PETRONAS AWARDS INR 1,500 CRORE ETP ORDER TO WABAG-MUHIBBAH JV

September 1, 2015 : Malaysia's national oil and gas company, Petroliaam Nasional Berhad (PETRONAS), through one of its wholly-owned subsidiary, today awarded the consortium of VA TECH WABAG LIMITED (WABAG) and Muhibbah Engineering (M) Bhd, a contract for the Design Competition for Re-FEED and Engineering, Procurement, Construction and Commissioning of the Effluent Treatment Plant (ETP) for PETRONAS' Refinery and Petrochemicals Integrated Development (RAPID) project in Pengerang, Johor, Malaysia.

The contract was awarded by PRPC Utilities and Facilities Sdn. Bhd., a subsidiary under the PETRONAS Group of companies.

WABAG is a leading Indian MNC in water and waste water management, and the project will be executed in partnership with Muhibbah Engineering which has vast experiences in construction and infrastructure projects.

The contract value of the ETP is about INR 1,500 crores. The ETP will form part of the RAPID complex at Pengerang, Johor, in southern Malaysia.

The RAPID Project consists of a world scale integrated site which includes refining activities and petrochemicals production. The refinery will have a capacity of 300,000 barrels per day (bpd), while the Steam Cracker's combined annual production is anticipated to be more than 3 million tonnes per annum (mtpa) of ethylene, propylene and C4-C6 olefins products. Products from the refinery and steam cracker will be the feedstock to produce premium differentiated specialty petrochemical products.

RAPID is PETRONAS' largest green-field downstream undertaking in Malaysia, and along with its six major associated facilities, forms the Pengerang Integrated Complex (PIC). The associated facilities are the Pengerang Co-generation Plant, LNG Re-gasification Terminal, Air Separation Unit, Raw Water Supply project, the Liquid Bulk Terminal and the Central and Shared Utilities and Facilities.

The purpose of the Integrated ETP is to reduce the pollution in the aqueous effluents of the RAPID Complex to below the regulatory discharge limits.

Commenting on this significant development, Mr. Rajiv Mittal, Managing Director and Group CEO said, "This prestigious order goes to prove our technological superiority and engineering capabilities in executing world class large and complex industrial water projects both at home and abroad". He further said, "This is our first integrated ETP in the South East Asia in Oil and Gas sector and it is expected to be a landmark project reference and we are happy to win this prestigious contract amidst competition from International players".
