8. In terms of the Order, if the entries in the records/registers of the Transferor Company in relation to the number or value, as the case may be, of the equity shares are disputed, the Chairman of the Meeting shall determine the number

The preparation of valuation is a complex process and is not necessarily susceptible to partial analysis or summary description. Any attempt to do so could lead to undue emphasis on any particular factor or analysis.

This letter should be read in conjunction with the attached report.

- 5.2. We have also obtained the explanations, information and representations, which we believed were reasonably necessary and relevant for our exercise from the Management of the Companies. Client has been provided with the opportunity to review the draft Report (excluding the recommended Fair Equity Share Exchange Ratio) as part of our standard practice to make sure that factual inaccuracies/ omissions are avoided in our final Report.
- 5.3. The management of Companies has informed us that there would be no significant variation between the draft Scheme and the final scheme approved and submitted with the relevant authorities.

6. Procedures Adopted

6.1. Procedures used in our analysis included such substantive steps as we considered necessary under the circumstances, including but not limited to the following:

- Requested and received financial information;
- Obtained data available in public domain;
- Undertook industry analysis such as researching publicly available market data including economic factors and industry trends that may impact the valuation;
- Detailed analysis of comparable companies for the business similar to the Companies;
- Discussions (over call/emails/conferences) with the management of the Companies to understand the business and fundamental factors;
- Selection of valuation methodology/(ies) as per International Valuation Standards, 2022 and the internationally accepted valuation methodologies;
- Determined the fair equity share exchange ratio on relative basis using the selected methodology.

For the purpose of arriving at the valuation of the Companies we have considered the valuation base as 'Fair Value' and the premise of value is 'going concern'. Any change in the valuation base, or the premise could have significant impact on our valuation exercise, and therefore, this report.

- 6.2. Client has informed us that, Vivro Financial Services Private Limited ("Fairness Opinion provider") has been appointed to provide fairness opinion on the recommended Fair Equity Share Exchange Ratio for the purpose of aforementioned Proposed Scheme. Further at the request of the Client, we have had discussions with the Fairness Opinion provider on the valuation approach adopted and assumptions made by us.
- 6.3. As stated earlier, our scope is to undertake relative (and not absolute) valuation of the equity shares of the Companies and recommend fair share exchange ratio for the merger as per the Proposed Scheme. Upon request of the Client, we had discussion with respect to the findings, methodology and approach with other valuer, GT Valuation Advisors Private Limited, a Registered Valuer (IBBI Registration No IBBI/RV-E/05/2020/134, engaged by ACL to arrive at the consensus on the fair equity share exchange ratio.
- 6.4. While we have independently carried out the valuation of the Companies for recommending the fair share exchange ratio, appropriate averaging and round off in values have been carried to arrive at consensus on the fair share exchange ratio.

7. Valuation Approaches

- 7.1. It is pertinent to note that the valuation of any company or its assets is inherently imprecise and is subject to certain uncertainties and contingencies, all of which are difficult to predict and are beyond our control. In performing our analysis, we made numerous assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the companies. In addition, this valuation will fluctuate with changes in prevailing market conditions, and prospects, financial and otherwise, of the companies/businesses, and other factors which generally influence the valuation of the companies, its businesses and assets.
- 7.2. The application of any particular method of valuation depends on the purpose for which the valuation is done. Although different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. Our choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for transactions of a similar nature and our reasonable judgment, analysis of businesses, in an independent and bona fide manner based on our previous experience of assignments of similar nature.
- 7.3. It may be noted that BDO Val is enrolled with IOV Registered Valuers Foundation, which has recommended to follow International Valuation Standards ("IVS") for undertaking valuation and accordingly we have considered the International Valuation Standards issued by International Valuation Standards Council ('IVSC') in carrying out the valuation exercise.
- 7.4. Valuation date is December 16, 2024 ('Valuation Date'). For valuation exercise, market parameters have been considered up to and including December 16, 2024.
- 7.5. There are three generally accepted approaches to valuation:
- (a) "Asset" / "Cost" Approach
 - (b) "Income" Approach
 - (c) "Market" Approach

Within these three basic approaches, several methods may be used to estimate the value. An overview of these approaches is as follows:

Asset / Cost Approach

Summation Method

The summation method, also referred to as the underlying asset method, is typically used for investment companies or other types of assets or entities for which value is primarily a factor of the values of their holdings.

This valuation approach is mainly used in case where the assets base dominates earnings capability.

Income Approach

The income approach is widely used for valuation under "Going Concern" basis. It focuses on the income generated by the company in the past as well as its future earning capability. The Discounted Cash Flow Method under the income approach seeks to arrive at a valuation based on the strength of future cash flows.

