US team to visit India to finalise interim trade pact

New Delhi: A US team is visiting India from June 1-4 to discuss finalisation of the details for the interim trade pact and take forward negotiations under the broader bilateral trade agreement (BTA), said the Commerce Ministry on Wednesday. The US team will be led by its chief negotiator Brendan Lynch. The two sides are "in agreement to finalise the details of the interim agreement and take forward the negotiations under the broader BTA on multiple areas such as market access, non-tariff measures, customs and trade facilitation, investment promotion and economic security alignment", it said. On February 7, India and the US issued a joint statement finalising the contours of the BTA or an interim trade agreement. Now, both sides will have to finalise the legal text for that deal.

'Coal gasification push a structural shift for CIL'

ALL FIRED UP. With adequate coal available, the company is geared up to meet summer demand: Chairman and Managing Director B Sairam

bl interview

Mithun Dasgupta
Kolkata

Coal behemoth Coal India Ltd (CIL), in pursuit of coal gasification, is making a structural shift from being primarily a producer and supplier to a coal-to-chemicals and cleaner fuel integrated energy producer, says its Chairman and Managing Director B Sairam.

He said the company expects e-auction premiums to be between 40 and 45 per cent if the demand persists. The high prices of imported coal may contribute to increased premium this fiscal, he added.

You emphasised that increased coal production and improved quality supplies are the company's core functional areas in meeting the energy demand of the country. What is Coal India's production and supply target for this fiscal?

We are strengthening our coal evacuation infra through first mile connectivity projects and a rail corridor

B SAIRAM
Chairman and Managing Director,
Coal India Ltd

Yes, these twin commitments remain firm in our corporate ethos. After evaluating the anticipated demand from both the power and non-power sectors, the production target is pegged at 81.5 million tonnes (mt), while the supply target is set at 850mt. Supply or offtake lists high among our key priorities followed by the production.

Coal supplies are hogan at the top because we began FY27 with around 130 mt of coal stock at our pitheads, which was 17 per cent of our entire output of 768 mt in FY26.

Liquidation of this inventory is our major operational

focus. Our effort is to progressively moderate the inventory levels towards more optimal levels of around 10 per cent of the total production, or around 70 mt.

Therefore, the emphasis is now on more efficient synchronisation between production and evacuation. We are consciously making efforts to place fresh coal into the market and move towards a more demand-aligned produce-and-sell approach, rather than prolonged stocking before sale.

With this change in approach, would the company need to realign its mining activity?

This approach does not entail any change in our mining operations. We will, to the extent possible, sell fresh coal in the market, so our approach of production will be in consonance with the offtake.

As per demand we will produce so that some threshold levels of stock will always be there. Because we have to be ready to make good of the pertinent demand. Sometimes logistic and mining disruptions occur in the supply chain. What we are doing is we are liquidating our stock in FY27 so that we will maintain stock to a certain threshold level to keep some buffer.

What will CIL play to boost gasification to channel domestic coal into cleaner industrial uses?

For the company, the gasification push represents a structural shift from being primarily a coal producer and supplier to emerging as a coal-to-chemicals and cleaner fuel integrated energy producer.

feedstock and natural gas. In this, our company is synergising its coal gasification efforts with three major CPSEs — BHEL, GAIL and BPCL.

The centrepiece of this push is a coal gasification-based ammonium nitrate project of 6.6 lakh tonnes per annum capacity at Lakhapur under our Odisha-based subsidiary, Mahanadi Coalfields. This project, at around ₹25,000 crore, is being developed through Bharat Coal Gasification and Chemicals Ltd, which is a joint venture between Coal India and BHEL. This is CIL's first commercial scale downstream coal gasification venture.

Alongside, CIL is pursuing two coal-to-synthetic natural gas (SNG) projects, each with 633 million normal cubic metres per annum capacity, aimed at supplying cleaner fuel to fertilizer units and industrial consumers.

One is being planned in Bardhaman, West Bengal, through JV with GAIL under Coal Gas India Ltd, at an estimated investment of ₹13,000 crore. The second SNG facility is being planned

at Chandrapur in Maharashtra with BPCL, at a capital outlay of around ₹12,200 crore. When commissioned, the three mega facilities could anchor India's coal-to-chemicals ecosystem and reshape the country's vast coal reserves while supporting energy security and industrial growth.

The e-auction price of coal increased 51 per cent over the notified prices in April. However, the quantity allocated through the e-auction decreased 11.64 per cent on a month-on-month basis. What is the outlook going forward?

