ISIN: INE206N01018	

Sub: Intimation under Regulation 30 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015.

Ravindra Energy Limited's associate company 'Energy In Motion Private Limited' Receives ARAI Certification and Completes First Commercial Sale of India's First Battery-Swappable 55-Ton Electric Tractor "Ashwa"

We are pleased to inform that our associate company, **Energy in Motion Private Limited** (EIM), has received the CMVR Type Approval Certificate (TAC) from the Automotive Research Association of India (ARAI), along with necessary approvals via the VAHAN portal, enabling commercial sale and registration of its 55-ton electric tractor – "Ashwa".

Further, we are proud to announce that EIM completed its **first commercial sale** of the **Ashwa electric tractor today**, marking the beginning of its go-to-market phase.

This milestone establishes the "Ashwa" as India's first battery-swappable, fully certified 55-ton electric tractor, compliant with CMVR norms – a breakthrough in the electrification of heavy-duty transport.

On this occasion, **Mr. Narendra Murkumbi, Vice Chairman of Ravindra Energy and Managing Director of EIM** said:

"The ARAI certification and first commercial sale of Ashwa represent a landmark moment in our journey toward sustainable freight mobility. This achievement is the culmination of years of R&D by our technology partners Foton Motors, rigorous testing in India, and strong collaboration with regulatory authorities. We are proud to be at the forefront of India's clean energy transition in heavy transport, and this validation paves the way for scaling our presence across key logistics corridors in India. The Ashwa is not just a vehicle—it's a vision for a greener, more efficient logistics ecosystem."

RAVINDRA
ENERGY LIMITED

About EIM:

Energy In Motion (EIM) is an associate venture of Ravindra Energy Limited (REL) (49.5% REL shareholding) created to drive clean mobility solutions. EIM's business model focuses on selling bare electric tractors (without battery packs) to transporters, while providing battery packs, charging/swapping infrastructure, and energy supply through long-term contracts.
