BUSINESS RESPONSIBILITY & SUSTAINABILITY REPORTING (BRSR) (CONTD.)

Remarks: The number of customer complaints mentioned in this table in the current financial year 2023-24 pertains to the Laminate and MDF Business. The Company has taken effective steps to reduce the number of complaints where 85% have been resolved and the remaining 15% are in the process of being resolved. We take our customer complaints seriously and strongly apply our grievance redressal policy. The grievance redressal policy can be found at this link - https://rushil.com/admin/uploads/investors_pdf/codes_policies/Whistle_Blower_Policy.51.pdf.

VII- 26. Overview of the entity's material responsible business conduct issues.

Please indicate material responsible business conduct and sustainability issues pertaining to environmental and social matters that present a risk or an opportunity to your business, rationale for identifying the same, approach to adapt or mitigate the risk along-with its financial implications, as per the following format.

Sr. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
1.	Customer delight	Opportunity	Customer Relationship Management (CRM) plays a significant part in any business. It aids in improving customer satisfaction and retention rates and helps us better understand our customers.	We have comprehensive CRM practices and a strong customer loyalty program. There is strong engagement with our customers through diverse channels viz websites, email, and social media.	Positive
2	Sustainability supply chain	Opportunity	Businesses are under increased pressure from investors, customers, and authorities to lower environmental, social and governance (ESG) risk exposures in their supply chains.	At Rushil Décor Limited, we see it as an opportunity to integrate the ESG aspect in our supply chain which can effectively reduce the overall risk. From supplier / vendor diversification to sustainable sourcing we have taken huge strides in the supply chain management. We ensure sustainable sourcing for our operations which promotes the development of local communities, generates job opportunities, streamlines transportation, and has a major impact in reducing carbon dioxide emissions. Close to 60% of our sourcing is done from domestic vendors and producers.	Positive
3.	Brand, reputation, and communication	Opportunity	Brand reputation is crucial in the business as it directly impacts the level of trust and loyalty customers have towards the brand. Effective communication is key in building and maintaining a strong brand reputation in the business. This includes clear and consistent messaging across all channels such as websites, social media, and customer interactions.	Our different brands have marked their presence at the world level and as one of the leading brands in the industry especially in the MDF and Laminates segment. Our brands like "VIR LAMINATE", "VIR MDF", "VIR PVC", and "VIR STUDDIO" apart from others have highly reputed brand values in their respective segments. We have comprehensive engagement and communication with our customers. At every point, right from reservations, we adopt a customer first approach. We actively listen and respond to customer feedback in a timely and professional manner.	Positive

Sr. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
4	Climate change, energy, and emissions	Risk / Opportunity	Climate change poses a significant risk on the wood business sector because Agro Forestry wood is prime raw material in the MDF Product. In the same way, paper is the main raw material for the Laminated Sheet Business. Furthermore, the industry may also face additional costs to adapt to these changes. Our commercial activities incur significant overhead expenditures with energy being one of them. A proper energy management system with renewable energy integration is pivotal for the Company to reduce operational energy cost and carbon footprint.	Being cognisant of the potential risk due to climate change, the Company is involved in Agro Forestry and mechanism for sustainable development. Further we have systems to track and minimise energy consumption in our factories/plants.	Negative / Positive
5	Talent management and retention	Risk	Overall, effective talent management is crucial in mitigating the risks associated with managing human capital. Failing to attract and retain employees by providing them rewarding careers may lead to loss of skillful employees in an organisation.	We carry out assessment to assess potential in personnel and determine roles and leadership responsibilities. Through various processes we aim to identify and build a strong leadership pipeline at every stage, developing talent through robust development journeys. Following are the two key talent processes: (1) Leadership Assessment and Development for identification and development of future Leaders, and (2) Talent Identification and Development Initiative (TIDI) for identification and development of high potential Heads of Department (HoDs). Dialog is an annual career conversation process which enables structured focused conversations that incorporate constructive feedback and set a development plan for the year ahead. Frequent Email Communication(s) is our continuous employee engagement platform which gathers continuous feedback from employees across levels. It provides a mechanism for leaders to hear the voice of our employees thereby promoting trust and transparency.	Negative