Discounted Cash Flow Method

Under the Discounted Cash Flow ('DCF') method, the value of the undertaking is based on expected 'cash flows for future, discounted at a rate, which reflects the expected returns and the risks associated with the cash flows as against its accounting profits. The value of the undertaking is determined as the present value of its future free cash flows.

Free cash flows are discounted for the explicit forecast period and the perpetuity value thereafter. Free cash flows represent the cash available for distribution to both, the owners and creditors of the business.

Discount rate is the Weighted Average Cost of Capital ('WACC'), based on an optimal vis-à-vis actual capital structure. It is appropriate rate of discount to calculate the present value of future cash flows as it considers equity-debt risk and also debt-equity ratio of the firm.

The perpetuity (terminal) value can be either calculated based on the business's potential for further growth beyond the explicit forecast period. The "constant growth model" is applied, which implies an expected constant level of growth (for perpetuity) in the cash flows over the last year of the forecast period, or it can also be calculated using the exit multiple at the end of the explicit period.

The discounting factor (rate of discounting the future cash flows) reflects not only the time value of money, but also the risk associated with the business's future operations.

The Business/Enterprise Value so derived, is further reduced by value of debt, if any, (net of cash and cash equivalents) to arrive at value to the owners of business. The surplus assets / non-operating assets are also adjusted.

In case of free cash flows to equity, the cash available for distribution to owners of the business is discounted at the Cost of Equity and the value so arrived is the Equity Value before surplus/ non-operating assets. The surplus assets / non-operating assets are further added to arrive at the Equity Value.

Market Approach

Under the Market approach, the valuation is based on the market value of the company in case of listed companies and comparable companies trading or transaction multiples for unlisted companies. The Market approach generally reflects the investors' perception about the true worth of the company.

i. Market Price Method

Under this method, the market price of an equity shares of the company as quoted on a recognized stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the trading. The market value reflects the investors' perception about the true worth of the company.

ii. Comparable Companies Multiple Method

Under the Comparable Companies Multiple ('CCM') method, the value is determined on the basis of multiples derived from valuations of comparable companies, as manifest through stock market valuations of listed companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

To the value of the business so arrived, adjustments need to be made for the value of contingent assets/liabilities, surplus Asset and dues payable to preference shareholders, if any, in order to arrive at the value for equity shareholders.

iii. Comparable Transactions Multiple Method

Under the Comparable Transactions Multiple ('CTM') method, the value of a company can be estimated by analyzing the prices paid by purchasers of similar companies under similar circumstances. This is a valuation method where one will be comparing recent market transactions in order to gauge current valuation of target company. Relevant multiples have to be chosen carefully and adjusted for differences between the circumstances. This valuation approach is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation.

8. Conclusion on Valuation Approach

8.1. In order to consider reasonable methods for the valuation exercise, we have referred to the International Valuation Standards and the specific information/explanations available of ACL and SIL. We have considered the following respective methods for the valuation:

ACL

8.2. Cost Approach: In a 'going concern' scenario, for an operating entity, the earning power, as reflected under the Income and Market approaches, are of greater importance to the basis of amalgamation, than the value arrived on the net asset basis, which is of limited relevance. Therefore, we have not considered Asset / Cost approach for valuation since the asset / cost approach does not reflect the intrinsic value of the business operations in a "going concern scenario".

- 8.3. Income Approach: Discounted Cash Flow Method under the Income Approach has been considered based on the forecast financial statements provided to us.
- 8.4. Market Approach:
- 8.4.1. In the present case, the shares of ACL are listed on the Stock Exchanges, and there are regular transactions in their equity shares with reasonable volumes on BSE and NSE. Hence Market Price Method under the Market Approach has been considered for valuation of ACL. The volume weighted average share price observed on NSE (due to higher volumes on NSE) for ACL over a reasonable period has been considered for determining value under the market price methodology.
- 8.4.2. Comparable Companies Multiple Method (“CCM”) is also used for determining and arriving at the fair value of ACL, since there are comparable companies operating in similar businesses in India. We have selected comparable companies and the multiples based on business description, size, profitability, etc. in comparison with ACL.

