Rolta TUSC Awarded the 2010 Oracle Titan Award for Energy Industry Solution

Mumbai – Rolta TUSC was honored as a recipient of the annual North American Titan Award, for the seventh time, in the Energy Industry Solution category at a ceremony held yesterday during Oracle OpenWorld conference in San Francisco. The Oracle North American Titan Award winners were selected for excellence in solving real-world customer challenges and for their development and deployment of Oracle technology. Rolta TUSC was recognized for its achievement in developing and implementing a Shutdown Cost Control application for the oil and gas industry and its deployment for Chevron to provide visibility into critical cost data at their Pascagoula, Miss. refinery.

Cost control during a refinery's planned shutdown or plant turnaround events, where equipment maintenance is performed for an entire section of a refinery, is a huge challenge. Rolta leveraged its deep Oil and Gas industry knowledge and its Business Intelligence (BI) Process Framework to exploit Oracle Business Intelligence Enterprise Edition toolsets to present critical cost data from the Pascagoula refinery's financial, timesheet, purchase order, work management and Primavera scheduling systems through intuitive dashboards with less than one day's latency to provide actionable insights. At the core behind hundreds of BI solutions, including the energy industry specific Rolta OneView solution, Rolta's BI Process Framework combines proven architectures and processes to ensure success.

"In today's oil market, cost cutting has become an essential means of staying competitive," said John Long, Senior Analyst for Chevron's Pascagoula refinery. "Our cost engineers now have dynamic visibility into cost overruns before they happen, significantly reducing the overall cost of turnaround projects. The tool, which enabled us to realize a return on investment in its first use, has become an integral part of our business processes."

"Rolta TUSC is a premier go-to partner for Oracle in the energy sector – and indeed across all industries - for innovative and high performance solutions," said Tyler Prince, Group Vice President, North America Applications Channel Sales for Oracle. "The implementation at Chevron not only showcases Rolta's expertise with Oracle technology, but also its ability to proactively solve real-world business problems for our joint clients."

"Any company in the midst of a large capital project could benefit from this type of cost intelligence, and other key features of the Rolta OneView solution. It graphically highlights how events are proceeding compared to plan and provides visibility of each cost driver in a way that offers insights and supports proactive decision making," explained Eric Camplin, Vice President for Rolta TUSC. "We're honored to be recognized for our achievement with such a prestigious award."

A featured session at Oracle OpenWorld, Chevron's John Long presented the powerful results of the Rolta TUSC-designed application at a presentation titled, "Leading-Edge Solutions for the Downstream Oil and Gas Industry." For more information on Chevron and Rolta TUSC's participation at this year's conference, please visit: http://www.tusc.com/oracle/news/news_20100810-443.html

About Rolta TUSC

Rolta TUSC, a wholly owned subsidiary of Rolta India Limited, is an experienced and knowledgeable IT partner that provides assessment, implementation, and ongoing support services for mission-critical IT and business systems. Through several strategic acquisitions and a consolidation of our Oracle and Business consulting practices, Rolta TUSC now offers a richer portfolio of solutions and services for the challenging times ahead. With more than twenty years of experience creating and optimizing large-scale IT applications and infrastructure, Rolta-TUSC has the proven expertise required to help clients achieve their business goals through technology. Rolta TUSC is a recipient of seven Titan Awards over the last eight years. For more information, visit www.tusc.com

About Rolta

Rolta is an Indian multinational organization that has executed projects in over 40 countries. The Company is a strong player in the Defense and Homeland Security, Government, and Infrastructure sectors. Rolta serves these markets by providing innovative solutions – Enterprise Geospatial and Defence Solutions (EGDS), Engineering Design and Operation Solutions (EDOS) and Enterprise IT Solutions (EITS). Rolta's EDOS Division along with its joint venture with The Shaw Group Inc. USA, Shaw Rolta Ltd., provides comprehensive Engineering, Procurement and Construction Management (EPCM) services to meet turnkey project requirements of power, oil, gas petrochemical and chemical sectors. The Company's EGDS Division, through a combination of its own IP, innovative R&D and technologies from its joint venture partners like Thales, France (Rolta Thales Ltd.), develops and provides state-of-the-art Defence, Security and Maritime solutions, for example, intricate Command & Control systems, complex Intelligence, Surveillance & Reconnaissance systems, ruggedized Military Communications, integrated Digital Soldier and hi-tech Vehicle systems, covering the entire "sensor to shooter" chain. Rolta's EITS Division addresses high-end requirements like Business Intelligence and Enterprise Applications. The division is focused on developing and upgrading the Company's IP to enhance its value proposition to customers, and strengthening its standing in the market by offering unique technological approaches. Rolta, headquartered in Mumbai, employs

