Railways drives Reform Express with better services, logistics

FP News Service
 NEW DELHI

Better Services
 Explaining the first reform, the Union Minister said that beginning 2026, Indian Railways will ensure proper end-to-end cleaning of trains, especially long-distance trains. He stated that under the existing mechanism, cleaning was largely limited to reserved coaches, and that for the first time in railway history, cleaning of general coaches has been fully integrated into the system.

He further stated that the linen distribution, linen collection, and cleaning functions, which were earlier distributed among separate agencies, will now be integrated and awarded to a single agency.

At designated stations, staff deployed in reserved coaches will move into general coaches to ensure cleaning standards equivalent to reserved coaches. He described this as a very big change in the history of Railways and stated that for the first time such substantial attention is being paid to general coach cleanliness.

The Minister elaborated that a fully technology-enabled professional team will be hired under clearly defined Service Level Agreements specifying cleaning frequency, with more frequent cleaning during peak hours and relatively lower frequency during non-peak hours.

Turning to the second reform, the Union Minister said it builds upon the Gati Shakti Cargo Terminal (GCT) Policy introduced in 2022, which significantly simplified the cargo terminal approval process. Work that earlier took six years began getting completed in approximately three months, and approvals for engineering drawings, signalling plans and electrical plans were streamlined. As a result, 124 multi-modal cargo terminals were developed with an estimated traffic potential of around 200 million tonnes and revenue potential of approximately Rs 20,000 crore annually.

The most significant addition is the integration of processing within cargo terminals, transforming them into "cargo plus processing" hubs. He explained that cement clinker can be transported to the GCT and ground into cement within the terminal itself, followed by bagging or dispatch through Ready-Mix Concrete vehicles. Similarly, food grain processing, stuffing and destuffing, and other value addition activities can now occur within terminal premises. This eliminates the need to process material elsewhere before bringing it to the terminal, removes artificial barriers, and attracts additional cargo traffic to Railways.

More Reforms to Follow
 He added that seven more reforms are underway with two to be unveiled this month and three more in early March and work initiated on another 30-40 reforms.

With structural reforms in passenger services and freight logistics, Indian Railways marks the beginning of an ambitious year-long transformation agenda.
