SUB: **SAKAR granted with new NINE, totalling to ELEVEN Marketing Authorization (MA)/ Registration of ONCOLOGY products in EUROPE & EMERGING MARKETS**

Dear All,

We are happy to share that Sakar has received new Nine Marketing Authorisations (MA) with oncology products (registrations) in the European Union and emerging markets as on date, totalling to **11 MAs**.

While five of the product dossiers viz. Carboplatin, Docetaxel, Irinotecan liquid injections, Gemcitabine lyophilised injection and Tamoxifen tablets have received approvals from Bulgaria (EU region), Docetaxel injection has also received approval from Bosnia in Europe. Another five dossiers have received approval from emerging markets for Gemcitabine lyo injection, Abiraterone, Imatinib, Capacetabine tablets in South East Asia and Carboplatin Injection in Latin America. These dossiers are developed in-house at Sakar's research-driven API-integrated EU GMP approved oncology formulation manufacturing unit.

These Marketing Authorisations will widen the options to treating cancers of gastrointestinal tract, colon, rectum, pancreas, prostate, bladder, breast, ovary, small/ non-small cell lung, blood or of bone marrow. Strategically these approvals opens the door to export anti-cancer products to the European, Latin and South Eastern countries, as Sakar prepares for the commercial supplies overseas.

With a mix of oncology products in process of registration in the EU and rest of world markets, Sakar expects to receive grant of more MAs in next few months. These MAs will multiply the export of diverse oncology products to the EU & other regions region manufactured at Sakar's state-of-the-art vertically integrated oncology product manufacturing site.

Thanking you for the encouragement.

Yours faithfully,

FOR, SAKAR HEALTHCARE LIMITED