SIL

- 8.5. Cost Approach: In a ‘going concern’ scenario, for an operating entity, the earning power, as reflected under the Income and Market approaches, are of greater importance to the basis of amalgamation, than the value arrived on the net asset basis, which is of limited relevance. Therefore, we have not considered Asset / Cost approach for valuation since the asset / cost approach does not reflect the intrinsic value of the business operations in a “going concern scenario”.
- 8.6. Income Approach: Discounted Cash Flow Method under the Income Approach has been considered based on the forecast financial statements provided to us.
- 8.7. Market Approach:
- 8.7.1. In the present case, the shares of SIL are listed on the Stock Exchanges and there are regular transactions in their equity shares with reasonable volumes on BSE and NSE. Hence Market Price Method under the Market Approach has been considered for valuation of SIL. The volume weighted average share price observed on NSE (due to higher volumes on NSE) for SIL over a reasonable period has been considered for determining value under the market price methodology.
- 8.7.2. Considering the MSA signed by SIL with ACL and ACC as mentioned above, we have used EV/capacity based multiple using Comparable Transactions Multiple Method (“CTM”) based on the comparable companies operating with similar capacity in India.

Summary of Valuation Approaches Considered:

Name of the Companies	Methods Adopted
ACL	DCF Method Market Price Method CCM Method
SIL	DCF Method Market Price Method CTM Method

9. Basis of Fair Equity Share Exchange Ratio

- 9.1. The basis of the fair equity share exchange ratio for the Proposed Scheme would have to be determined after taking into consideration all the factors and methods mentioned hereinabove and to arrive at a final value for the shares of each company. It is, however, important to note that in doing so, we are not attempting to arrive at the absolute values of the Companies, but at their relative values to facilitate the determination of the fair equity share exchange ratio.
- 9.2. We have independently applied methods discussed above, as considered appropriate, and arrived at our assessment of value per share of the Companies. To arrive at the consensus on the fair equity share exchange ratio for the Proposed Scheme, rounding off have been done in the values.
- 9.3. The fair equity share exchange ratio has been arrived at on the basis of a relative valuation based on the various approaches/methods explained herein earlier and various qualitative factors relevant to each Company and the business dynamics and growth potentials of the businesses, having regard to information base, key underlying assumptions and limitations. For this purpose, we have assigned appropriate weights to the values arrived at under each approach/method.

10. Major factors that were considered during the valuation

- 10.1. The equity shares of ACL and SIL are listed on the Stock Exchanges;
- 10.2. Key operating/ financial parameters of ACL and SIL;
- 10.3. Nature of operations of ACL and SIL;
- 10.4. MSA entered into by SIL with ACL and ACC;
- 10.5. Business Projections of SIL and ACL.

11. Conclusion

11.1. In the ultimate analysis, valuation will have to involve the exercise of judicious discretion and judgment taking into account all the relevant factors. There will always be several factors, e.g., present and prospective competition, yield on comparable securities and market sentiments etc. which are not evident from the face of the balance sheets, but which will strongly influence the worth of a share. This concept is also recognized in judicial decisions. For example, Viscount Simon Bd in Gold Coast Selection Trust Ltd. vs. Humphrey reported in 30 TC 209 (House of Lords) and quoted with approval by the Honorable Supreme Court of India in the case reported in 176 ITR 417 as under:

"If the asset takes the form of fully paid shares, the valuation will take into account not only the terms of the agreement but a number of other factors, such as prospective yield, marketability, the general outlook for the type of business of the company which has allotted the shares, the result of a contemporary prospectus offering similar shares for subscription, the capital position of the company, so forth. There may also be an element of value in the fact that the holding of the shares gives control of the company. If the asset is difficult to value, but is nonetheless of a money value, the best valuation possible must be made. Valuation is an art, not an exact science. Mathematical certainty is not demanded, nor indeed is it possible".

11.2. As discussed earlier, for the present valuation exercise, we have considered it appropriate to use DCF Method, Market Price method and Comparable Companies Multiple method for valuation of ACL and DCF Method, Market Price method and Comparable Transactions Multiple method for valuation of SIL to arrive at the recommended fair equity share exchange ratio for amalgamation of SIL with ACL as follows:

Valuation Approach	Valuation Method	ACL		SIL	
		Value Per Share (INR)	Weights	Value Per Share (INR)	Weights
Cost Approach ¹	Summation Method	NA	NA	NA	NA
Income Approach ²	DCF Method	713.8	50%	78.5	50%
Market Approach ³	MP Method	580.4	25%	85.4	25%
Market Approach ⁴	CTM Method	NA	NA	77.6	25%
Market Approach ⁵	CCM Method	644.9	25%	NA	NA
Relative Value Per Share		663.2		80.0	
Share Exchange Ratio (Rounded Off)		12		100	

NA means Not Adopted / Not Applicable.

