Press Release
24 June, 2013

Rolta Announces Three Rapid-Deployment Solutions Based on SAP® Software

Mumbai, Rolta, a SAP software solution and technology partner, today announced three rapid-deployment solution modules of the Rolta OneView™ suite for the Process Manufacturing and Utility industries, enabling companies to get up and running faster and more efficiently.

Rolta OneView Operations Insights, Asset Insights and Maintenance & Reliability Insights modules combine SAP software and content with software and services from Rolta for a pre-configured solution that delivers sophisticated Business Intelligence capabilities to operations managers, reducing risks and helping clients achieve benefits quickly and affordably. Rolta will rapidly install these OneView rapid-deployment modules within predetermined time, cost and service scope. Rolta OneView brings together SAP and non-SAP data sources, and when used with the SAP HANA® platform, provides operational data insights previously unavailable due to an enterprise's vast data volumes.

"With these new rapid-deployment solutions from Rolta, clients can expect to receive thoughtful guidance, rapid deployment for improved time to value, and industry-leading ROI," said Preetha Pulusani, president, Rolta Americas. "Customers will now have ready access to these solutions also through the vast SAP sales channels, thus enabling our clients to experience high success rates quickly."

Rapid-deployment solutions are typically ready-to-use combinations of best-in-class, pre-configured software, packaged with fixed-price implementation services, content and end-user enablement that have been specifically tailored to industries or line-of-business needs, delivered in weeks. They are designed to offer a quick, cost-effective method for standardizing processes and adopting the latest innovations with fewer migration risks. The average timeframe for a typical deployment is eight weeks or less, which helps customers lower the cost of implementation and speed time to value, while retaining the flexibility to extend the solution according to individual needs.

Rolta OneView rapid-deployment solutions help Process Manufacturing and Utility customers leverage their technology investments for a consolidated view of their SAP and non-SAP operational systems. Rolta OneView enables customers to see operational benefits in the areas of increased asset availability and safety, and reduced energy and maintenance costs, while tracking and coordinating production and inventory for better customer service levels. The rapid-deployment solution modules of Rolta OneView can be integrated with other modules in the suite to provide benefits in areas such as Health, Safety & Environment, turn-around cost control and supply chain management.

About Rolta: Rolta is a leading provider of innovative IT solutions for many vertical segments, including Federal and State Governments, Defense/HLS, Utilities, Process, Power, Financial Services, Manufacturing, Retail, and Healthcare. By uniquely combining its expertise in the IT, Engineering and Geospatial domains, Rolta develops exceptional solutions for these segments. The Company leverages its industry-specific know-how, rich repository of intellectual property that spans photogrammetry, image processing, geospatial applications, business intelligence, analytics, field-proven solution frameworks, and deep expertise in cutting-edge technologies like Geo BI, Cloud computing, Software Defined Infrastructure and Big Data for providing sophisticated enterprise-level integrated solutions. Rolta is a multinational organization headquartered in India. The Company operates from 40 locations worldwide through its subsidiaries, and has executed projects in over 45 countries. The Company benchmarks its quality processes to the world's best standards, like successful assessment for Software Application Development and Maintenance at the highest Level 5 of SEI's CMMI® version 1.3. Rolta is listed on the Bombay Stock Exchange & National Stock Exchange, and forms part of various indices on BSE/NSE in India. The Company's GDRs are listed on the Main Board of London Stock Exchange. The Company's 'Senior Notes' are listed on Singapore Stock Exchange.

SAP, SAP HANA and all SAP logos are trademarks or registered trademarks of SAP AG in Germany and in several other countries. All other product and service names mentioned are the trademarks of their respective companies.
