Dear Sir/Madam,

Sub.: Investor Presentation

Ref.: Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015

In continuation with our intimation dated November 26, 2024 and pursuant to Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (the "Listing regulations"), we are attaching herewith the Investors Presentation.

The above information will be made available on the website of the Company i.e. <https://sahajsolar.com/>

Kindly take the same on your record.

Thanking you,

Yours faithfully,

For Sahaj Solar Limited

**Kanaksinh Gohil
Director

This document does not constitute or form part of and should not be construed as a prospectus, offering circular or offering memorandum or an offer to sell or issue or the solicitation of an offer to buy or acquire securities of the Company any of its subsidiaries or affiliates in any jurisdiction or as an inducement to enter into investment activity. No part of this document, nor the fact of its distribution, should form the basis of, or be relied on in connection with, any contract or commitment or investment decision whatsoever. This document is not financial, legal, tax or other product advice.

This presentation should not be considered as a recommendation to any investor to subscribe for, or purchase, any securities of the Company and should not be used as a basis for any investment decision. This document has been prepared by the Company based on information available to them for selected recipients for information purposes only and does not constitute a recommendation regarding any securities of the Company. The information contained herein has not been independently verified. No representation, warranty or undertaking, express or implied, is made as to, and no reliance should be placed on, the fairness, accuracy, completeness or correctness of the information or the opinions contained herein. None of the Company or any of its affiliates, advisors or representatives shall have any liability whatsoever (in negligence or otherwise) for any loss whatsoever arising from any use of this document or its contents or otherwise arise in connection with the document. Furthermore, no person is authorized to give any information or make any representation, which is not contained in, or is inconsistent with, this presentation. Any such extraneous or inconsistent information representation, if given or made, should not be relied upon as having been authorized by or on behalf of the Company.

The Company may alter, modify or otherwise change in any manner the contents of this presentation, without obligation to notify any person of such revision or changes. This document is given solely for your information and for your use may not be retained by you nor may this document, or any portion thereof, be shared, copied, reproduced or redistributed to any other person in any manner. The distribution of this presentation in certain jurisdictions may be restricted by law. Accordingly, any person in possession of this presentation should inform themselves about and observe any such restrictions. By accessing this presentation, you acknowledge that you will be solely responsible for your own assessment of the market and the market position of the Company and that you will conduct your own analysis and be solely responsible for forming your own view of the potential future performance of the business of the Company.

The statements contained in this document speak only as at the date as of which they are made, and the Company expressly disdains any obligation or undertaking to supplement, amend or disseminate any updates or revisions to any statements contained herein to reflect any change in events, conditions or circumstances on which any such statements are based. By preparing this presentation, none of the Company, its management, and their respective advisers undertakes any obligation to provide the recipient with access to any additional information or to update this presentation or any additional information or to correct any inaccuracies in any such information which may become apparent. This document has not been and will not be reviewed or approved by a regulatory authority in India or by any stock exchange in India. This document and its contents should not be forwarded, delivered or transmitted in any manner to an person other than its intended recipient and should not be reproduced in any manner whatsoever.

This presentation contains forward-looking statements based on the currently held beliefs and assumptions of the management of the Company, which are expressed in good faith and, in their opinion, reasonable. Forward-looking statements involve known and unknown risks, uncertainties and other factors, which may cause the actual results, financial condition, performance, or achievements of the Company or industry results, to differ materially from the results, financial condition, performance or achievements expressed or implied by such forward-looking statements. Actual results may differ materially from these forward-looking statements due to a number of factors, including future changes or developments in the Company's business, its competitive environment, information, technology and political, economic, legal and social conditions in India. Given these risks, uncertainties and other factors, recipients of this document are cautioned not to place undue reliance on these forward-looking statements. In addition to statements which are forward looking by reason of context, the words 'anticipates', 'believes', 'estimates', 'may', 'expects', 'plans', 'intends', 'predicts', 'continue' and similar expressions identify forward looking statements.

A person wearing a green shirt and a yellow safety vest is working on a large array of solar panels. The person is leaning over the panels, which are arranged in a grid pattern. The background is slightly blurred, showing more of the solar panel array and some structural elements of the installation site.