1. *Since Summation Method under 'Cost Approach' does not reflect the intrinsic value of the business of the Companies in a 'going concern scenario', we have not considered Asset / Cost Approach for this valuation exercise.*
2. *Discounted Cash Flow Method ("DCF") under the Income Approach has been considered for valuation of the Companies as the true worth of their businesses would be reflected in their future earnings potential.*
3. *ACL and SIL are listed on NSE and BSE. However, it is traded in high volumes on NSE, hence, we have considered market price on NSE for valuing ACL and SIL. We have considered 90 trading days' VWAP.*
4. *SIL: Under Market Approach, we have considered Comparable Transactions Multiple ('CTM') Method being the most appropriate method.*
5. *ACL: Under Market Approach, we have considered Comparable Companies' Multiple ('CCM') Method being the most appropriate method.*

11.3. Following is the recommended Fair Equity Share Exchange Ratio:

12 equity shares of Ambuja Cements Limited (of INR 2/- each fully paid up) for every 100 equity shares held in Sanghi Industries Limited (of INR 10/- each fully paid up).

2. Discounted Cash Flow Method ("DCF") under the Income Approach has been considered for valuation of the Companies as the true worth of their businesses would be reflected in their future earnings potential.
3. ACL and SIL are listed on NSE and BSE. However, it is frequently traded with higher trading volumes on NSE, hence, we have considered market price on NSE for valuing ACL and SIL. We have considered 90 trading days' VWAP.
4. SIL: Under Market Approach, we have considered Comparable Transactions Multiple ('CTM') Method being the most appropriate method.
5. ACL: Under Market Approach, we have considered Comparable Companies' Multiple ('CCM') Method being the most appropriate method.

Following is the recommended Fair Equity Share Exchange Ratio:

"12 equity shares of Ambuja Cements Limited (of INR 2/- each fully paid up) for every 100 equity shares held in Sanghi Industries Limited (of INR 10/- each fully paid up)."

Annexure 2: Valuation of ACL as per DCF Method:

The future financial projection of ACL is based on the information provided by the Management. The future earning capability of the business is important; therefore, we have considered DCF method under Income Approach.

7. VALUATION APPROACH & METHODOLOGY

7.1. Valuation Procedures

Arriving at the Share Exchange Ratio for the Proposed Transaction would require determining the relative value of equity shares of SIL and equity shares of Ambuja. These values are to be determined independently without considering the effect of the Proposed Transaction.

In connection with this exercise, we have adopted the following procedures to carry out the equity valuation of the Specified Companies:

7.1.1. Data Collection and Planning:

- Collected financial data and key performance indicators for the historical period.
- Held discussions with the Management pertaining to the business and the expected performance indicators during the projected period.
- Any details needed for industry data, market share, surplus assets, assets and liabilities classified as held for sale, contingent liabilities and other data required based on further understanding.

7.1.2. Data Analysis and Management Discussions:

- Sought discussions with the Management to understand the business and fundamental factors that affect the earning-generating capability including its strengths, weaknesses, opportunity and threats analysis and historical financial performance.
- Where needed, analyzed publicly available information whether or not provided by Management.

7.1.3. Undertook Industry Analysis:

- a) Research publicly available market data including economic factors and industry trends that may impact the valuation.
- b) Analysis of the market to identify comparable companies and comparable transactions.
- c) Other publicly available information.

7.1.4. Performing Valuation Analysis:

- a) Selected appropriate Internationally acceptable valuation methodologies to be used based on the information received, understanding gathered through interviews with the Management, publicly available information and prior experience.
- b) Understood key drivers of valuation and supporting assumptions.
- c) Identified key assumptions and arrived at value of equity shares of the Specified Companies in order to determine the Share Exchange Ratio for the Proposed Transaction.

7.2. Valuation Parameters

7.2.1. Valuation Base: Valuation base means the indication of the type of value being used in an engagement. Different valuation bases may lead to different conclusions of value. The standard of value used in our analysis is "Fair Value" which is often understood as the price, that would be received to sell an asset in an orderly transaction between market participants at the valuation date. Fair value is the price in an orderly transaction in the principal (or most advantageous) market at the valuation date under current market conditions (i.e. an exit price) regardless of whether that price is directly observable or estimated using another valuation technique.

7.2.2. Premise of Value: A premise of value or assumed use describes the conditions and circumstances of how an asset is deployed. We have considered the "going concern value" as Premise of Value.

7.2.3. Intended Users: This Report is intended for consumption of the Client, its advisors supporting the Proposed Transaction as well as relevant regulatory and statutory authorities.

7.2.4. Valuation Date: The Valuation Date considered for this engagement is 16 December 2024.

7.2.5. Valuation Standards: The report is being prepared in accordance with the relevant ICAI Valuation Standards, 2018 such as ICAI Valuation Standard 102 – Valuation Bases, ICAI Valuation Standard 103 – Valuation Approaches and Methods, ICAI Valuation Standard 301 – Business Valuation.

