PRESS RELEASE

RNFI Services receives RBI in-principle authorisation to operate as Payment Aggregator – Physical

Authorisation enables RNFI to offer physical, offline and in-store payment aggregation through its existing network

New Delhi, September 07, 2026: RNFI Services Limited, a last-mile financial infrastructure company, has received in-principle authorisation from the Reserve Bank of India (RBI) to operate as a Payment Aggregator – Physical (PAP)under the Payment and Settlement Systems Act, 2007, a step that will help the Company expand its financial infrastructure.

The authorisation has been granted to RNFI Services Limited, the listed entity, enabling the Company to operate in the physical, offline and in-store payments space, subject to conditions specified by RBI. The Company has disclosed receipt of the in-principle authorisation under Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, with final authorisation to follow upon fulfilment of the applicable requirements within the stipulated timeline. The move adds a new regulated capability to RNFI's payments business while allowing it to build on infrastructure already established across the last mile.

The new capability adds to RNFI's existing portfolio of regulated financial services. The Company currently has capabilities across global money movement through its RBI-authorised FFMC and AD Category-II licence, mutual fund distribution through its AMFI-registered ARN, insurance through its IRDAI-registered insurance broking business, and stored value through its RBI-authorised PPI business. The PA-P authorisation further expands this licence stack into physical payments, allowing RNFI to build another regulated Payments capability on its existing distribution, technology and field infrastructure.

This forms part of RNFI's broader approach of progressively adding regulated financial services to a common infrastructure. The Company has evolved from its foundational payments and assisted-banking businesses to build capabilities across payments, foreign exchange and remittance, insurance, mutual fund distribution and technology led financial services, using its multi-channel distribution layer across different operating models.

Simran Singh, Founder & Chief Strategy Officer, RNFI Services Limited, said:

"We have spent years building the infrastructure to take financial services closer to the last mile. This authorisation allows us to extend that infrastructure into physical payments as a regulated Payment Aggregator. More importantly, it reflects how we see the business evolving: building capabilities that make the same network more useful, and bringing more financial services onto it over time. RNFI remains committed to being instrumental in driving digital adoption among both underserved and unserved customers and merchants"

RNFI's multi-channel distribution layer brings together freelance and independent workers, distributors, partners and the Company's own employees. This enables multiple financial services to be delivered through a common network, supported by the Company's technology and field operations.

About RNFI Services Limited

RNFI Services Limited is a last-mile financial infrastructure company that delivers financial-services connectivity to under-served markets across the country through a unified, multi-channel distribution layer, common technology and a regulated, licence-driven group.

Founded in 2015 and listed on NSE Emerge in 2024, RNFI has evolved from its foundational payments and assisted-banking businesses into a multi-service financial infrastructure platform, with capabilities spanning payments, foreign exchange and remittance, insurance, mutual fund distribution and technology-led financial services.

The Company's common distribution network brings together independent workers, distributors, partners and its own employees, enabling multiple financial services to be offered through the same underlying infrastructure. Relipay is a brand of RNFI Services Limited.