Our Mission is to help & serve every individual and organization in each and every aspect of their renewable energy need by reducing cost, scouting and getting better technology and serving each and every customer in a very professional and personalized way.

Our Vision is to be a leading player in renewable energy segment in the world. We will create a world, where renewable energy will not be the benefit of select few.

Comprehensive Product Portfolio

Solar Panels

Solar Panel is the foundation of any successful solar projects. Sahaj's solar panels have been proven to perform in diverse climates globally. Sahaj provides solar panels in various sizes and efficiencies to meet the diverse needs of the customers. Key features of panels include positive power output tolerance, low light response and PID resistance.

Solar Water Pumps

A solar pump is an application of Solar PV System which converts solar energy into electricity to run motor and pump. The motor energized by solar power delivers water out of bore well, river, lake or pond. Sahaj has successfully installed and supplied more than 10000+ numbers of solar water pumping system across India.

Solar Mobile Trolleys

Designed for the farmers solar mobile trolleys are integrated with solar panels, pump controller and a surface or submersible pump on a 4 wheeled trolley which can be pulled with the help of a tractor or manually. The product can be used by small and marginal farmers on sharing basis.

Comprehensive Product Portfolio

Solar Home Light

Solar home light is pollution free & eco friendly lighting option and has been field tested for over 7 years. It is compliant with performance standards and upgraded with PWM with solar charge controller. It has advanced charge topology to enhance battery life.

Solar Street Light

All in one solar street-light comes with built-in passive infrared PIR motion sensor which automatically detects human/traffic presence adjusts LED brightness accordingly. If there is no motion for more than 30 seconds, the controller reduces brightness to 50%. On detecting any movement in the range of 12meters, the light will automatically glow at full power.

Solar Off-Grid Power Plant

Off-grid systems work independently of the grid but have batteries which can store the solar power generated by the system. An ideal solution for areas having no electricity supply. These self-sustaining solar powered panels can provide clean energy for residential homes and small commercial units and reduce their dependence on DG sets, saving fuel costs.

Global Energy Landscape

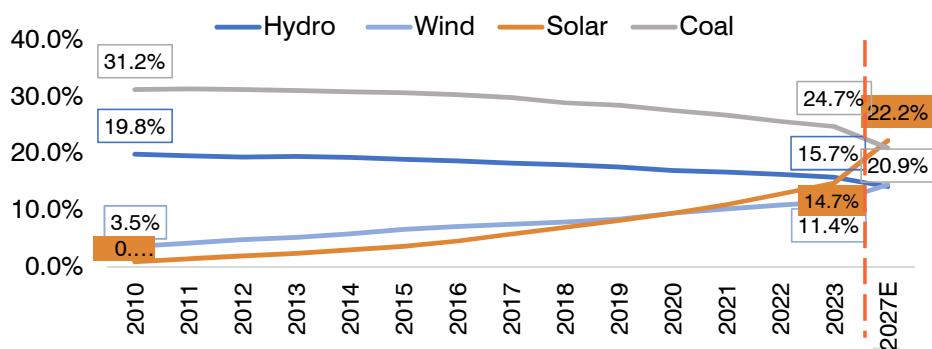

Solar PV Capacity in 2022 (GW)

Solar PV Capacity Bifurcation in 2022

Clean energy pushes fossil fuels share in global energy to decline

Source: IBEF

Solar Energy accounts for 15% of the Global Energy

While fewer than 40 countries have capacity to produce solar modules, over 100 countries completed solar PV projects in 2022, which mostly relied on imported solar panels. EU and US being the largest importers of solar panels.

Continuous growth in the economic attractiveness of PV, massive development in the supply chain and increasing policy support, especially in China, the US, the EU and India, are expected to accelerate capacity growth.