7.3. Valuation Approach & Methodology

7.3.1. Valuation of a business is not an exact science and ultimately depends upon what it is worth to a serious investor or buyer who may be prepared to pay a substantial goodwill. This exercise may be carried out using various methodologies, the relative emphasis of each often varying with:

- a) Specific nature of the business
- b) Whether the entity is listed on a stock exchange
- c) Industry to which the company belongs.
- d) Past track record of the business and the ease with which the growth rate in cash flows to perpetuity can be estimated.
- e) Extent to which industry and comparable company information is available.

7.3.2. The results of this exercise could vary significantly depending upon the basis used, the specific circumstances and professional judgment of the valuer. Certain valuation techniques have evolved over time and are commonly in vogue.

7.3.3. It should be understood that the valuation of any business/ company or its assets/ equity shares is inherently subjective and is subject to certain uncertainties and contingencies, all of which are difficult to predict and are beyond our control. Valuation results could fluctuate with lapse of time, changes in prevailing market conditions and prospects, industry performance and general business and economic conditions, financial and otherwise, and other factors which generally influence the valuation of companies.

- 7.3.4. The application of any method of valuation depends on the purpose for which the valuation is done. Although, different values may exist for different purposes, it cannot be too strongly emphasized that a valuer can only arrive at one value for one purpose. The choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for transactions of a similar nature, regulatory guidelines, and our reasonable judgement, in an independent and bona fide manner based on our previous experience of assignments of similar nature.
- 7.3.5. The Management is contemplating amalgamation of SIL and Ambuja in accordance with the provisions of section 230 to 232 of the Companies Act 2013.
- 7.3.6. We have evaluated the following valuation methodologies as per any internationally accepted valuation methodology / (ies) on arm's length basis. The valuation techniques can be broadly categorized as follows:
- a) Market Approach
 - i. Market Price Method
 - ii. Comparable Companies Multiple ("CCM") Method
 - iii. Comparable Transaction Multiple ("CTM") Method
 - b) Income Approach – Discounted Cash Flow Method.
 - c) Asset / Cost Approach – Net Asset Value Method.

7.4. Valuation Methods

7.4.1. Market Price Method

The market price of an equity shares as quoted on stock exchanges is normally considered as the value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded in, subject to the element of speculative support that may be inbuilt in the value of the shares.

The equity shares of Ambuja and SIL are listed on NSE and BSE and there are regular transactions in its equity shares with adequate volumes. Thus, the share prices observed on NSE over a reasonable period, considering the volume traded was higher on NSE than BSE, have been considered for arriving at the value per equity share of Ambuja and SIL under the Market Price method.

7.4.2. Comparable Companies Multiple Method

Under this methodology, appropriate valuation multiples of comparable listed companies are computed and applied to the financials of the company being valued in order to arrive at a multiple based valuation. This is based on the premise that the market multiples of comparable listed companies are good benchmarks to derive valuation.

In the present valuation analysis, based on research from international databases and discussions with the Management, we were able to identify companies listed on recognized stock exchanges which can be considered as comparable to Ambuja. In identifying the comparable companies' certain parameters like similarity in business activity, financial performance, size of operations etc. were considered. Based on this analysis, we have considered this method to value Ambuja.

While we have screened for publicly listed companies comparable to SIL based on capacity, given the current operations of the company are restrained to a cost-plus business model, pursuant to the Master Service Agreement ("MSA") signed with Ambuja, we do not deem it to be appropriate in applying comparable companies' multiple method. We have therefore not considered this method to estimate the value of equity shares of SIL.

7.4.3. Comparable Transactions Multiple Method

This method is similar to the above CCM method, with the exception that the companies used as guidelines are those that have been recently acquired. Under the CTM Method, acquisitions or divestitures involving similar companies are identified, and the multiples implied by their purchase prices are used to assess the subject company's value. There is no rule of thumb for the appropriate age of a reasonable transaction; however, it is important to be aware of the competitive market at the time of the transaction and factor any changes in the marketplace environment into the analysis. All other things being equal, the more recent the transaction, the more reliable the value arrived at using this technique.

In the present valuation analysis, we were able to identify a few transactions involving acquisition of sizable stake by existing players. Given the context of the Proposed Transaction, we have considered the CTM method as one of the methods to estimate the value of equity shares of SIL.

However, we were unable to use this method for our valuation analysis of Ambuja due to lack of credible and sufficient information available in the public domain relating to comparable transactions of companies at similar stage, size and scale of operations in the recent past.

