COMPLIANCE OFFICER**

SAKAR HEALTHCARE LIMITED

Investor Presentation | Q2FY26

This presentation and the accompanying slides (the “Presentation”), which have been prepared by **Sakar Healthcare Limited** (the “Company”), have been prepared solely for information purposes and do not constitute any offer, recommendation or invitation to purchase or subscribe for any securities, and shall not form the basis or be relied on in connection with any contract or binding commitment whatsoever. No offering of securities of the Company will be made except by means of a statutory offering document containing detailed information about the Company.

This Presentation has been prepared by the Company based on information and data which the Company considers reliable, but the Company makes no representation or warranty, express or implied, whatsoever, and no reliance shall be placed on, the truth, accuracy, completeness, fairness and reasonableness of the contents of this Presentation. This Presentation may not be all inclusive and may not contain all of the information that you may consider material. Any liability in respect of the contents of, or any omission from, this Presentation is expressly excluded.

Certain matters discussed in this Presentation may contain statements regarding the Company’s market opportunity and business prospects that are individually and collectively forward-looking statements. Such forward-looking statements are not guarantees of future performance and are subject to known and unknown risks, uncertainties and assumptions that are difficult to predict.

These risks and uncertainties include, but are not limited to, the performance of the Indian economy and of the economies of various international markets, the performance of the industry in India and world-wide, competition, the company’s ability to successfully implement its strategy, the Company’s future levels of growth and expansion, technological implementation, changes and advancements, changes in revenue, income or cash flows, the Company’s market preferences and its exposure to market risks, as well as other risks.

The Company’s actual results, levels of activity, performance or achievements could differ materially and adversely from results expressed in or implied by this Presentation. The Company assumes no obligation to update any forward-looking information contained in this Presentation. Any forward-looking statements and projections made by third parties included in this Presentation are not adopted by the Company and the Company is not responsible for such third-party statements and projections.

Company Overview

From Vision to Value: Sakar Healthcare at a Glance

- Founded by **Mr. Sanjay Shah**, Sakar Healthcare has evolved from a contract manufacturer into an **API-integrated pharmaceutical organization** with a strong presence across **oral solids, injectables, and oncology formulations**.
- Over two decades, the company has built a reputation for **credibility, compliance, and precision**, supported by world-class **WHO and EU-GMP certified facilities** in Gujarat and a global network of partnerships across regulated markets.
- The establishment of a **state-of-the-art oncology facility at Bavla**, equipped with integrated **API and FDF capabilities**, marks a defining milestone in Sakar's transformation. This expansion elevates the company from a reliable formulation partner to a **vertically integrated player** in the global oncology space — combining **scientific innovation, scalable manufacturing, and sustainable operations**.
- As it enters its next phase of growth, Sakar Healthcare stands positioned for **onco-led value creation**, leveraging its legacy of quality and research excellence to deliver **specialized, high-compliance healthcare solutions worldwide**.

Vision

To become a global healthcare organization based on three pillars- people, partnership and performance; making lives healthy happy and more meaningful by providing world class healthcare solutions.

Mission

To strengthen our core competencies to become the preferred choice in existing partnerships and explore new market opportunities to expand range of products and services- respecting laws, protecting environment and benefitting mankind

Values

Committed team

Loyal to partners

Focused on results

Innovative approach

Diversified Model

Sakar Healthcare operates a diversified business model comprising **CDMO Services, Own Brand Exports and Product Development Technology Transfer** enabling a balance between stability and strategic growth.

