Fino Payments Bank selects Seqrite mSuite to power its Workforce Mobility

Leverages Seqrite mSuite to empower its mobile workforce to access enterprise data and applications on the go while enabling IT teams to securely manage and control the devices

Mumbai, February 17, 2020: Seqrite, a specialist provider of endpoint security, network security, enterprise mobility management and data protection solutions, has today announced that Fino Payments Bank has selected Seqrite mSuite to securely manage its workforce mobility requirements. The deployment is aimed at empowering Fino's workforce to access enterprise data and applications on the go while enabling the organization to securely manage and control the devices remotely.

Fino Payments Bank comes from an institution that has served the country's banking needs for over a decade. It's the first payments bank to go live with 410 branches and more than 25,000 banking points on day one and the only entity in its space that has experience in providing technology-enabled banking services in unbanked and underbanked areas. As part of its business model, a large number of Fino's workforce functions remotely, accessing enterprise data and applications on the move. This made it challenging for Fino's IT team to keep track of their devices.

Fino Payments Bank selected Seqrite mSuite after rigorously evaluating multiple products. The Seqrite product was chosen on the back of its ability to provide a centralized view of the devices and the ease of pushing applications on a real-time basis. mSuite is powered with a scalable cloud architecture that enables Fino to accommodate more users according to business requirements. The solution's comprehensive visibility over mobile devices further empowers the bank to identify, track, and control user access to its enterprise network and data while also mapping the productivity of its workforce. In addition, it makes remote scheduling of a security scan possible for the IT team to identify risks and infections with the best-in-class anti-malware capabilities.

Speaking on the deployment, **Mathew Chelliah, Deputy Vice President (Technology), Fino Payments Bank**, commented, *"As an innovator in our field, we constantly strive to expand the depth and quality of our service offerings and delivery. The move to create a connected, mobile workforce was aligned with this mission. Naturally, we also required an equally excellent centralized solution to securely manage, track, and control access for devices connected to Fino's network. After a rigorous evaluation of multiple products, Seqrite's mSuite appeared the best fit for our requirements. We are already seeing impressive results since the deployment and are confident that it will help us further optimise operations, bolster productivity, and enhance service delivery while also ensuring that our data, devices, and users remain protected from advanced threats."*

Sneha Katkar, Product Manager, Enterprise Mobility Management, Seqrite said *"Indian businesses are increasingly tapping dynamic workplace cultures to maximize their organizational efficiency, productivity, and profitability. Fino Payments Bank, with its mobile-led workforce, is one of the leading examples of this phenomenon. Through Seqrite's Enterprise Mobility Management (EMM) portfolio, our aim is to enable Indian enterprises to unlock their maximum potential by optimizing their IT management capabilities. Besides these advantages, Seqrite's deep threat intelligence and extensive security capabilities also proved to be a decisive factor for Fino's IT team. Moving ahead, we aim to keep supporting Fino Payments Bank in their digital journey and look forward to bolstering our association with them."*

About Seqrite:

Seqrite is the Enterprise Security solutions brand of Quick Heal Technologies Ltd. Launched in 2015, Seqrite solutions are defined by innovation and simplicity. A combination of intelligence, analysis of

applications and state-of-the-art technology, Seqrite is designed to provide continuous and better protection for enterprise corporate customers.

Seqrite portfolio of solutions includes Endpoint Security, Enterprise Mobility Management (EMM), Unified Threat Management (UTM), Secure Web Gateway (SWG) and data protection technologies like Encryption and Data Loss Prevention (DLP). In addition, Seqrite Services provides comprehensive cybersecurity consulting services to Corporates, PSUs, Government and Law Enforcement Agencies.