7.4.4. Discounted Cash Flow ("DCF") Method

Under the DCF method the projected free cash flows to the firm/ equity are discounted at the weighted average cost of capital/ cost of equity. In general, the DCF method is a strong and widely accepted valuation tool, as it concentrates on cash generation potential of a business. DCF analysis is based mainly on the following elements:

- Projection of financial statements (key value driving factors),
- The cost of capital to discount the projected cash flows.

Considering the above, we have used this method to estimate the value of equity shares of Ambuja, since it captures Ambuja's growth and cash generating potential. Similarly, we have used this method to value SIL as well.

We have used the free cash flows to firm (the "FCFF") approach under the DCF method to estimate the value of equity shares of Ambuja and SIL, based on the financial projections provided to us by the Management.

Please note that we have relied on explanations, financial projections and information provided by the Management. Projections and assumptions for the projected period are only the best estimates of the Management for the Company's growth and sustainability of profitability margins. Although, we have reviewed the data for consistency and reasonableness, we have not independently investigated or otherwise verified the data provided.

7.4.5. Net Asset Value ("NAV") Method

The value arrived at under this approach is based on the latest available audited/ unaudited/ provisional financial statements of the business and may be defined as the Shareholder's Funds or Net Asset Value of the company.

Under this method, the net assets as per the financial statements are adjusted for market value of surplus/ non-operating assets, potential and contingent liabilities, if any. The NAV is generally used as the minimum break-up value for any business since this methodology ignores the future return the assets can produce and is calculated using historical accounting data that does not reflect how much the business is worth to someone who may buy or invest in the business as a going concern.

Based on our discussions with the Management, and analysis of the historical and projected profit and loss statements of the Specified Companies, we understand that the current NAV only reflects the historical costs and accumulated profits of the Specified Companies which do not reflect the fair value of the assets and liabilities as of the Valuation Date.

Since, the current NAV is not reflective of the Specified Companies future cash generation and performance, keeping in mind the context and purpose of the Report, we have not used this method to estimate the equity value of the Specified Companies.

8. BASIS OF SHARE EXCHANGE RATIO

- 8.1. The equity share exchange ratio has been arrived at on the basis of the relative value of equity shares of the Specified Companies based on the various approaches / methods explained in this Report and various qualitative factors relevant to each company and the business dynamics and growth potentials of the businesses of the Specified Companies, having regard to information base, key underlying assumptions and limitations.
- 8.2. While we have provided our recommendation of the Share Exchange Ratio based on the information available to us and within the scope and constraints of our engagement, others may have a different opinion as to the Share Exchange Ratio. In performing our analysis, we have relied on explanations provided by the Management and have made assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the Specified Companies. - 9.9. We have relied on data from external sources. These sources, although considered to be reliable, are external and hence, we assume no liability for the accuracy of the data. We have assumed that the business continues normally without any disruptions due to statutory or other external/ internal occurrences.
- 9.10. The Management has represented that the business activities have been carried out in the normal and ordinary course between 30 September 2024 and the Report Date for the Specified Companies and that no material adverse change has occurred in their respective operations and financial position between the respective aforementioned dates.

1. Comparable Companies Multiple Method is not adopted for SIL due to lack of comparable companies since the current operations of the company are restrained to a cost-plus business model, pursuant to the MSA signed with Ambuja.
2. Comparable Transactions Method is not adopted for estimating value per share of Ambuja due to lack of credible & sufficient information of transactions involving companies of comparable size and scale of operations to Ambuja.
3. Income approach is adopted as we have been provided with financial forecast for the business of the Specified Companies from the Management, and this methodology captures the future cash flows.

Sub: Recommendation of Share Exchange Ratio pursuant to the Scheme of Arrangement between Sanghi Industries Limited ("SIL") and Ambuja Cements Limited ("Ambuja")

Dear Sir / Madam,

We refer to your request to provide specific information sought by the Stock Exchanges in India with respect to the recommendation of share exchange ratio related to the Proposed Transaction as per our report dated 17 December 2024 ("Report"). Please note below our comments against each of the requirements:

Requirement

Comments

Kindly refer the Annexures 2B and 4B of valuation workings, below.

Requirement

Detailed rationale for arriving at the swap ratio for issuance of shares as proposed in the draft scheme of arrangement by the Board of Directors of the listed company.

Comments

As mentioned in Para 8.1 of the Report, the share exchange ratio has been arrived at on the basis of the relative value of equity shares of SIL and Ambuja, as provided in Annexure 1 of the Report.

(This space has been intentionally left blank)

Requirement

Details of Revenue, PAT, and EBITDA (in value and percentage terms) of entities involved in the scheme for all the number of years considered for valuation under the Income Approach and reasons justifying the EBITDA/PAT margin considered in the valuation report.