CDMO / CMO Services

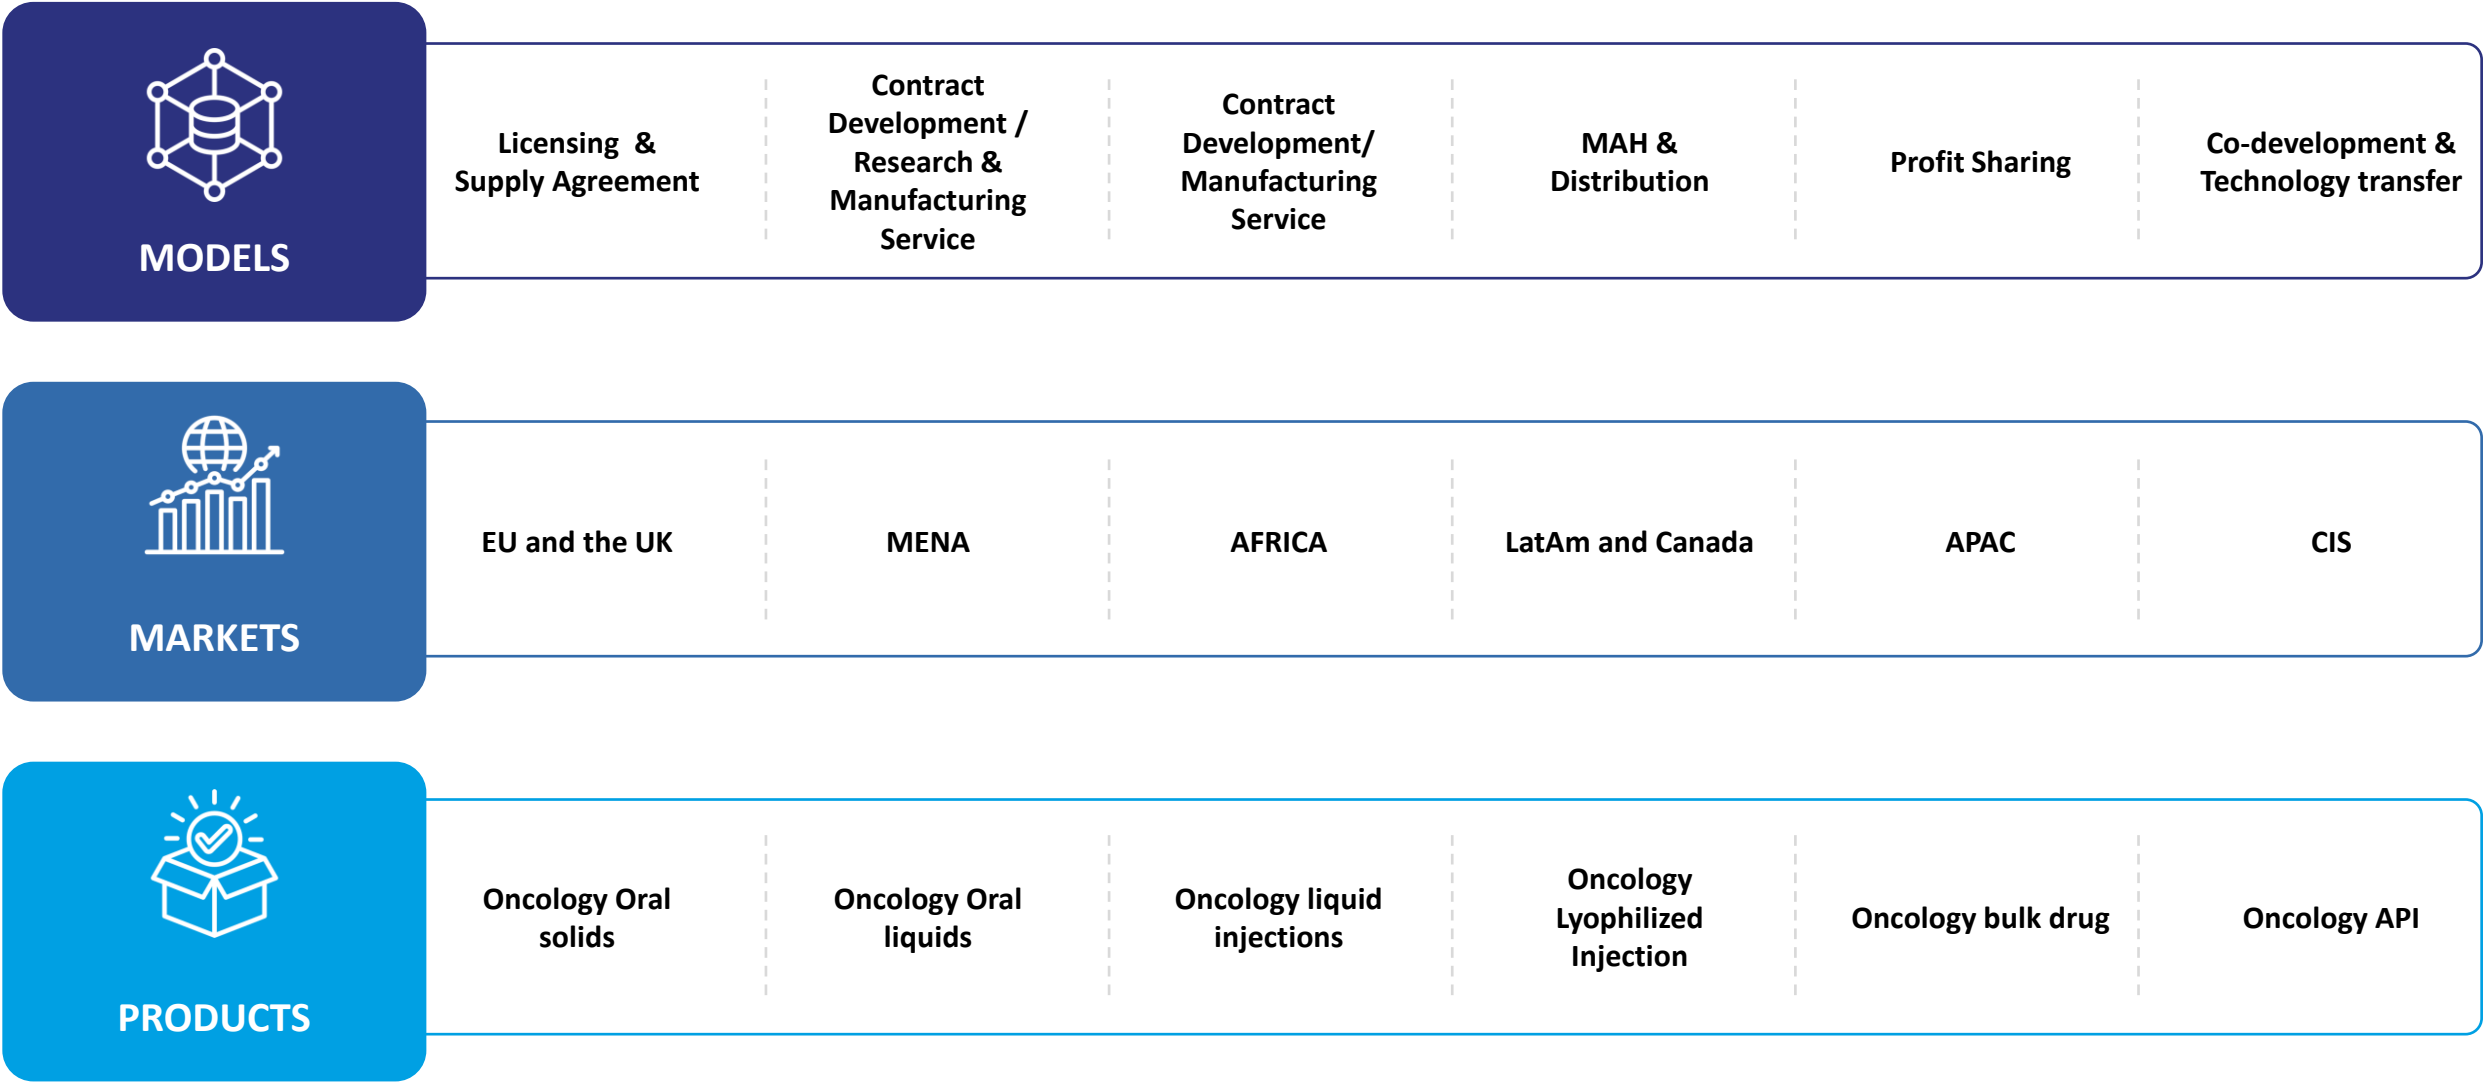

Sakar Healthcare provides **Contract Development and Manufacturing (CDMO/CMO)** services to leading multinational and domestic pharmaceutical companies. The company's integrated setup enables product development, scale-up, and regulatory dossier support under global compliance standards. This vertical ensures consistent capacity utilization and steady recurring revenues.

