MEDIA RELEASE

***REPL selected to prepare Master Plan
for 18 ULBs of Uttarakhand Order worth Rs.2.28 crore
(excluding GST)***

REPL to prepare master plan for 18 ULBs of Uttarakhand

Dehradun, March 28th, 2023: Town and Country Planning Department, Govt. of Uttarakhand has appointed leading infrastructure consultancy firm Rudrabhishek Enterprises Ltd. (REPL) for the formulation of GIS Based Development/ Master Plan(s) 2041 for 18 ULBS of two clusters namely cluster 4 and 5. Tehri, Nainital, Almora and Bageshwar districts are under these clusters.

GIS-based Master/ Development Plans will provide the basis for Infrastructure provision, effective land use and utilization, spatial growth management, enable project planning and urban management to the development authorities.

Mr. Pradeep Misra, CMD-REPL said, "Uttarakhand is a region of immense opportunities but the geographical dynamics of the state require judicious approach for carrying out any development. The existing infrastructure are insufficient to keep up with the progress of state's growth and development. Technology can play a defining role in the infrastructure development keeping ecological aspect into the consideration. We have been working on various projects across India using advance and innovative Geospatial Technology for quite a long time. Enhanced visibility from the GIS technology enables the authorities to plan the development more effectively. Our expertise has enabled us in executing these projects with greater efficiency and now that experience will help us accomplish this project with precision."

Mr. Prabhakar Kumar, AVP-REPL said, "Preparation of GIS based master plan has become extremely important for effective planning of a city. Since these areas are environmentally sensitive and vulnerable in nature, so, while preparing a master plan we will give more emphasis on approach of environment sensitive and disaster management of planning through technological interventions. We will do a detailed analysis of environmental sensitive areas, urban sprawl, study of existing land use, assessment for future needs, determination of suitability of available land for various activities/usages, planning of new road links, reserving land for public facilities and services, zoning and framing suitable development promotion and control regulations. We will also undertake both primary and secondary data collection including land use survey, socio-economic, traffic, transportation, environment sensitivity & land sustainability and other surveys to identify the specific requirements of the region and their corresponding solutions".

REPL will evaluate various aspects of town planning including building structure, roads, land use, parking, industrial policy, water supplies, drainage, sanitation, land sustainability in environmentally sensitive areas and opportunity of economic growth of region, while developing the master plan for horizon year 2041. The project is divided into six stages and is expected to be completed in 18 months.