Comments

I. Ambuja

(INR Mn)

Particulars	6M FY25	FY26	FY27	FY28
Revenue	184,097.5	520,600.3	633,110.0	732,211.5
EBITDA	44,029.6	110,669.4	148,433.7	184,014.2
EBITDA margin	23.9%	21.3%	23.4%	25.1%

Rationale: As we understand from our discussions with the Management, Ambuja has capacity expansion plans, both through greenfield & brownfield projects, to achieve higher growth in revenue. Further, the company has undertaken various initiatives to improve efficiencies which will result in reduction of the overall cost of production, leading to improvement in margins.

II. SIL

(INR Mn)

Particulars	6M FY25	FY26	FY27	FY28
Revenue	8,930.7	15,303.1	18,835.3	19,857.6
EBITDA	1,148.6	1,381.2	1,803.2	1,805.2
EBITDA margin	12.9%	9.1%	9.1%	9.1%

Rationale: As we understand from our discussions with the Management, SIL has signed Master Service Agreements, whereby entire production of clinker and cement will be sold to Ambuja and ACC Limited ("ACC") with a 10% markup on cost of production. The increasing utilization of available capacity will lead to higher revenue in the projections. However, considering the fixed pricing agreed in the MSA, the EBITDA margins of SIL is expected to remain constant in the projections.

Requirement

Detailed Valuation workings for all entities involved.

Rationale of the Scheme

The Transferee Company is the promoter of the Transferor Company and holds 58.08% of the paid-up equity share capital and 100% of the 8% - non-convertible cumulative redeemable preference shares of the Transferor Company. The Scheme will enable the Transferee Company to integrate the Transferor Company’s operations, leading to more efficient and economical business management. This includes better resource utilization, reduced overheads, cost savings, economies of scale, elimination of duplicated efforts, and streamlined compliance requirements through amalgamation.

The amalgamation will enhance business potential of the Transferor Company, add value to both the companies, and ultimately increase the shareholders’ value.

The amalgamation will lead to reduction and rationalisation of multiple entities in the group.

The Promoters/Persons belonging to the Promoter Group/Persons related to the Promoters Seeking Reclassification: (a) would not hold more than ten percent of the total voting rights in the Transferee Company; (b) do not exercise control over the affairs of the Transferor Company and the Transferee Company either directly or indirectly; (c) do not have any special rights with respect to the Transferor Company and the Transferee Company through any formal or informal arrangements including through any shareholder agreements; (d) do not represent on the board of directors of the Transferor Company and the Transferee Company including a nominee director; (e) do not act as a key managerial personnel in the Transferor Company and the Transferee Company. Accordingly, reclassification of the Promoters/Persons belonging to the Promoter Group/Persons related to the Promoters Seeking Reclassification of the Transferor Company from 'Promoter and Promoter Group' category to 'Public' category in the Transferee Company has been contemplated upon the coming into effect of this Scheme, in accordance with the requirements of Regulation 31A of the SEBI LODR (as defined hereinafter).

*The Company has ongoing litigation with Chief Commissioner of State Tax, Government of Gujarat under Electricity Duty Act regarding the exemption period from payment of electricity duty. The Company had started generating electricity in November 1995 using DG Sets for the purpose of construction of cement plant in November 1995 basis which an application was filed with Electricity Department seeking an exemption for payment of electricity duty for a period of 10 years as per then prevailing provisions of the Gujarat Electricity Duty Act, 1958. In August 1997, Company's application for exemption for payment of Electricity Duty was rejected by Electricity Department on the grounds that the Company had not commenced cement manufacturing activities.

The Company commenced cement manufacturing in April 2002 and reapplied for the exemption of electricity duty for the period starting April 2002 to March 2012. Against Company's application, the electricity department issued exemption certificate for the period of April 2002 to November 2005, interpreting that exemption would be applicable from the date commissioning of DG sets i.e. from November 1995 and not manufacturing date and also in view of the same the authority issued demand of ₹ 3.30 crore vide orders dated March 02, 2006 and April 2006, for the period of November 18, 2005, to February 2006.

The Company filed writ petition challenged department's demand orders claiming that the Company is entitled to exemption from the payment of electricity duty for a period of 10 years from March 2002 on the basis of Section 3(2)(vii) of the Electricity Act with Hon'ble Gujarat High Court In year 2006. The Hon'ble High Court of Gujarat, in their interim order dated May 5, 2006, granted ad-interim relief in the matter.

Since the matter is sub-judice, there is no open demand from the electricity department for the period upto March 2012. Based on management assessment and the advice of external legal counsel, the Company believes it has a strong case on merits for successful appeal in this matter. The Company has recognised a provision of ₹ 43.90 crore (related to principal portion of duty for the period 2007 to 2012) and an amount of ₹ 176.63 crore is assessed as contingent liability towards interest for the dispute period for the period ended June 30, 2025.