Own Brand Exports – The Growth Driver

Sakar markets its own branded formulations across **60+ countries**, building brand equity and higher-margin revenue streams. The company's global footprint spans **APAC, Latin America, Africa, CIS, and Europe**, positioning it as a preferred partner in both branded and generic markets.

Licensing / Product Development

Sakar Healthcare co-develops product under **patent non-infringing** set and **effect Technology Transfer** or scale up to commercial batches based on partner requirements. Sakar License out developed CTD dossiers.

A Differentiated Solutions Provider

Platform Integration

EU-GMP certified oncology FDF facility with integrated API

Ready EU CTD dossiers with 11 global Marketing Authorizations granted

First patent received; APIs developed with 16 written regulatory confirmation

Profitability & Partnerships

Diversified model: LSA, CDMO, CRAMS, tech transfer, profit sharing

Oncology delivers ~2x higher margins vs. general formulations

Shift towards own brand exports (70%) enhancing profitability

Pipeline Strength

55 oncology molecules developed; 32 dossiers ready for launch

Developing Liposomal (Doxorubicin) & HME products (Apalutamide, Olaparib, Enzalutamide)

Focused on development of non-infringing patent formulations for regulated markets

Purpose & Technology

Advanced Flow Chemistry (Vapourtech, UK) and GEA granulation lines

Toffolo lyophilizes, Di-Dietrich glass reactors ensure global compliance

Green Chemistry, ZLD & solar systems driving sustainable manufacturing

Oncology – The Future with Sakar

Oncology – the driving growth engine

Oncology lies at the core of Sakar Healthcare’s transformation. As the global cancer burden continues to rise, the need for safer, more accessible, and effective therapies has never been greater.

With the growing prominence of biologics, cytotoxic, and complex generics, oncology presents one of the most compelling opportunities in pharmaceuticals—defined by high entry barriers, limited competition, and superior profitability.

For Sakar, entering the oncology space is not merely a business expansion—it represents a deliberate shift toward value-driven innovation and scientific purpose. Our EU-GMP approved Bavla facility, equipped with integrated API and FDF capabilities and advanced flow chemistry systems, enables seamless progression from research to commercialization under one roof.

Oncology in Indian Pharmaceutical landscape

Rising cancer incidence -In India, projected numbers for cancer patients is expected to rise from approximately **1.46 million in 2022 to 1.57 million in 2025**.

The oncology drugs market is a major segment, with a projected value of **\$7.8 billion by 2030**.

The NGS (Next-Generation Sequencing) market, particularly for targeted and gene panel sequencing, is also experiencing rapid growth, with a **CAGR of 18% from 2024 to 2030**.

Growing awareness about cancer, early detection, and the use of advanced diagnostic technologies are **contributing to market growth**.

Global Oncology Market (USD Bn)

Indian Oncology Market (USD Bn)

A research-driven, API-integrated, EU-GMP approved oncology FDF unit. Empowering global access to high-potency cancer therapies through precision research, advanced manufacturing, and sustainable innovation.

Strategic Overview

Facility:

- **Bavla, Gujarat** – EU-GMP approved, vertically integrated oncology plant
- **Product Capability:** Oral solids, oral liquids, sterile injections (liquid & lyophilised), and oncology APIs (De-Dietrich glass reactors for complex oncology molecules)
- **R&D Excellence:** Integrated F&D, ADL, and R&D labs equipped with Flow Chemistry (Vapourtec, UK)
- **Innovation Focus:** Liposomal, HME-based, and cytotoxic oral liquid formulations to enhance patient compliance and bioavailability

Portfolio Strength:

55 oncology products developed in-house
32 ready for global launch
11 Marketing Authorisations (MAs) granted in EU and worldwide

Annual Production

APIs – 12.3 MT
Oral solids – 97 million tablets, 29 million capsules
Sterile injectables – 13 million vials
Lyophilized – 22,000 vials per cycle (10 ml)

Key Differentiators

Vertically integrated from API to Finished Dosage	High containment (OEL Level 4) facility ensuring safety and compliance	Green Chemistry adoption for energy efficiency and waste reduction	Technology Transfer & Scale-Up ready labs supporting CRAMS, CDMO, & co-development models	In-house EU-CTD dossier preparation with bioequivalence studies from EMA/USFDA-approved CROs