Last financial year was an aberration for coal demand. Moderated summer temperatures and heavy rainfall were the principal causes for lukewarm demand. This led to our e-auction premiums settling down at 38 per cent. With the onset of summer demand, the power sector is consuming increased volumes of coal. So, going forward in the current financial year, we expect the e-auction premiums (add-ons

over notified price) to be between 40 and 45 per cent if the demand continues at the similar trend. Imported coal prices, which are currently high, hold a sway over our e-auction premiums. This may contribute to increased premiums this year if the imported prices continue to hold at higher levels. E-auction volumes and premiums are driven by the market demand dynamics, and we shall offer adequate quantities through the auction window.

What are the company's plans to meet the peak summer season demand?

With adequate coal available, the company is geared up to meet the summer demand. Coal stock at domestic coal-based power plants is around 48 mt. Coal inventories at our pitheads are at around 113 mt. Further, 50 mt of in-situ coal within mines is ready for extraction and supply if the demand necessitates. We are also strengthening our coal evacuation infra through first mile connectivity projects and a rail corridor.

'India better positioned to offer RE for data centres'

Rishi Ranjan Kala
New Delhi

India, with the world's third-largest renewable energy (RE) installed capacity and expanding transmission infrastructure, is most suited to offer green energy to operate data centres in South and South-East Asia (S&SEA). Moody's Ratings, in a report on South and South-East Asia (S&SEA), which is among the fastest-growing data centre markets globally, expects regional capacity to double by 2030, but the pace and distribution of growth will increasingly depend on power availability, grid stability and execution capability.

INDIA GROWTH STORY
S&SEA accounts for over 3.5 GW of operational data centre capacity, which will double by 2030. Growth is shifting to India and Indonesia to serve rapidly expanding domestic demand, it added.

sending data centre markets globally and overwhelmingly dominates the South Asian landscape, accounting for more than 90 per cent of installed capacity in the sub-region workloads.

INFRA INVESTORS
Installed capacity is estimated around 1.2 GW of IT load, with a broadly similar pipeline under construction or announced, reflecting sustained commitments from global hyperscalers and infrastructure investors.

Power availability is the main constraint on data centre capacity expansion. In S&SEA, Malaysia and India benefit from available power and transmission, supporting rapid scaling to capacity. "Less than 2 per cent of generation capacity in India was used to meet data centre demand, while energy consumed by the sector was less than 1 per cent of the market total. Even if data centre capacity were to grow at the upper end of the range contemplated by market parti-

cipants to 9 GW by 2032, energy consumed will likely remain below 5 per cent of market at that point," said Moody's Ratings. This is due to the robust growth expect-

ed from other parts of the economy, as well as the substantial size of India's power market, with over 520 GW of installed capacity at the end of March 2026.

Govt to begin formal marketing for \$1b LIC stake sale next month

Blomberg

The government is likely to begin formal marketing next month for a planned share

sale in the Life Insurance Corporation of India, which could raise as much as \$1 billion, according to people familiar with the matter.

The government plans to sell a stake of about 2 per cent in the insurer in late June or early July to institutional investors. The Department of Investment and Public Asset Management is

working with Goldman Sachs Group, Mottish Oswal Investment Advisors, BNP Paribas and IIFL Capital Services to manage the transaction, the people said.

NOTES:

