# With infra boom, cement firms look to tap demand

AMRITHA PHILIP  
Mumbai, 4 September

As India's expenditure on infrastructure grows, cement companies are adopting different strategies to attract a share of the rise in demand.

Expanding the network of large buyers, entry into ready-mix cement, and catering to a niche of blended cement are some strategies being considered.

While UltraTech Cement dominates this segment, each large producer is shaping up strategies to tap into it.

Infrastructure contributed 24 per cent of India's cement demand in FY23 and is expected to witness higher growth rates than demand in some other areas in the next three financial years, according to estimates of cement companies.

Adani Cement is planning to expand its ACC ready-mix network, and develop stronger large-buyer sales to tap into the demand generated by India's growing infrastructure needs.

"Thirty per cent of our demand will come from large buyers. That might happen two-three years from now," said an executive from Adani Cement, the second-largest cement producer in the country.

The executive added, "As we aspire to increase our capacity from 625 million tonnes to 140 million tonnes, we cannot realise that ambition without servicing the infrastructure segment." The share of large buyers at present for

## EXPANDING REACH

- Expansion of the large buyers' network, entry into ready-mix cement and catering to a niche of blended cement are some of the strategies of cement industries
- Adani Cement plans to expand its ACC ready-mix network, and
- develop stronger large buyer's sales
- In July, Shree Cement announced its entry to set-up five RMC units
- Dalmia Cement are aiming to supply more infrastructure projects in the sub-category of blended cement

## 'Shree Cement to scout for acquisitions at right price'

Shree Cement will continue to explore acquisition opportunities at the right price, said Prashant Bangur, vice-chairman.

The company recently lost out in the race for Sargh Industries, which was acquired by Adani-owned Ambuja Cement in August at an enterprise value of ₹5,000 crore. Shree Cement's bid was understood to be significantly

lower. Bangur said that the company would evaluate acquisition opportunities in any part of the country provided it made sense in terms of valuation. "Acquisition is a chance game," Bangur also noted. He was speaking on the sidelines of STATCON, an annual real estate conference organised under the aegis of CREDAI West Bengal.

financial year. "Some large projects have their own ready-mix cement units while others may not have them. Ready-mix cement will typically cater to large projects that outsource the concrete. It may be builders, individual home

builders as well as projects like metro and roads," said Prashant Bangur, vice-chairman of Shree Cement. Ready-mix cement refers to concrete that is ready to use and does not require any additional processing on site, making it ideal for projects with space constraints.

In August, Nucovo Vistas Corp announced setting up two ready-mix cement units, one each in Mumbai and Pune, which, the company said, would help leverage "Mumbai's significant infrastructure transformation and Pune's aggressive expansion in the construction domain".

Certain others such as Dalmia Cement are aiming to supply more infrastructure projects in the sub-category of blended cement. Top executives of the company told analysts in its earnings call in July the National Highways Authority of India and other important projects started using blended low-carbon cement on account of carbon awareness. The company is going to increase its share only in blended low-carbon cement. Blended cement refers to cement manufactured through blending clinker with other materials such as slag and fly ash, reducing its carbon content. However, not everyone is sure of a market for blended cement.

"Ordinary Portland cement is the major cement type for infrastructure companies. Cement firms are looking at blended cement from an ESG point of view, but cost is the main factor in the large buyer segment for infrastructure," said an analyst with a domestic brokerage firm.

Shree Cement is around 20 per cent. Ready-mix cement is another segment that companies are expanding into. In July, Shree Cement announced its entry into ready-mix cement, with plans to set up five such units this

year 2018. The CEO of the contractor was also in talks with other players about similar deals to adopt Volkswagen technology. Ludwig Fazel of Volkswagen Group Components said, though these were not finalised.

Volkswagen said in a statement, "We have developed a modular, open vehicle platform for EVs, called MEB, which is used to build cars and SUVs and those of other group companies including Skoda and Audi. This also allows Volkswagen to be a supplier of electric technology and parts to other automakers."

