Media Release:

RInfra's SPV Pune-Satara Road Accredited ISO 27001 Certification

- **India's First Road project to be accredited with ISO 27001 certification**
- **Testimony of Company's commitment to maintain highest level of security of Customer's information**
- **British Standards Institute (BSI) awarded certification post rigorous audits**
- **Accreditation valid till 2015**
- **RInfra's Metro business to undergo certification process shortly**

Mumbai, October 30, 2012: Reliance Infrastructure Limited (RInfra) Special Purpose Vehicle (SPV) - PS Toll Road Pvt. Ltd., has been accredited with ISO 27001 certification for its Pune-Satara Road Project. RInfra is the first road company in India to receive such prestigious ISO 27001 accreditation, for its robust Information Security practices.

Global firm British Standards Institute (BSI) has awarded this prestigious certification to RInfra after conducting stringent audits of various IT Security Systems, established by the Company. The certification will be valid till 2015.

Reliance Infrastructure Ltd. will soon be undergoing certification process for its Metro rail business. Recently, RInfra's power distribution business was re-accredited with ISO 27001 certification, which was also the first ever among Indian power utilities.

Commenting on this development, Mr. Sudhir Hoshing, CEO (Roads), Reliance Infrastructure Limited, said, ***"We are pleased to receive this prestigious ISO 27001 Certification for our Pune-Satara Road. This is a testimony to our commitment towards maintaining highest level of information security and Risk Management for our customers and stakeholders. We are also proud to be the first road concessionaire in India to be accredited with such certification. Our other road projects are also in the process of getting similar certification.***

ISO 27001 is an Information Security Management System (ISMS) which is the most widely recognized information security standard in the world. It provides a robust model for implementing the principles and guidelines for governing risk, security design and implementation, security management and reassessment. Further, it also ensures the security of information, which is the most valuable asset of any organization and is quite comprehensive in its scope and strives to maintain privacy, reliability and availability of data to all stakeholders. It helps organizations to better address its risks and protect information.