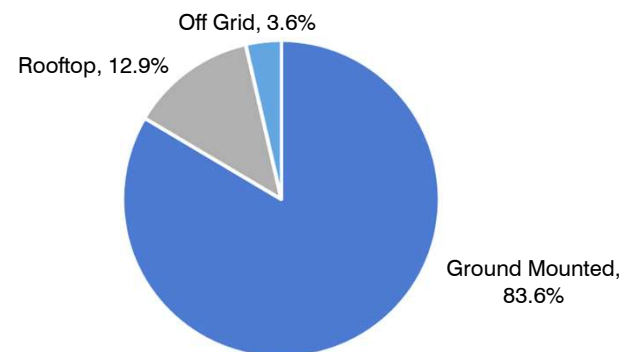

India's Renewable Energy Revolution

Installed Power Generation Capacity (in GW)

Photovoltaic Installed Capacity Application

Installed Renewable Energy Capacity (in GW)

India's cumulative solar installations stood at 72 GW, making India the world's 5th largest country in terms of installed capacity.

In FY24, India is planning to issue 40 GW tenders for solar and hybrid projects.

The government has a target of installing 500 GW of renewable-energy capacity by 2030 from 180 GW installed currently. Out of which solar energy will be 293 GW by 2030 (~38% share in total capacity) from 72 GW currently.

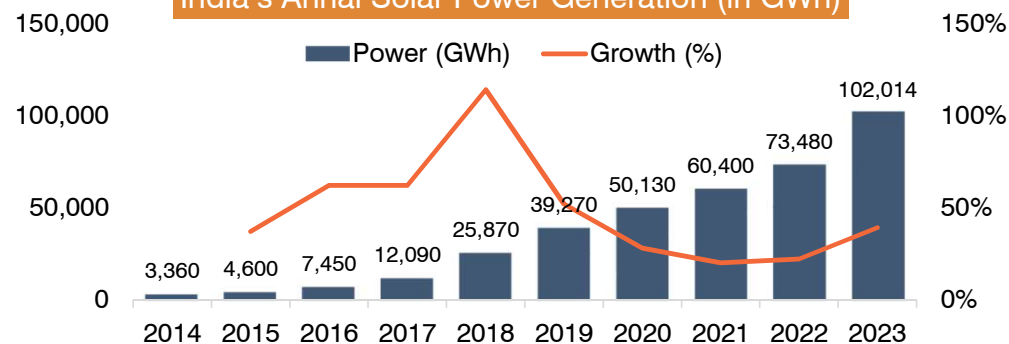

India's Renewable Energy Revolution

India's Solar Power Installed Capacity (in GW)

India's Annual Solar Power Generation (in GWh)

State-wise Solar Power Generation

Other states with less than 6% share each, comprise 24% of the power generation

Source: Ministry of New and Renewable Energy, Goldisolar

Exports of solar cells and modules from India have gone up to \$ 628.4 Mn in April – July 2023, which is 1062% higher than \$ 54.0 Mn recorded in the same period of 2022. Exports of modules amounted to \$616.7 Mn, while cells amounted to \$11.6 Mn. The US alone bought \$607.7 Mn worth of modules.