about 4500 professionals with countrywide infrastructure and international subsidiaries across the globe. The Company has benchmarked its quality processes with the world's best quality standards. Rolta is accredited with the prestigious BSI ISO/IEC 27001:2005 certification, the ultimate benchmark for information security; the BSI ISO/IEC 20000-1:2005 IT Service Management Standard; and the Company's software development business group has been assessed at the highest level of SEI-CMM Level 5. Forbes Global has ranked Rolta amongst the "Best 200 under a Billion" four times in six years. Rolta has been included in the S&P Global Challengers List™ by Standard & Poor's. This List identifies 300 mid-size companies worldwide that have shown the highest growth characteristics along dimensions encompassing intrinsic and extrinsic growth. Rolta has been ranked 4th in the Dataquest IDC, Best Employer Survey 2010 in the IT sector. The Company is listed on the NSE in cash and F&O segment and forms part of CNX IT, NIFTY Midcap 50 and CNX 500 indices. The Company is also listed on BSE 'A' group and forms part of BSE Midcap, BSE 200, BSE 500, BSE IT and BSE TECK indices. The Company's GDR is listed on the Main Board of London Stock Exchange and its FCCB's are listed on the Singapore Stock Exchange.

About Oracle PartnerNetwork

Oracle PartnerNetwork (OPN) Specialized is the latest version of Oracle's partner program that provides partners with tools to better develop, sell and implement Oracle solutions. OPN Specialized offers resources to train and support specialized knowledge of Oracle products and solutions and has evolved to recognize Oracle's growing product portfolio, partner base and business opportunity. Key to the latest enhancements to OPN is the ability for partners to differentiate through Specializations. Specializations are achieved through competency development, business results, expertise and proven success. To find out more visit http://www.oracle.com/partners

Ministry of the Environment Wins Award at Showcase Ontario for Rolta OnPoint™ Implementation

Mumbai – Rolta, a global solution provider of innovative information technology solutions, congratulates the Ministry of the Environment (MOE) for winning the "Excellence in Internal Service Delivery" award at the recent Showcase Ontario conference. Rolta OnPoint™ is at the heart of MOE Geomatics Centre's award winning GIS Portal mapping application. The MOE GIS Portal provides the Ministry of the Environment and Government of Ontario staff with one-window access to some 160 environmental datasets relating to air, land and water conditions across the Province. The unique power of the Rolta OnPoint web application is used to simplify the complexity of this integration, leverage the Esri® ArcGIS® Server web platform and spatial data architecture, and provide an online map view that highlights environmental conditions throughout the Province.

Mr. Andy Gemza, IM Coordinator, Source Protection Programs Branch, Ministry of the Environment commented, "This application will enable the Source Protection Programs Branch to thoroughly explore the geospatial relationship between vulnerable areas on the landscape and over 160 datasets describing environmental quality in Ontario. The opportunity for exploration and discovery using the geospatial tools on the 'Portal' is an exciting one and we are looking forward to sharing our Wellhead protection and intake protection zone feature classes to further protect our drinking water and the health and safety of Ontarians."

Mr. Shafik Jiwani, Executive Vice President, Rolta Canada Limited, commented, "We have an exceptional family of clients in Ontario. It is wonderful to see how they are able to leverage our technology to create a wide variety of valuable and productive enterprise mapping applications without the complexity of custom programming. We congratulate the Ontario Ministry of Environment for finding innovative ways to use Rolta's solutions to meet their objectives, and for being recognized for their achievements at Showcase Ontario."
