HfS Recognizes HCL in the "Winner's Circle" for Software Product Engineering Services Outsourcing

Noida, India – 22nd December 2015 – HCL Technologies (HCL), a leading global IT services company, announced today that it has been positioned in the "Winner's Circle" for its software product engineering services capabilities by the leading analyst firm HfS in its report "HfS Blueprint Report: Software Product Engineering Services Outsourcing 2015" authored by Pareekh Jain, Research Director, Engineering Services at HfS Research.

The Report evaluated 13 global service providers of software product development for ISVs (Independent Software Vendors) and internet companies only. The report evaluated the service offerings and capabilities of the providers and mapped them on a number of facets, primarily under two categories - innovation and execution - to help clients select the right vendor for their service needs. The research mapped service providers on their service offerings for software product engineering across design & prototyping, architecture, development & maintenance, performance, migration, product management, value adds and IP business.

HfS recognizes HCL as a leading service provider with strong account management, product development rigor and innovation credentials. "HCL has demonstrated strong delivery capability across the services value chain and across different ISVs and internet companies. HCL started as a product company and has the product development DNA. It has applied product development rigor to its software product engineering practice with accelerators, IPs, and other prebuilt components" said Pareekh Jain, Research Director, Engineering Services at HfS Research.

"The HfS report is a clear testament to the exemplary work that HCL Technologies has been doing for its ISV and online customers for over three decades. With digital and IoT (Internet of Things) opening up new opportunities for the Independent Software Vendor ecosystem, HCL's focus is no longer solely to develop and maintain software products for ISVs. We now intricately support clients in developing and maintaining innovative products and create a sustainable smart ecosystem in almost every industry" said G H Rao, President, Engineering and R&D Services, HCL Technologies.

With an increasing focus on digitalization across organizations, HCL's ISV practice leverages its cross domain expertise to integrate disruptive technologies into a Seamless Digital Experience. HCL ISV has three decades of experience working with over 150 software and internet properties. 7 of the top 10 Independent Software Vendors (ISVs) and online companies today work with HCL across different geographies including North America, Europe and Japan, with diverse expertise spanning various stages of the PDLC from conceptualization to go-to-market. With focus on product and platform engineering through dedicated SLUs (Service Line Units) and by enabling a smart service ecosystem, HCL ISV helps its customers differentiate in the marketplace with its key offerings in the areas of mobility, analytics, security, product testing, performance engineering, payment gateways and multi-channel commerce.

About HCL Technologies

HCL Technologies is a leading global IT services company working with clients in areas that impact and redefine the core of their businesses. Since its emergence on global landscape after its IPO in 1999 and listing in 2000, HCL Technologies, along with its subsidiaries, today operates out of 31 countries and has consolidated revenues of US$ 6.1 billion, as on 30th September 2015 (on LTM basis). HCL focuses on 'transformational outsourcing', underlined by innovation and value creation, offering an integrated portfolio of services including Enterprise Digitalization, Internet of Things, Engineering Services Outsourcing and Next Generation IT Outsourcing that focuses on transformation-led infrastructure services, applications services and business services. HCL leverages its extensive global delivery capabilities and integrated innovation labs across the world to provide holistic, multi-service delivery in key industry verticals including Financial Services, Manufacturing, Telecommunications, Media, Publishing & Entertainment, Retail & CPG, Life sciences & Healthcare, Oil & Gas, Energy & Utilities, Travel, Transportation & Logistics and Government. With 105,000+ professionals from diverse nationalities, HCL Technologies focuses on creating real value for customers by taking 'Relationships Beyond the Contract'.