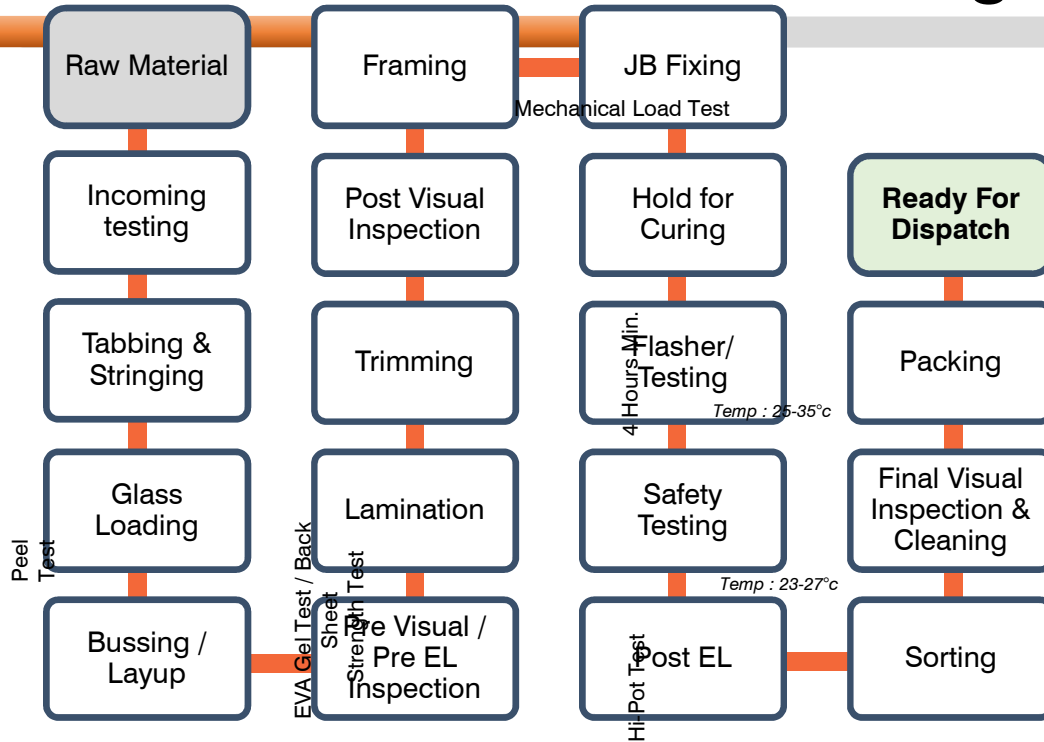

The rise in exports is a windfall of sorts for the Indian manufacturers who are wallowing in the lucrative US market, where China cannot sell due to certain trade barriers.

Government has approved 50 solar parks with a sanctioned capacity of 37,490 MW across 12 states out of which 10,237 MW of solar projects have been commissioned in 18 solar parks.

ABOUT US

Solar PV Module Manufacturing Process

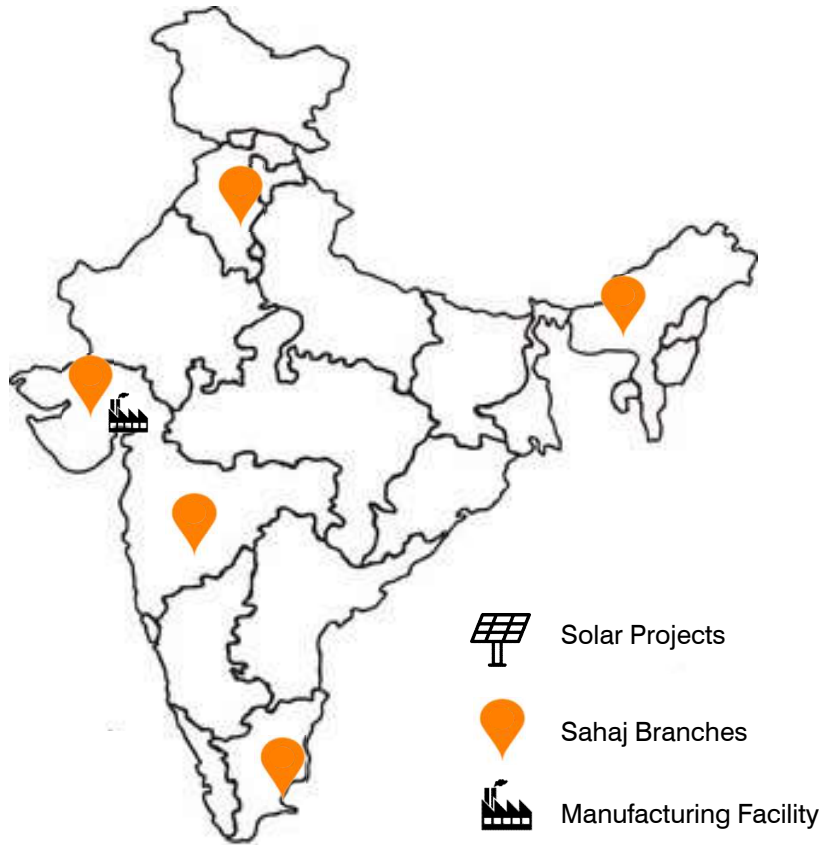

Temp : 24-30°C

Sahaj has India's state-of-the-art Solar PV Module manufacturing capacity of 100 MW's at its plant in Bavla, Gujarat.