In August, Volkswagen and Mahindra signed a term sheet under which the German carmaker would supply electric components to its Indian peer.

The contractor was also in talks with other players about similar deals to adopt Volkswagen technology. Ludwig Fazel of Volkswagen Group Components said, though these were not finalised.

# Airtel to purchase 23,000 Mwh of renewable energy in Q4FY24

Bharti Airtel on Monday announced that it would purchase 23,000 Mwh (Megawatt hour) of renewable energy by the fourth quarter of FY24 at its data centre company, Nitra.

Airtel will do this by acquiring India's first green energy project companies - Continuum Green India and Vibrant Energy Holdings. The energy will power six of Nitra's edge data centre facilities.

The purchase will be made through an open access route where Airtel will acquire a stake in Continuum Green, which will supply green power from solar and wind power projects to data centres in Maharashtra Pradesh. Airtel has also committed to a stake purchase agreement with Vibrant Energy Holdings, which will supply solar power to Nitra's edge data centre in Vijayawada, Andhra Pradesh, the company said.

Nitra is committed to become a net-zero company by 2031, Ashish Arora, CEO - Nitra by Airtel, said. "We believe that India's growth will be mirrored by its Data Center industry growth in the coming years, and we are committed to reduce our carbon footprint and lead the Green Data Center infrastructure revolution in the country," he said.

## VW, Mahindra in talks for EV components

Volkswagen said on Monday it was in advanced talks with India's Mahindra & Mahindra on the use of key electric components of the German carmaker's open platform for electric vehicles (EVs), called MEB.

Mahindra plans to use central MEB components such as the e-drive and unit cells for its models, Volkswagen said in a statement. Volkswagen has developed a modular, open vehicle platform for EVs, called MEB, which is used to build cars and SUVs and those of other group companies including Skoda and Audi. This also allows Volkswagen to be a supplier of electric technology and parts to other automakers.

In August, Volkswagen and Mahindra signed a term sheet under which the German carmaker would supply electric components to its Indian peer. The contractor was also in talks with other players about similar deals to adopt Volkswagen technology. Ludwig Fazel of Volkswagen Group Components said, though these were not finalised.

## Volvo bets on EVs, eyes record sales in 2023

SOHINI DAS  
Mumbai, 4 September

Volvo is betting on electric vehicle (EV) launches in 2023 to reach a new milestone in India—the highest ever car sales. Previously, its highest sales were at 2,600 cars in the year 2018.

Volvo Cars India on Monday launched the C40 Recharge. It has been priced

at ₹61.25 lakh. The C40 Recharge is its second EV offering in India after the XC40 Recharge. The XC40 Recharge has seen good response in the last seven to nine months, said Jyoti Mahotra, managing director (MD), Volvo Cars India.

Speaking to *Business Standard*, Mahotra revealed that the car has already garnered around 25 per cent share in the luxury EV market in India. It also contributes around 12 per cent of Volvo India's sales.

With the C40 Recharge in its kitty, it expects sales to pick up in the second half of the year.

As such, the luxury EV market is growing — from ₹800-₹600 crore a year back, to 2,000 cars or so (expected this year).

"Even in this year, the growth is primarily coming

from this segment. This segment is very crowded. It has about 20 models. Elevate will have a distinctive position as it offers a unique shape, interior and exterior, and offers good package as far as comfort and convenience are concerned," he added.

## Honda launches new SUV to reach H2 target

Honda Cars on Monday launched a sports utility vehicle (SUV) called Elevate at a starting price of ₹10.99 lakh to reach its target of 35 per cent year-on-year growth in the October-March period of FY24.

Kunal Behl, vice-president (Marketing & Sales), Honda

Cars India, told *Business Standard*, the mid-size SUV segment, wherein Elevate is placed, has recorded a compound annual growth rate (CAGR) of about 21 per cent in the last five years.

"Even in this year, the growth is primarily coming

from this segment. This segment is very crowded. It has about 20 models. Elevate will have a distinctive position as it offers a unique shape, interior and exterior, and offers good package as far as comfort and convenience are concerned," he added.