Liquid / Lyophilised Injectable Unit - Oncology

Manufacturing Capacity (Cytotoxic injections)

Container Size	Capacity Per Hour
2ml to 10 ml	7200
20ml / 30 ml	3000

Lyophilized Product Capacity

Container Size	Capacity / Cycles
10 ml	22000 Vials

Significance of the Unit

Eurovent certified AHU

Water system-two pass RO with EDI

ETP (zero-discharge)

Manufacturing Capacity (Cytotoxic OSD)

ORAL SOLID UNIT - Oncology	Capacity
Bulk Drug	6.5-120kg/Shift
Tablet	324000 tablets/Shift
Capsule Filling	96000 capsules/Shift
Blister Packing	324000 tablets/Shift
Bottle Packing	324000 tablets/Shift

EU-GMP Approved Oncology OSD Unit

The facility meets European regulatory standards, reflecting global manufacturing compliance. Its design allows seamless scale-up from pilot to commercial batches, reducing technology transfer challenges. This ensures faster market entry and reliability in regulated supply chains.

Containment and Isolation Systems for OEL Compliance

Operations are performed in fully contained suites to safely handle high-potent APIs. The setup maintains operator and environmental protection, achieving required OEL standards upto level 4. Such containment capability differentiates Sakar as a trusted oncology manufacturer.

Fully Automatic Line with Global Machinery Integration

The plant features automated operations from granulation to final packing. Equipment sourced from GEA, Glatt, IMA, ACG, and Sejong ensures consistency and quality precision. This high degree of automation minimizes human intervention and product variability.

Oral Liquid Oncology Section with Advanced Compounding

Includes a 500L compounding vessel equipped with an in-line homogenizer and filtration system. The system supports viscous and sensitive oncology liquids, maintaining uniformity and stability. This adds flexibility to Sakar’s oncology portfolio by covering both solid and liquid dosage forms.

Growth Drivers

The background of the slide features a laboratory setting with scientists in white protective suits and masks. One scientist in the foreground is holding a red vial. The scene is overlaid with a blue and red color scheme and a network of white hexagons and lines, suggesting a molecular or technological theme.

Industry Growth Drivers

Ageing Population & Chronic Disease Burden

01

Over 1 in 6 people globally will be aged 60+ by 2030, driving demand for long-term care and chronic treatments.

Shift Toward Value-Based & Preventive Care

02

Increasing adoption of data analytics and personalized medicine to improve outcomes and reduce costs.

R&D and Innovation Focus

03

Global pharma R&D spending projected to exceed USD 280 billion by 2030, boosting innovation in specialty therapies.

Government & Policy Support

04

Initiatives improving access, insurance coverage, and manufacturing incentives in emerging markets like India.

Growing CDMO/CRAMS Partnerships

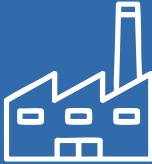

05

Outsourcing by global pharma expected to grow at 10–12% CAGR, enhancing manufacturing scalability.

Sustainability & Green Manufacturing

06

Industry shift toward eco-friendly and zero-discharge production systems for global compliance.

Oral Solids 	Injection 	APIs 	Liquid orals 
22 products developed	21 products developed	22 APIs developed	12 products developed

- RLD's are from EU

Indian Health Care (In US\$ Billion)

The sector is growing at a robust 17.5-22.5% CAGR, driven by innovation across hospitals, pharmaceuticals, and diagnostics

Rising income levels, an ageing population, growing health awareness and a changing attitude towards preventive healthcare is expected to boost healthcare services demand in the future

Indian Pharmaceutical Market (US\$ billion)

Indian pharmaceutical industry is known for its generic medicines and low-cost vaccines globally. Transformed over the years as a vibrant sector, presently Indian pharma ranks third in pharmaceutical production by volume

Drug Formulations and Biologicals stood at US\$ 22.92 billion, accounting for 75% of total pharmaceutical exports in FY25