The plant is an integrated manufacturing facility for PV cells modules and manufactures premier, high performance solar PV modules in India. Apart from conventional polycrystalline module, the facility manufactures high efficiency Mono PERC module, with 21%+ efficiency and a capacity utilization rate of 75%.

Pramit Brahmbhatt

Promoter & Managing Director
BBA, MBA, F.C.C.A (UK)

After completing his MBA from Gujarat University, Ahmedabad, India Mr. Pramit pursued Chartered Accountancy in UK. He is a fellow in Chartered Certified Accounting at present.

In his 20+ years of working experience in setting up start-ups, he has worked with a leading global investment company based in UK- Alpari (UK) Limited from 2006 to 2009. He has also set up Indian operations of Alpari and he was heading Indian company – Alpari Financial Services Pvt. Ltd. from 2009 to 2013. His brain child Veracity Group of Companies operates into financial services, financial advisory & ITES businesses. He envisioned Sahaj Solar Ltd. and played a key role in shaping the company to its present form. His profound interest and efforts shaped Sahaj Solar Ltd. to achieve massive growth to 100 MW production capacity from merely 5MW in 2010 at the time of inception.

About Sahaj Solar

- Incorporated in 2010, Sahaj plans and develops small to large Photovoltaic Solar power plant projects. Sahaj was an early player in solar water pumping system and has a combination of exposure and experience in panel manufacturing and EPC. Sahaj's expertise lies in Crystalline Photovoltaic Technology used for manufacturing Solar PV Modules.
- Sahaj has emerged as one of the growing solar panel manufacturers as listed in ALMM. Sahaj increased its installed capacity from 5 MW to 100 MW from 2014 to 2023. Sahaj supplies qualitative products and provides EPC Services all over India and in Africa. It is an original equipment manufacturer for major solar panel manufacturers in India. It has a rich experience in niche and off-grid products like micro grid and home lighting along with key industrial project experience with key clients like Eglo, Shekhani Industries, Nuvoco Cements (Lafarge Cements), Tenneco & Valeo.
- Sahaj strongly believes that renewable energy is the next revolution after semiconductor and computers. Solar is the most aggressive energy in all the renewable sources of energy. Approximately 0.1% of the world's area utilized by solar photovoltaic plants would be sufficient to generate the entire world's electricity demand.
- Empaneled partner of GOI Jal Jeevan Mission with an annual budget of Rs. 60,000 Cr and PM KUSUM with a budget of Rs. 34,500 Cr. Sahaj Solar has successfully delivered more than 10,000 pumps under PM KUSUM initiative.
- Sahaj constantly develops and innovates the product lines to ensure higher efficiency, better economic benefits and sustainability at large.
- Sahaj Solar Ltd. has all National & International Certificates which include MNRE, MNRE Channel Partner, ISO 9001:2015, ISO 14001:2015, ISO 45000:2018, OHSAS 18001:2007, CE, TUV Saar, IEC 61215, IEC 61730 – 1, IEC 61730-2 and IEC 61701 : 1995, IS 14286:2010/IEC 61215:2005, IS/IEC 61730(Part 1) : 2004 & IS/IEC 61730 (Part 2) : 2004

Looking Ahead

1 Solar Controllers

A solar charge controller is used to keep the battery from overcharging by regulating the voltage and current coming from the solar panel to the battery. It is programmed at 15-A/200-W unit and uses MPPT (maximum power point tracking) to accelerate solar charging of the battery up to 30% per day

2 Solar Battery Storage

Solar battery storage systems play a crucial role in the effective utilization of solar energy and offer a cost-effective solution for storing excess energy for future use.

Lithium-ion batteries are the most common offering a high energy density, long cycle life and low self-discharge rate with an average lifespan of 5 to 15 years.

3 Solar Water Pumps

Solar pumps offer a clean and simple alternative to fuel-burning engines and generators for domestic water, livestock and irrigation.

It has no moving parts or fuel deliveries and very little maintenance with a warranty of at least 20 years.

PM-KUSUM Scheme, has been launched by the Ministry of New and Renewable Energy for setting up subsidized solar pumps and distributed solar power plants across the country. It is one of the biggest initiatives in the world to provide clean energy to more than 3.5 Mn farmers across India.
