MEDIA RELEASE

REPL appointed for providing consultancy services for property tax register based on GIS & Multipurpose Household survey with technical handling support in Municipal Corporation, Katni, Madhya Pradesh Order worth Rs. 70 Lacs

New Delhi, March 30th, 2021: Katni Municipal Corporation (M.P.) has appointed Delhi-based infrastructure consultancy firm Rudrabhishek Enterprises Limited (REPL) to prepare GIS based property tax register and conduct multipurpose household survey with technical handholding support. Madhya Pradesh government has taken up the initiative under a new scheme 'Shahari Sudhar Karyakram' to implement reforms in all the Municipal Corporations.

This project will help in the improvement of revenue collection, financial, planning and management capacity of the ULBs through provisions of valid, reliable, and credible spatial and non-spatial information. REPL will provide the City Base Map based on Satellite Image & Ground Survey, Revenue Survey of all slum & non-slum properties, and updation of property tax demand collection registers with ULB staff. The base map will contain all key physical features such as boundaries of each plot & building (structure) and a unique identification number (Property Identification Number or E-Nagarpalika property ID). The map shall be multipurpose and could be used by various sections of the ULB such as engineering, revenue (taxation) and town planning.

Mr. Pradeep Misra, CMD-REPL said, "Technology is pivotal in infrastructure development. The use of GIS based mapping in Municipal Corporation's facilitates is achieving modern and transparent systems, for all urban services and governance functions. This leads to effective city-wide planning and governance. Residents will be able to obtain access to urban services without interruption. Our expertise of working on various GIS based projects will help us in completing this project with accuracy and precision."

Dr. Harish Sharma, ED-REPL said, "The development of appropriate GIS has considerable potential to improve municipal planning, administration, and management in a number of ways. GIS based mapping will enable spatial referencing of unique identification number given to the properties and plan the survey more systematically. This will improve property tax coverage and collection and also help the decision makers in making policies. GIS based
