A. Srinivasa Rao
Company Secretary

Seqrite launches 'Seqrite Hawkk' to help enterprises secure their digital transformation journey

- *Introduces 'Seqrite HawkkEye' a centralized security management platform in the first phase*
- *Plans to invest and launch more next-generation products and solutions under the 'Hawkk' Umbrella*

Pune, June 15, 2021: Seqrite, a specialist provider of enterprise cybersecurity products and solutions has introduced 'Seqrite Hawkk', a premium suite of next-generation cybersecurity solutions aimed at empowering enterprises to secure their digital transformation journey. In the first phase, Seqrite Hawkk will offer – 'Seqrite HawkkEye' – a cloud based centralized security management platform that will empower enterprises to manage multiple security products from a single console. Seqrite will continue to invest and add more products under the Hawkk umbrella that will also mark the brand's foray into endpoint detection and response (EDR), zero trust, data privacy and cloud-based network security products.

Seqrite is the enterprise arm of Quick Heal Technologies Limited, one of the leading providers of cybersecurity products and solutions for consumers, businesses and Government. In 2020 alone, Seqrite successfully thwarted over 13,000 cyber-attacks every hour, including ransomware (double extortion), APTs and targeted attacks, demonstrating the scale and sophistication of cyber-attacks.

According to the data from the Indian Computer Emergency Response Team (CERT-In), India witnessed a 300% rise in cyber-attacks in 2020. Rapid proliferation of endpoints, cloud apps, and smartphones with the growth of distributed workspaces and a diminishing enterprise perimeter has exposed organizations to newer threat vectors and risks. Security point products in play fail to consider the aggregated impact of a security alert and often employ a siloed approach to threat remediation. The growing threat landscape needs a centralized and integrated security and risk management approach.

'Seqrite Hawkk' has been designed to empower CISOs and IT leaders to get comprehensive visibility into their organization's security posture, generate actionable insights, ensure compliance and boost their organization's defense against the next wave of cyber-attacks across endpoints and mobile devices, enterprise data infrastructure, and enterprise applications. Powered by AI, Cloud and Patented technologies, the new range of solutions are easy to use, lightweight and can be deployed within minutes. The launch demonstrates Seqrite's continuous commitment towards innovating and developing the most comprehensive and powerful suite of security solutions to simplify cybersecurity management.

Commenting on the launch, **Sanjay Katkar, Joint Managing Director and Chief Technology Officer, Quick Heal Technologies** said, *"Threat actors have been constantly banking on new technologies to devise innovative attack strategies and target organizations across geographies. Data breaches and their impact on firms' reputation have only increased in scale over the years. It is therefore crucial for leaders to up their cybersecurity posture and prevent compromise of sensitive enterprise data. Sensing the criticality of the current cybersecurity landscape, we have introduced Seqrite Hawkk to help enterprises boost their defense against malicious actors. We will continue to strengthen the Hawkk platform by adding more next-generation products that will mark our foray in the areas of EDR, zero trust, data privacy and cloud-based network security."*

About Seqrite HawkkEye:

Seqrite HawkkEye is a Centralized Security Management platform that enables enterprises to integrate cybersecurity silos into a holistic security posture, make data-driven decisions, and manage multiple security products from a single dashboard. Simplify, Consolidate, Analyze, and Act on potential threats quickly and effectively with just a few clicks!

To begin with, the intuitive platform integrates industry-leading Endpoint security (EPS), Data Loss Prevention (DLP), Endpoint Detection and Response (EDR) and mSuite (EMM) into a unified console. Seqrite Endpoint Security is a comprehensive platform that enables security experts to manage multiple endpoints remotely. Seqrite's mSuite creates a safe mobile ecosystem for organizations and boosts employees' productivity by keeping important business data secured especially across distributed workspaces.

More products will be onboarded on to the platform to ensure an organization's security products communicate with each other, consolidate alerts, identify risks, and convert the data into real-time threat intelligence. Purpose-built to reduce TCO, redundant workflows, and enhance performance, Seqrite's HawkEye is designed to secure an organization's digital transformation journey.

About Quick Heal Technologies Limited:

Quick Heal Technologies Limited is one of the leading providers of IT Security and Data Protection Solutions with a strong footprint in India and an evolving global presence. Incorporated in the year 1995, it is an all-around player in cybersecurity with a presence in B2B, B2G, and B2C segments across multiple product categories – endpoints, network, data, and mobility.

With its state-of-the-art R&D center and deep intelligence on the threat landscape, Quick Heal helps in simplifying security by delivering the best-in-class protection against advance cyber-attacks. Its portfolio includes solutions under the widely recognized brand names 'Quick Heal' and 'Seqrite' across various operating systems and devices.
