Norms to move stocks under ASM get stricter

Sebi, exchanges' move likely to bring more stocks under surveillance

SHRIMI CHOUDHARY
Mumbai, 25 June

In a bid to further improve the risk management system, the Securities and Exchange Board of India (Sebi) and bourses have tightened rules for putting stocks under the 'additional surveillance mechanism'.

The new rules also consider a stock's valuation, price to earnings ratio, client concentration and gyrations in the stock price over a period of one month and one year.

Market experts said the new criteria could result in ASM being imposed in more stocks. Stocks under ASM are allowed to trade only in a five per cent band and leveraging is barred. A few weeks ago, the NSE and BSE had moved 109 stocks to ASM following which some stocks had seen a huge correction in their prices.

The new criteria for ASM was set following a joint meeting of exchanges, Sebi and clearing corporations.

The new rules also consider a stock's valuation—price to earnings ratio, client concentration and gyrations in the stock price over a period of one month and one year

per cent or more in the last three months and concentration of top 25 clients in the last three months is 30 per cent or more.

Also, it includes scrips where the close-to-close price variation in the last 30 trading days is 100 per cent or more and P/E is negative.

Interestingly, the new ASM rules exclude public sector enterprises (PSEs) and public sector banks.

According to the new rule, while calculating client margins, a possible rise in the security will also be considered. Until now, the margin was calculated assuming a potential 20 per cent fall in the security and possible loss arising due to such fall. ASM calculation will also involve a potential rally of 17.74 per cent in the index.

The new ASM framework will be reviewed every two months, based on parameters such as number of price band hits, close-to-close price variation, price to earnings (P/E) ratio and high-low price variation.

Further, selection under the ASM framework will include stocks where the high-low price variation is 200

per cent or more in the last three months and concentration of top 25 clients in the last three months is 30 per cent or more.

After a month, scrips with P/E ratio greater than 100 will be placed in the trade-for-trade segment.

"Scrips having P/E ratio of less than 10 will be moved out of the ASM framework and closing price will become the base price for subsequent reviews," the circular issued by exchanges said.

According to exchanges, the rules will not be applicable to stocks that are already under the so-called graded surveillance measure (GSM). The exchange will soon come out with the effective date for implementation of the new surveillance mechanism.

P-note investments slump to nine-year low

PRESS TRUST OF INDIA
New Delhi, 25 June

Investments through participatory notes into Indian capital markets plunged to over 9-year low of more than ₹900 billion at the end of May amid stringent norms put in place by the Sebi to check the misuse of these instruments.

P-notes are issued by registered foreign portfolio investors

(FPIs) to overseas investors who wish to be part of the Indian stock markets without registering themselves directly. They, however, need to go through a proper due diligence process.

According to the Sebi data, the total value of P-note investments in Indian markets—equity, debt, and derivatives—slumped to a low of ₹934.97 billion at May-end from ₹1002.45 billion in the end of

April. Prior to that, the figure was ₹1,064.03 billion.

This is the lowest level since April 2009, when the cumulative value of such investments stood at ₹723.14 billion. Of the total investments made last month, P-note holdings in equities were at ₹704.42 billion and the remaining in debt and derivatives markets.

Decides, the quantum of FPI investments via P-notes

dropped to 2.9 per cent during the period under review from 3 per cent in the preceding month. P-note investments were on a decline since June last year and hit an over eight-year low in September. However, these investments rose slightly in October but fell again in November and the trend continued till May this year.

The decline could be attributed to several measures taken

by the market watchdog to stop the misuse of the controversially-ridden participatory notes.

In July 2017, Sebi had notified stricter norms stipulating a fee of \$1,000 on each instrument to check any misuse for channelising black money. It had also prohibited FPIs from issuing such notes where the underlying asset is a derivative, except those which are used for hedging purposes.

Sensex declines amid global risks

BLOOMBERG
Mumbai, 25 June

The benchmark equity index declined on Monday, as global risk aversion kept the market volatile ahead of the expiry of monthly derivatives contracts later this week.

The S&P BSE Sensex fell 0.6 per cent to 35,470.35 at the close in Mumbai, with Tata Motors and ICIICI Bank the worst performers. A gauge of stock-market volatility rose to the highest level in five weeks. Seventeen of 19 industry sub-indices compiled by BSE declined, led by measures of industrials and oil & gas companies.

"Global uncertainty continues to impact India," said A R Prabhakar, head of research at IDBI Capital Market Services. "This being the week of derivative contract expiry, we're likely to see rangebound trade." Derivatives contracts expire on the last Thursday of every month in India.

Recent selling in NSE Nifty 50 Index 10,800 puts indicate upside can be expected if the measure holds above 10,800 before the expiry, according to ICICI Securities.

The US Treasury Department is planning to heighten scrutiny of Chinese

SENSEX

NIFTY 50

Investments in sensitive US industries under an emergency law, putting Washington's trade war with Beijing on a potentially irreversible course. Under the plan, the White House would declare China's investment in US companies involved in technologies such as new energy vehicles, robotics and aerospace a threat to economic and national security, according to eight people familiar with the plans.

Tata Motors shares slip 6%; m-cap drops by ₹52.83 bn

PRESS TRUST OF INDIA
New Delhi, 25 June

Shares of Tata Motors slipped over 6 per cent on Monday, wiping out ₹52.83 billion from its market valuation amid concerns over auto tariff threat by the US. The stock dropped 5.94 per cent to settle at ₹288.85 on BSE. During the day, it tanked 6.53 per cent to ₹288. On NSE, shares of the company plunged 6.31 per cent to close at ₹288.55. Led by the sharp fall in the stock, the company's market valuation tumbled ₹52.83 billion to ₹336.89 billion.

The stock was the worst hit

among blue chips on both key indices. In terms of equity volume, 13.75 lakh shares of the company were traded on BSE and over 10 lakh shares changed hands on NSE during the day.

US President Donald Trump on Friday threatened to slap a 20 per cent duty on all cars imported from Europe unless the European Union removed its trade barriers and tariffs on dozens of American products which took effect.

Meanwhile, Tata Motors-owned Jaguar Land Rover has lined up investment worth ₹13.5 billion in next three years.