Green Chemistry **12 Principles**

Vapourtec R Series System, UK

Glass Line Reactors from De-Dietrich, Italy

OSD Containment Granulation and Compression Line, GEA, Belgium

Glatt-Autocoater, Germany

Tablet Capsule Inspection Machine by Sensum, Slovenia

Sterile Manufacturing Line with Lyophiliser, Tofflon

Kevin Roll Compacter

Bulk packaging Line IMA, Germany

Enables Green Chemistry

Adopted techniques like Flow-Chemistry (Vapourtech) - safer with small reaction volumes, low solvent-reagent, low risk of environment exposure

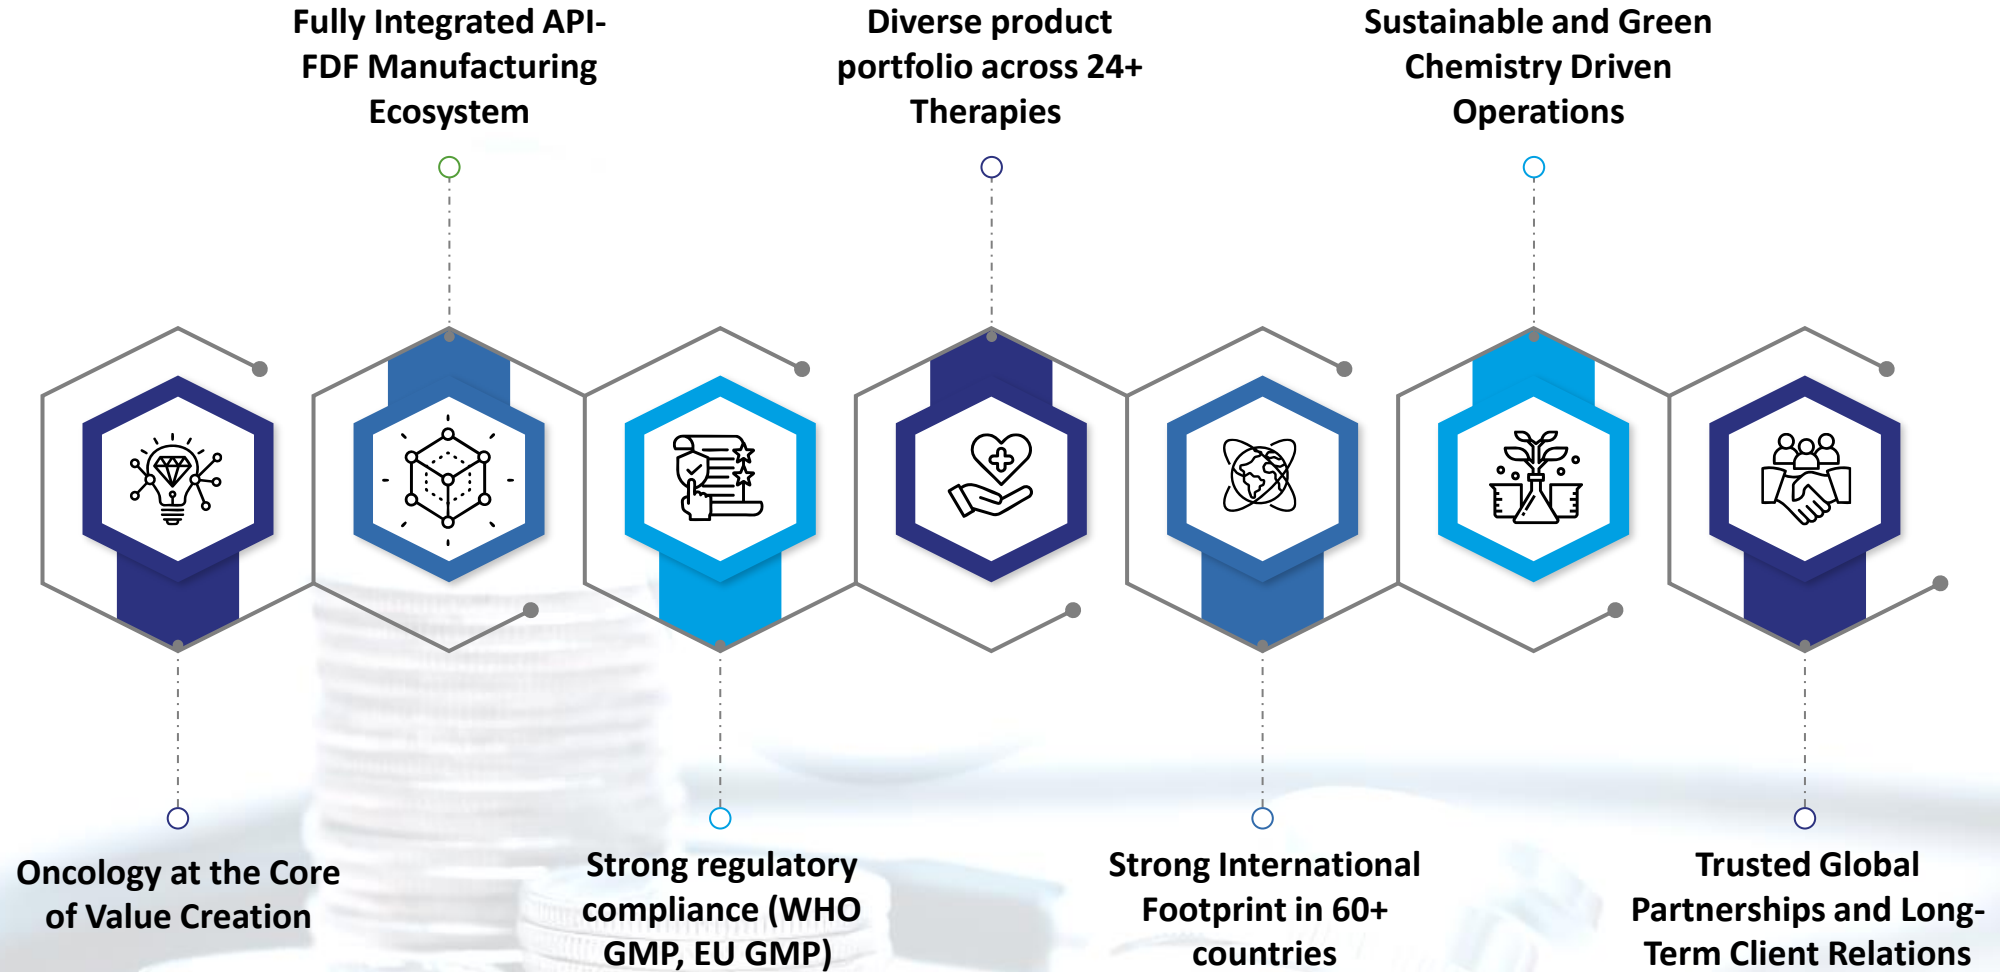

Containment manufacturing-lines or Isolators in place to support Green Chemistry principles

Designs and processes are in place to suit Green Chemistry objectives

Newly installed facility along with world class equipment, provides Sakar competitive edge

Key Investment Proposition

Manufacturing Prowess

The background of the slide features a laboratory setting with scientists in full-body biosuits and face shields working at a bench. The scene is bathed in blue light, with red highlights from equipment. In the foreground, a gloved hand holds a red vial. The bottom right corner is decorated with a white hexagonal molecular structure overlay.

Dry Syrup	25000/shift

40
No. of Products in the
Category

Significance of the Unit

Core hub for oral solids with wide dosage flexibility (80–1500 mg tablets, 250–500 mg capsules).

Fully automated line from granulation to packing, minimizing contamination and material loss.

Offers packaging versatility – ALU-ALU, ALU-PVC, strip & dry syrup – suited for diverse market needs.

HEPA-filtered environment with controlled storage ensure

Cephalosporin – Injectable Unit (Dry Powder)

Manufacturing Capacity

Container size	Capacity (per Hour)
250 mg	14400
500 mg	14400
1 gm / 2 gm	11500
3 gm / 5 gm	8500

Significance of the Unit

- Key sterile block for antibiotic dry powder vials (250 mg to 5 g range).
- Ensures aseptic integrity with HEPA-controlled environment and segregated flows.
- High-speed visual inspection (15,000 vials/hour) and automated packaging ensure quality and efficiency.
- Controlled storage with humidity regulation maintains product stability and compliance
