BUSINESS OVERVIEW

- Stable performance in a challenging external environment
- Strong order inflow across segments enhances Order backlog. Orders won across varied sectors of Pipelines, Process facilities, Nuclear Power, Thermal Power, Railways, Oil and Gas, Civil and Construction.
- Middle East regions have particularly shown an improvement in the order inflow .
- Global economic concerns & Rising Interest rates, spiralling inflation in India continue to present challenges. However, it is likely to be combated with robust order inflow.
- Significant delays for release of payment by public sector clients are leading to increased borrowings.
- The political turmoil in Libya after Gadhafi's demise is expected to stabilize and it is expected that new regime or leadership will be concentrating on the growth and development of the country. This would translate into several business opportunities.

Commenting on the Company's performance for Q2 & H1 FY2012, Mr. Atul Punj, Chairman, Punj Lloyd Group, said:

" The current financial year has shown robust growth in our order inflow which in turn has translated to an increase in topline on the back of relatively better execution. During this year till date we have achieved total order inflow of ₹ 10,286 Cr. Vs ₹ 9,978 Cr. achieved in last full financial year.

We are also enthused with the continuing broad basing of our order book which now comprises orders from pipeline, thermal, process, nuclear power and railways besides infrastructure and oil and gas.

Macro environmental conditions in Libya are expected to improve and going forward we hope to resume execution of our projects there and also bid for some new ones.

The Indian infrastructure sector continues to face challenges in form of higher interest rates, higher working capital and rising commodity rates. While the environment continues to be challenging we are hopeful that our strong order book, capable management and diversification will translate to continuing growth and create value for all our stakeholders "
