Rolta Wins 13 million Dollar Contract for Engineering Systems

Mumbai: Rolta announced today that it has received additional 13 million dollar contract for Engineering Information Asset Solution it has designed, developed and deployed for one of the world's largest petrochemical complexes.

Rolta has leveraged its world class capabilities in engineering work processes, application systems, information technology and systems integration to design, develop and deploy this robust Engineering Information Asset Solution. The solution also contains the integration of key engineering systems and information to support the complex work processes required by engineering studies, projects and management of change for as-built facilities.

During this new phase of work, Rolta will load the system with engineering data, documents and drawings which provide the critical technical engineering information required to operate the plant. The multifaceted project requires Rolta's in depth understanding of complex engineering metadata and tags to populate the system with engineering data that has been received from EPCs around the world. The project is being managed by a global Rolta team working out of the United States, India and the Middle East.

"Rolta understands the critical nature of engineering systems and recognizes that engineering data is the life blood of any plant," said Mr. K. K. Singh, Chairman and CEO of Rolta. "Rolta is recognized for its significant expertise in managing the complexities involved in the effective loading of Engineering Information Asset Solutions. We are pleased to have the opportunity to make a significant contribution to this important project."

About Rolta:

Rolta is a leading provider of innovative IT solutions for many vertical segments, including Federal and State Governments, Defense, Homeland Security, Utilities, Oil & Gas, Financial Services, Manufacturing, Retail, and Healthcare. By uniquely combining its expertise in the IT, Engineering and Geospatial domains, Rolta develops exceptional solutions for these segments. The Company leverages its industry-specific know-how, rich repository of field-proven intellectual property that spans photogrammetry, image processing, geospatial applications, Business Intelligence, Big Data analytics, Cloud computing, and Software Defined Infrastructure for providing sophisticated enterprise-level integrated solutions. Rolta is a multinational organization headquartered in India. The Company operates from 40 locations worldwide through its subsidiaries, and has executed projects in over 45 countries. Rolta is listed on the Bombay Stock Exchange and National Stock Exchange in India. The Company's GDRs are listed on the Main Board of London Stock Exchange. The Company's 'Senior Notes' are listed on Singapore Stock Exchange.
