**Sub: Disclosure under Regulation 30 (Listing Obligations and Disclosure Requirements) Regulations, 2015 (“Listing Regulations”) - Press Release**

Dear Sir/ Madam,

Pursuant to the provisions of Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, please find enclosed the Press Release titled “**Regaal Resources Limited doubles crushing capacity to 1,650 TPD, becoming Eastern India’s largest maize-based speciality manufacturer; commissions new Liquid Glucose and Maltodextrin Powder facilities at its Kishanganj facility in Bihar**”.

Copy of the Disclosure will also be hosted on the Company’s website at <https://regaalresources.com/>.

We request you to take the above information on records.

Thanking you,

**For Regaal Resources Limited**

**Tinku Kumar Gupta**  
**Company Secretary and Compliance Officer**

## Press Release

***Regaal Resources Limited doubles crushing capacity to 1,650 TPD, becoming Eastern India's largest maize-based speciality manufacturer; commissions new Liquid Glucose and Maltodextrin Powder facilities at its Kishanganj facility in Bihar***

**Bihar, 26<sup>th</sup> May 2026:** Regaal Resources Limited, one of India's leading maize processing companies, has doubled its maize crushing capacity from 825 TPD to 1,650 TPD. The Company has also commissioned a new Liquid Glucose ("LG") manufacturing facility with a production capacity of 180 MT per day and a new Maltodextrin Powder ("MDP") manufacturing facility with a production capacity of 50 MT per day at its integrated maize processing complex in Kishanganj, Bihar, on 26<sup>th</sup> May 2026.

With an investment of approximately ₹389 crore, the expansion marks a significant milestone in the Company's growth and product diversification strategy, aimed at strengthening its presence in value-added maize specialty products and derivative segments.

With maize processing capacity of approximately 1,650 Tonnes per Day, the facility is expected to generate around 475 additional direct employment opportunities, taking the total direct employment to 950 people on company payroll, along with significant indirect opportunities across contractual labour, logistics, warehousing, transportation, procurement, and allied services. The expansion is also expected to benefit thousands of farmers by strengthening local sourcing networks, improving market access, and enabling more organised procurement channels.

### **Key Highlights of the Expansion:**

- Crushing capacity at the Company's integrated maize wet milling facility in Kishanganj, Bihar increased from 825 TPD to 1,650 TPD
- New Liquid Glucose ("LG") manufacturing capacity of 180 MT per day commissioned
- New Maltodextrin Powder ("MDP") manufacturing capacity of 50 MT per day commissioned
- Captive co-generation power plant capacity expanded from 7.1 MW to 15.8 MW
- Total capital outlay of approximately ₹389 crore incurred towards the expansion project
- Expansion expected to strengthen the Company's downstream derivative product portfolio and enhance value-added capabilities, supporting revenue growth and margin expansion

The Company's integrated manufacturing facility at Kishanganj is strategically located in Bihar, one of India's largest maize-producing states, enabling efficient raw material sourcing and lower logistics costs. The facility also benefits from proximity to key maize trading hubs, including Gulabghat and Dalkhola mandi, supporting procurement efficiencies and supply chain reliability.

As one of the only large-scale maize wet milling facilities in Bihar, Regaal is uniquely positioned to drive localised value addition, strengthen farmer market access, and build an integrated maize processing ecosystem in the region, while efficiently serving customers across India, particularly in Eastern and North-Eastern markets, as well as select South-East Asian export markets.

The increased crushing capacity and commissioning of the Liquid Glucose and Maltodextrin Powder facilities are expected to accelerate the Company's transition towards higher-margin specialty and derivative maize products while supporting growing domestic and international demand. Liquid Glucose is widely used in sweets, confectionery, biscuits, ice creams, jams, jellies, pastries, and liquors, while Maltodextrin Powder finds applications across the food & beverage, pharmaceutical, dairy and nutraceutical industries.

The Company also plans to further expand its value-added product portfolio, with a range of modified starch products and derivatives including Dextrose Anhydrous ("DAH"), Dextrose Monohydrate ("DMH"), and Hydrol during FY27. These additions are expected to enhance operating leverage, diversify the product portfolio, and enable margin expansion.

Commenting on the development, Mr. Anil Kishorepuria, Chairman and Managing Director of Regaal Resources Limited, said:

*"The commissioning of our expanded crushing capacity to 1,650 MT per day and new derivative manufacturing facilities for Liquid Glucose of 180 MT per day and Maltodextrin Powder of 50 MT per day marks a significant milestone in Regaal's journey towards becoming a diversified maize-based specialty products company. This expansion strengthens our presence in higher*

*value-added maize derivative products and enhances our ability to cater to evolving customer requirements across the food, pharmaceutical, agriculture, and healthcare sectors.*

*At 1,650 MT per day, Regaal will now operate the largest maize wet milling facility in Eastern India, further strengthening our manufacturing scale and long-term growth prospects. Beyond expanding our product portfolio and enhancing production capacities, we believe this expansion will contribute meaningfully to employment generation in Bihar. The project is expected to create 475 additional direct employment opportunities, taking our total on-roll workforce to approximately 950 employees, while also generating significant indirect opportunities across contractual labour, logistics, warehousing, transportation, procurement, allied services, and the broader agricultural value chain. Most importantly, this growth will continue to support the livelihoods of farmers and strengthen the rural economy in the region.*

*We are also undertaking further expansion of our value-added product segment with a range of modified starch products and derivatives including Dextrose Anhydrous, Dextrose Monohydrate, and Hydrol, for which the associated capex is already underway, and commissioning is expected over the course of FY27.*

*We would also like to express our sincere gratitude to the Government of Bihar for its continued support for industrial development in the state. The incentives and policy support extended under the Bihar Industrial Investment Promotion Policy (BIIPP) have played an important role in enabling industrial expansion and investment in the region, supporting companies like Regaal in scaling operations and creating long-term economic value within the state.*

*The growing demand for maize derivatives, coupled with our strategic location, integrated infrastructure, and strong sourcing capabilities, positions us well to create sustainable value for all our stakeholders."*

### **About Regaal Resources Limited**

Regaal Resources Limited is among India's leading maize-based specialty product manufacturers, operating a modern wet milling facility in Bihar strategically located near key maize-growing regions. With an installed crushing capacity of approximately 1,650 TPD, the Company ranks among the leading maize milling players in India and the largest player in Eastern India offering a wide range and growing portfolio of products including native starches, modified starches, first-stage products, and maize derivative products.

The Company caters to diverse industries such as food & beverages, pharmaceuticals, textiles, paper, and animal nutrition. With integrated procurement capabilities, large-scale storage infrastructure, expanded manufacturing capacities, and a growing portfolio of value-added products, Regaal continues to strengthen its position as one of the fastest-growing players in India's maize processing sector.
