Rolta Acquires Public Safety Company to Enhance its Homeland Security and Emergency Response Solutions

Mumbai: Rolta announced today that it has acquired the public safety and emergency response company ACLS Systems, FZC through complete asset purchase. This acquisition includes acquiring the full portfolio of ACLS software technology including source code, design documentation, IPR rights and all other related materials, along with exclusive world-wide sales and marketing rights and the hiring of ACLS employees onto the Rolta Team.

ACLS software solutions are deployed and field proven homeland security applications for Computer Aided Dispatch ("CAD"), Mobile and emergency response needs. These solutions have been successfully deployed by numerous organizations for managing multi-agency responders including police, fire-brigade and ambulance services. ACLS software is noted for its ease of use, adaptability to client specific requirements and reliability in supporting first responders in dispatch centers and in the field.

Over the past few years, Rolta has established a robust product development organization which has successfully developed numerous high-tech solutions for defense, homeland security, process, power, utilities, government, telecommunications and commercial markets. Acquisition of these technologies further strengthens Rolta's comprehensive solutions that are used to provide public safety, emergency communication and response to situational awareness. These technologies are essential to the daily operations required for police, fire and ambulance services. Further, they become critical when faced with the challenges of natural disasters, terrorist activities and emergency situations.

By integrating this software with the rich and extensive repository of Rolta IPRs and by leveraging Rolta Maritime Security Solutions, the company is now able to comprehensively address the needs of security agencies in an integrated manner for home land and maritime security applications. Rolta's solutions cover intelligence gathering, surveillance, and emergency response through presentation of a "Common Operating Picture" to help in ensuring coordinated effort by all agencies.

Mr. K.K. Singh, Chairman and CEO of Rolta said "Rolta's Homeland Security Solutions provide users with a highly configurable, security-based, situation-awareness platform, which allows security operations personnel, command and control centers, intelligence analysts and others to collaboratively interpret information and make well informed actionable recommendations. Our customers in this segment will indeed benefit from this acquisition as we work to make our world more secure and safe."

About Rolta: **Rolta is a leading provider of innovative IT solutions for many vertical segments, including Utilities, Governments, Transportation, Process, Power, Banking and Insurance. These enterprise level solutions are built around Rolta's intellectual property and domain expertise to offer unique business intelligence for impactful insights for effective decision making. Rolta's solutions framework includes Geospatial Fusion™, a suite to integrate disparate spatial and business data; Rolta OneView™, a BI solution for operational excellence; and Rolta iPerspective™, a unique platform for SOA and "Cloud" enablement. Rolta's intellectual property repository contains cutting-edge software for mapping and earth sciences, providing the foundation for Defense and Homeland Security solutions including C4ISTAR information systems, Military Communications, Digital Soldier, and Vehicle Systems. Rolta is a multinational organization headquartered in India, which has executed projects in over 40 countries. Rolta has a countrywide infrastructure and international subsidiaries across the globe. Forbes Global ranked Rolta amongst the "Best 200 under a Billion" four times in six years. The Company is listed on the Bombay Stock Exchange and National Stock Exchange in cash and F&O segment, and forms part of various indices on BSE/NSE. The Company's GDRs are listed on the Main Board of London Stock Exchange and its FCCBs are listed on the Singapore Stock Exchange.**
