For Immediate Release

Air India flies high with Ramco Aviation

Goes live across 64 stations, 240 Warehouses maintaining 125+ aircrafts including 3 Dreamliners

Chennai, India – December 10, 2012 – Ramco Systems, the Global Aviation Maintenance & Engineering (M&E) and Maintenance, Repair & Overhaul (MRO) software provider on cloud, tablets and iPad, announced that Ramco Aviation has gone live with its implementation in Air India. With this, Ramco Aviation Suite will help Air India in maintaining its 125+ fleet of Boeing and Airbus, including the latest Boeing 787 / Dreamliner.

Speaking on the go-live, **Mr. Vipin Kumar Sharma, SBU Head, Air India**, said, "We are happy to announce the successful go-live of Ramco Aviation Suite at Air India. We evaluated multiple global MRO vendors and chose Ramco as it met all our elaborate functional requirements. After implementing Ramco's Aviation Software, we hope to increase productivity through optimum use of engineering resources. As the entire fleet is maintained on the system, we would be able to effectively track history of the aircraft and components for faster resolution of defects/snags and thus reduce our Maintenance TAT.

Commenting on this milestone, **Mr. Virender Aggarwal, CEO, Ramco Systems**, said, "We are pleased to announce that Ramco Aviation has successfully gone live at Air India for its entire fleet including the latest generation of Boeing 787. We have been investing in building the latest functionality into the product by enhancing the user experience and delivering it on Cloud, Mobile and iPad. Today, Ramco Aviation Suite maintains over 60+ leading aircraft models for customers around the globe. This has given the product a unique depth and functionality to address every segment of the Aviation Industry—from single jet owners to large MROs. By addressing the next-generation of aircrafts, we have continued to serve the complete gamut of Aviation industry with our best-of-breed solution."

Ramco provides end-to-end solution that caters to every segment of Aviation, Aerospace and Defense industry such as Airlines, MROs, Helicopter operators, CAMOs, Specialty Operators, Non-Scheduled Operators and OEMs on the most appropriate delivery model—On Premise or On Cloud. Written ground up for Aviation industry, Ramco Aviation Suite also offers complete ERP functionality including HR, Finance, and Materials thereby addressing every business need of the Aviation segment.

About Air India:

Air India together with its fully owned subsidiary Alliance Air and Air India Express has a younger fleet comprising A319, A320, A321, A330, CRJ, ATR, B737, B777 and B787 aircraft. With a fleet of more than 100 aircraft, Air India has been gradually expanding its network to cover new destinations in India and abroad. Air India performs practically all MRO operations internally and the capability includes heavy maintenance check, Line check, Engine and component overhaul for its entire fleet. Air India's Maintenance and Engineering main workshop facilities are located at five major bases viz. Delhi, Mumbai, Kolkata, Hyderabad and Thiruvananthapuram. The Engine Overhaul facility of Air India and part of workshops undertaking servicing of engine components are approved by FAA and EASA.

About Ramco Systems:

Ramco Systems provides next generation, end-to-end enterprise solutions on Cloud, Mobile and Tablets. Built on Ramco VirtualWorks®, all Ramco products are cloud architected by design and address the entire business cycle
