Things (IoT) market, for next-generation IoT and mobile solutions for enterprises. The alliance brings together expertise in IoT platform and solutions from Aeris with the mobile platform and software development expertise of Sonata. The result of Sonata and Aeris working together is an ideal alliance for enterprises seeking to execute next-generation mobility and IoT solutions by leveraging the combined domain experience and technology platforms of both companies.

Sonata's mobility platform, Halosys, is a single Unified Enterprise Mobile Enablement Platform that enables businesses to connect, build, secure, manage and deploy an enterprise-wide mobile applications portfolio. The platform seamlessly extends existing enterprise security, identity and business applications. This simplifies, accelerates and ensures a reliable way to execute mobility programs at scale, with an underlying architecture that adheres to emerging mobile and IoT standards and technology trends.

The Aeris IoT solutions platform is a comprehensive, patented and end-to-end enabler for enterprises to bring IoT solutions to market quickly, cost-efficiently and with the highest security. The platform consists of AerPort™ connectivity management platform, AerCloud™ applications enablement platform, AerCore™ IoT network and AerVoyance™ IoT analytics platform.

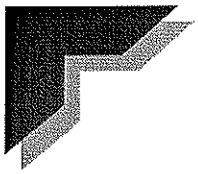

"We are thrilled to have Aeris as an IoT alliance. The complementarity between Aeris and Sonata's enterprise mobility platform solutions provides a great way for enterprises to expedite both B2B and B2C IoT connected mobile and web application and also provide solutions and services to their customers by leveraging Sonata's global delivery and support capabilities," said Avinash Harsh, head of enterprise mobility platform, Sonata.

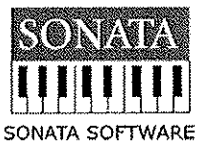

Mark Aylor, senior director of partner channel, Aeris, said, "The alliance between Sonata and Aeris will bring simplicity to the enterprise as they make the journey into the complex IoT world. Aeris' comprehensive IoT Platform Solutions coupled with Sonata's deep Information Technology and Software knowledge can provide enterprise organizations the resources and tools to deploy and scale their IoT Solutions to the global marketplace.

"The combination of Aeris and Sonata Software will help enterprises build profitable IoT and mobile applications," said Dr. Rishi Bhatnagar, president, Aeris India. "Hundreds of enterprises are already relying on Aeris every day to power their mission-critical deployments. We look forward to the opportunity to help many more enterprises through our strategic alliance with Sonata."

About Sonata Software

Sonata Software is a global IT solutions firm focused on catalysing business transformation initiatives of its clients through deep domain knowledge, technology expertise and customer commitment. The company delivers strategic technology solutions for Travel, Retail & Distribution and Software Product companies to drive enhanced customer engagement, operations efficiency and return on IT investments. Sonata brings its own proprietary platforms, products and services in digital technology areas such as Omni-channel commerce, Mobility, Analytics, Cloud and ERP to enable speed and reliability of IT led innovation. A trusted long-term service provider to Fortune 500 companies across both the software product development and enterprise business segments, Sonata seeks to add differentiated value to leadership to those who want to make an impact on their businesses, with IT.
