Sub.: Intimation under Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 – Press Release.

Dear Sir/Madam,

Pursuant to Regulation 30 read with Schedule III of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, we wish to submit a copy of the Press Release issued by Saatvik Green Energy Limited (“the Company”), titled:

“Saatvik Green Energy Limited Secures Order Worth ₹1,041.63 Crore from SECI for Supply of Solar PV Modules”

A copy of the aforesaid Press Release, which is self-explanatory in nature, is enclosed herewith. The Press Release is also available on the Company's website at i.e. <https://saatvikgroup.com>

You are requested to kindly take the above information on your record.

Thanking you,

For **Saatvik Green Energy Limited**
(Formerly known as Saatvik Green Energy Private Limited)

Jyoti Verma
Company Secretary & Compliance Officer

Saatvik Green Energy Limited Secures Order Worth ₹1,041.63 Crore from SECI for Supply of Solar PV Modules

- *Saatvik Green Energy Limited has received and accepted an order from Solar Energy Corporation of India Limited (SECI) for the supply of Solar PV Modules, with an aggregate order value of INR 1,041.63 crores.*
 - *The order is scheduled to be executed by December 2027.*
- *This win further strengthens Saatvik's position as a preferred domestic supplier for large-scale, government-backed solar projects in India.*

New Delhi, 15th September 2026: Saatvik Green Energy Limited today announced that it has been selected by Solar Energy Corporation of India (SECI) as one of the bidders under a tender for the manufacturing, testing, packing, supply, and transportation of domestically manufactured solar PV modules using domestic solar cells. Saatvik has been awarded a 600 MWp capacity package, with an aggregate order value of INR 1,041.63 crores. The order is scheduled to be executed by December 2027.

The order underscores the growing confidence of India's leading government-backed energy institution in Saatvik's manufacturing capabilities, product quality, and execution track record. Saatvik's selection in this tender is a direct validation of the Company's ALMM-compliant manufacturing capabilities and its readiness to serve large-scale government infrastructure projects with domestically sourced solar equipment.

Commenting on the development, Mr. Prashant Mathur, CEO, Saatvik Green Energy Limited, said,

"The 600 MWp order from SECI, under a tender requiring domestically manufactured solar cells, is significant not only for its scale but for what it represents for India's renewable energy ecosystem. It reflects the growing momentum behind domestic manufacturing and the shift towards a more integrated and self-reliant solar value chain an evolution that Saatvik has been strategically building for.

With our 4.86 GW module manufacturing facility in Ambala and our integrated manufacturing expansion in Odisha comprising 2.4 GW of cell and 4 GW of module capacity in Phase I, with a further 3.6 GW of cell capacity proposed in Phase II, we are building the capabilities required to participate meaningfully across the solar manufacturing value chain. As our Odisha cell facility progresses towards ALMM List-II enlistment, we are strengthening our ability to meet evolving domestic-content requirements with greater depth and scale. We see this order as more than a commercial milestone. It is a strong validation of our manufacturing strategy, our execution capabilities and our conviction in building a globally competitive, integrated solar manufacturing platform from India."

This order adds materially to Saatvik's order book and further consolidates the Company's position as a preferred supplier in the utility-scale solar segment. It also aligns with India's push for energy self-sufficiency under the 'Make in India' initiative by driving demand for domestically manufactured solar components.

About Saatvik Green Energy Limited

Saatvik Green Energy Limited is one of India's leading solar photovoltaic module manufacturers, with a strong presence across utility-scale, commercial & industrial, EPC, and distributed solar segments. The Company currently operates a 4.86 GW module manufacturing facility in Ambala, Haryana, and is developing a Greenfield integrated manufacturing facility in Odisha with 4 GW of module capacity and 6 GW of solar cell capacity. With a focus on latest technology, quality, and execution, Saatvik aims to play a meaningful role in India's renewable energy transition.