EI-2.a. Does the entity have procedures in place for sustainable sourcing? (Yes/No)

Yes

EI-2.b. If yes, what percentage of inputs were sourced sustainably?-

In respect of MDF Products, we procured 100% from Agro Forestry Plantations which is sustainable sourcing. The Company's main focus is on local procurement of material that aligns with its commitment to sustainable and responsible business practices. By purchasing main raw materials such as agro forestry woods, resin, formaldehyde etc. locally the Company is benefiting from the lesser transportation costs, shorter lead times, and better availability of materials. This not only helps in optimizing costs but also enables the Company to respond more quickly to market demands and ensure a resilient supply chain. Further, purchase of raw material locally supports the local economy and community by fostering partnerships with local vendors and promoting regional economic development.

EI-3. Describe the processes in place to safely reclaim your products for reusing, recycling and disposing at the end of life, for (a) Plastics (including packaging) (b) E-waste (c) Hazardous waste and (d) other waste.

Considering the type and nature of our product, their long-term use by our end users (sometimes more than decades), and the wide geographical spread of our product use, it is practically not possible to reclaim our end products for reusing, recycling, or disposal at the end of life. However, where we can, we have taken steps to safely recycle and dispose off waste generated in our production processes. All the manufacturing units follow regional pollution control board guidelines

BUSINESS RESPONSIBILITY & SUSTAINABILITY REPORTING (BRSR) (CONTD.)

efficiently, normal waste we are submitting to PCB authorised recycler and co-processor where hazardous waste disposing at authorised TSDF site recommended by regional pollution control board respectively.

Summary of these steps are:

- Water used in the production process are re-used in other resin production,
- Packaging material, paper wrapping, and BOPP (plastic) used in production is re-sold to entities registered with Pollution Control Boards to make other products and to authorised recyclers.
- Waste generated is given to the Pollution Control Board’s authorised recycler and co-processor,
- Hazardous waste is disposed off at authorised TSDF site recommended by the Pollution Control Board
- Containers that are discarded are stored in a designated shed in a secure manner and handed over to the Pollution Control Board’s authorised recyclers
- Used oil is collected in leak proof containers and disposed off through re-processors authorised by the Pollution Control Board.
- ETP sludge is stored in a secure and scientific manner and then handed over to the Pollution Control Board’s authorised incinerators.
- Wood dust and wood chips coming out as waste from the manufacturing process are re-used in the manufacturing process.

EI-4. Whether Extended Producer Responsibility (EPR) is applicable to the entity’s activities (Yes / No). If yes, whether the waste collection plan is in line with the Extended Producer Responsibility (EPR) plan submitted to Pollution Control Boards? If not, provide steps taken to address the same.

Yes. The Company has designed quality products to minimise the amount of waste. The Company has also designed the waste management plan in such a way that minimum wastage will be generated at every stage of the product. The Company ensures appropriate disposal of waste through registered vendors and the waste management plan is aligned with the Extended Producer Responsibility Plan.

Hazard identification and risk assessment processes, including incident management systems, are in place to identify work-related hazards and assess risks on routine and non-routine basis. We undertake risk assessment through the following steps, 1. Identify the risk 2. Undertake risk analysis, and 3. Undertake risk evaluation by using 'What – If' Analysis, Fault Tree Analysis, and Incident Bow.

EI-10.c. Whether you have processes for workers to report the work related hazards and to remove themselves from such risks. (Y/N)

Yes. We have a SOP within our Safety and Health Programs for workers to report the work-related hazards or any unsafe conditions or acts. We treat hazard reporting as very important for the safety of our workplace. We are educating our workers on a regular basis regarding this. The workers should communicate in writing to their immediate supervisor in the prescribed format. Simultaneously both workers and supervisors will inspect, investigate, and collect the existing information about the work-related hazards. After the investigation the concerned supervisor will resolve the hazard immediately or assign it to appropriate personnel and department to resolve. Accordingly corrective and preventive actions as deemed necessary will be implemented. After resolving the hazard, a Resolution Report will be prepared, tabled with the appropriate authority in the Company, and filed for future reference.
