# Business Update

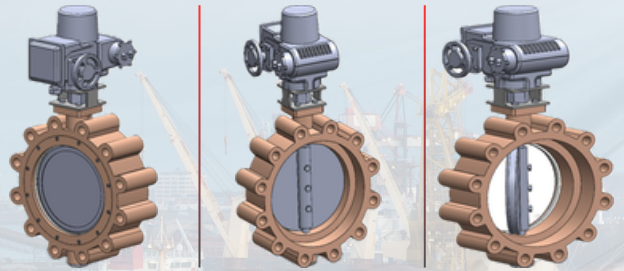

## Development of High Performance Butterfly valves

(Marine Industry)

Developed a **new series of high-performance** butterfly valves purpose-built for marine and shipbuilding applications. These valves offer **superior reliability and durability, perfectly suited to the exacting standards of the shipbuilding industry.**

This is a **strategically significant move** — marine is a technically demanding, certification-heavy sector where switching costs are high and relationships are sticky.

The company already has an established track record supplying advanced valve solutions to leading shipbuilders across India and internationally, giving it a credible foundation to scale in this segment.

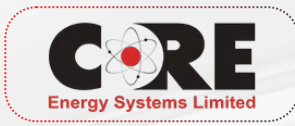

## Association with major Indian shipbuilding companies

**Central PSU:** Cochin Shipyard Ltd, Mazagaon Dock Shipbuilders Ltd, Gardern Research Shipbuilders & Engineers, Hindustan Shipyard Ltd, Goa Shipyard Ltd.

**Private Sector Shipyards:** L&T Shipbuilding, Swan Defence & Heavy Industries

## New Customer Additions

Onboarded the following new customers in the last 30 days.

Defence

Gas

Nuclear & Power

## Certifications — Building a Compliance Moat

We are actively adding type approval certifications from leading international classification societies acting as a barrier to entry & expanding the addressable market and strengthening company's defensibility.

## Capacity Expansion – Infrastructure for Growth

Two concrete investments in manufacturing infrastructure:

**Automated Test Benches (\*4)** ordered and being installed in two phases: 2 units on 10th March 2026, and balance on 25th March 2026. These directly address delivery speed – a critical factor in industrial procurement – and improve quality consistency at higher volumes.

**New VMC Machine** Ordered. This adds precision machining capacity, supporting both new product lines (including the marine series) and broader production scale-up.

## Summary of Order Bookings & Tender Activity

## About Rappid Valves:

With over 24 years of expertise in high-precision fluid control systems, we specialize in designing and manufacturing valves for critical applications across industries like Hydrocarbon, Marine, Shipbuilding, Chemical, Power, and more. Our ISO-certified facility produces a wide range of valves, including Ball, Gate, Globe, Butterfly, and Marine Valves, in sizes ranging from 15mm to 600mm. With an installed capacity of 29,625 units we proudly serve clients across 18 states and 1 union territory.