- The above is an extract of the detailed format of Quarterly Financial Results filed with the Stock Exchanges under Regulation 33 of the SEBI (Listing Obligations and Disclosures Requirements) Regulations, 2015. The full format of the Quarterly Financial Results are available on the Websites of the Stock Exchanges and on the Company's Website (www.rubfila.com).
- The above Audited Standalone / consolidated financial results have been prepared in accordance with Indian Accounting Standards (Ind AS) prescribed under section 133 of the Companies Act, 2013 read with relevant rules thereunder and in accordance with the Regulation 33 of the SEBI (Listing Obligations and Disclosures Requirements) Regulations, 2015 (as amended) and Ind AS (Circular dated 5 July 2016).
- The Consolidated financial results of the year ended 31.03.2026 includes the financial results of its wholly owned subsidiary M's Premier Tissues India Limited.
- The company's reportable business segments are "Latex Rubber Thread" and "Comigated Carbon Box" and its subsidiary has one reportable business segment viz "Paper Tissue". The Group publishes the standalone financial results along with the consolidated financial results.
- The number of Investor Complaints pending at the beginning of the quarter was nil, one complaint was received and resolved during the quarter and no complaints were pending at the end of the quarter.
- The above audited standalone and consolidated financial results for the year ended 31st March 2026 were reviewed and recommended by the audit committee and approved by the Board of Directors at their respective meetings held on 26th May 2026 and the auditors have issued a modified opinion on the same.
- The Board of Directors have recommended a final dividend of Rs 2 per share (40%) for the year ended 31.03.2026 subject to the approval of the members in the ensuing Annual General Meeting.
- The figures for the quarters ended 31st March 2026 and 31st March 2025 are the balancing figures between audited figures in respect of the full financial year upto 31st March 2026 and 31st March 2025 respectively and the unaudited previous year to date figures upto 31st December 2025 and 31st December 2024 respectively, being the date of the end of the third quarter of the respective financial years, which were subjected to limited review.
- On November 21, 2025, the Government of India notified the four Labour Codes - the Code on Wages, 2019, the Industrial Relations Code, 2020, the Code on Social Security, 2020 and the Occupational Safety, Health and Working Conditions Code, 2020 - replacing 28 existing labour laws, collectively referred to as the 'New Labour Codes'. The Group has assessed the incremental financial impact if any, due to these changes, taking into consideration the best information available under the FAQs released by the Ministry of Labour & Employment and the Institute of Chartered Accountants of India. Considering the materiality and non-recurring nature of this impact, the Group has no incremental changes in the standalone and consolidated financial results for the quarter and year ended March 31, 2026, respectively. The Group continues to monitor developments on the lines to be notified by regulatory authorities, including clarifications/additional guidance from authorities and will continue to assess the accounting implications basis such developments and regulatory authority if any.

Notes:

- The above Standalone and Consolidated financial results of the Company were reviewed by the Audit Committee and approved by the Board of Directors at their respective meetings held on May 27, 2026.
- These Standalone Financial results of the Company have been prepared in accordance with the recognition and measurement principles of applicable Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended) as specified in section 133 of the companies Act, 2013.
- The Board of Directors have recommended a final dividend of ₹ 6/- (80%) per Equity Share of ₹ 11/- each, out of the profits of the Company, for the year ended March 31, 2026, subject to approval of Shareholders in the Annual General Meeting of the Company.
- In terms of SEBI Circular CIR/CFD/CMD/66 dated May 27, 2016, the Company hereby declares that the auditors have issued audit reports both for standalone and consolidated financial results with an unmodified opinion for the quarter and year ended March 31, 2026.
- The above is an extract of the detailed format of Financial Results filed with the Stock Exchanges under Regulation 33 of the SEBI (Listing Obligations and Disclosures Requirements) Regulations, 2015. The full format of the Financial Results are available on the Stock Exchange website, www.bseindia.com, www.nseindia.com and on the Company's website www.isgect.com. The same can be accessed by scanning the QR code provided below.
- The results for the quarter ended March 31, 2026 and March 31, 2025 are the balancing figures between audited figures in respect of the full financial year ended March 31, 2026 and March 31, 2025 respectively and published unaudited year to date figures upto the third quarter of the respective financial year ended, the figures upto the end of third quarter of the current as well as previous financial year are not only reviewed and not audited.
- The Government of India has consolidated 29 existing labour legislations into a unified framework comprising four labour codes. The Codes have been made effective from November 21, 2025. The New Labour Codes have resulted in limited one time increase in provision for employee benefits of the Group of ₹ 1,640 lakhs on the basis of actuarial valuation and consistent with the guidelines provided by the Institute of Chartered Accountants of India and the same has been recognized as an exceptional item, in the current reporting period. The Group continues to monitor the finalisation of Central State rules and clarification from the Government on other aspects of the labour codes, and would provide appropriate accounting effect as and when such clarifications are received.
- Ispec Investments Private Limited, Singapore (IPL), a wholly owned subsidiary of the Company, had entered into a Sale and Purchase Agreement (SPA) with a Buyer in the month of December 2024 to sell its entire shareholding in its wholly owned subsidiary "Stone Energy Holdings One, Cayman Islands". As the buyer failed to make requisite payment, the above SPA was rescinded on September 15, 2025. As a result, in view of prevailing international geo-political scenario, IPL does not foresee an active buyer for the above transaction in immediate future. Accordingly, it is classified as discontinued operations.
- (a) The operations of Stone Energy Holdings One have been reclassified from discontinued operations to continuing operations.
- (b) The depreciation and amortisation expenses not charged in prior periods, has been chargeable in respective periods.
- (c) The assets and liabilities previously classified as held for Sale have been reclassified to respective line items.
- (d) The figures for the corresponding previous periods have been regrouped, wherever necessary, to make them comparable.