For the period post April 2012, a demand of ₹ 161.95 crore (including interest) was raised by Chief Commissioner of State Tax, Gujarat vide their letter dated July 16, 2024 which was deposited by the Company on April 30, 2025, pending settlement of the matter as at reporting date.

The Company, as per the terms Share Purchase Agreement (SPA) dated August 3, 2023, entered between the Promoters of Sanghi Industries Limited, Sanghi Industries Limited (the "Company" or "SIL"), and Ambuja Cements Limited ("Ambuja"), the Company and Ambuja had raised indemnity claims amounting to ₹ 84.31 crore against the demand raised by authorities for the period post April 2012. In view of the default on part of the erstwhile promoters in honoring their indemnity obligations, Ambuja had approached the NCLT, Ahmedabad against the erstwhile promoters under the provisions of Insolvency & Bankruptcy Code, 2016. During the pendency of the proceedings, the erstwhile promoters of the Company have reimbursed ₹ 40 crore against the indemnity claim. The amount as received by Ambuja was transferred to the Company which is disclosed as an exceptional income for the quarter ended June 30, 2025. Management, as per the terms of SPA, has rights to raise further claims for the period pre-2012, in case the matter, which is pending with Hon'ble High Court of Gujarat, is ruled against the Company and demand is raised by the authorities.

5. During the year ended March 31, 2025, the Company had re-assessed carrying value of deferred tax assets in the books by restricting the deferred tax asset to the extent of deferred tax liabilities. The Company had determined that there is no reasonable certainty of utilisation of deferred tax assets on unabsorbed depreciation, carried forward losses and other temporary disallowances under Income Tax Act amounting to ₹ 36.94 crore. Accordingly, deferred tax asset of ₹ 36.94 crore was reversed during the year ended March 31, 2025.
6. During the quarter ended March 31, 2025, the Company had reassessed useful life of Property, Plant & Equipment and depreciation method for Power Plant based on internal and external technical evaluation. Due to above-mentioned changes in estimates, the depreciation expenses for the quarter and year ended March 31, 2025 was higher by ₹ 58.19 crore.

Further, during the quarter ended June 30, 2024, the Company had re-assessed the residual value of Property, Plant & Equipment. Consequently, the depreciation expenses for the quarter ended June 30, 2024 and year ended March 31, 2025 was higher by ₹ 12.75 crore

During the year ended March 31, 2025, the Company had completed allotment of 220 crore RPS of ₹ 10 Each aggregating to ₹ 2,200 crore to the Holding Company in five tranches from 4th July, 2024 to 19th July, 2024. The Company had utilized the proceeds of RPS to repay inter corporate deposits taken from Holding Company and interest thereon of ₹ 2,200 crore.

8. The Company is exclusively engaged in the business of cement and cement related products with sales in the domestic market. Accordingly, there is no separate reportable Segment as per Ind AS 108 "Operating Segment".

9. The Board of Directors of the Company at its meeting held on December 17, 2024, approved the Scheme of Arrangement ("Scheme") between the Company ("Transferor Company"), Ambuja Cements Limited ("Transferee Company") and their respective shareholders under Sections 230 to 232 and other applicable provisions of the Companies Act, 2013 ("Act") w.e.f. appointed date April 1, 2024.

A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. 8. The Company is eligible for various incentives from the Government authorities as per the policies / schemes of respective State / Central Government. Income from such Government incentive / grants including tax credits / refunds has been disclosed separately in these standalone financial results as "Government Grants including duty credits/refunds". Further, the Company was eligible for incentive in the form of exemption of Excise duty on captive consumption of clinker for the period from February 2005 to February 2013 as per notification no. 67/95-CE dated March 16, 1995. The excise authorities, Shimla had denied the above exemption to the Company and accordingly the Company paid the aforesaid duty and expensed the duty amount in the respective earlier financial years. The Company had received an order from the Office of The Assistant Commissioner - Central Goods and Service Tax, Shimla Division dated November 27, 2024 allowing refund of amount paid against exemption of excise duty on captive consumption of clinker by the Company pertaining to Darlaghat unit amounting to ₹ 189.52 Crore. This refund order was allowed pursuant to the order of the Regional bench of Hon'ble Customs, Excise and Service Tax Appellate Tribunal, Chandigarh ("CESTAT") on July 1, 2024 after the Hon'ble Supreme Court vide its judgement dated March 03, 2016 had allowed the appeal in Company's favour which was subsequently denied by the department on different grounds. In relation to incentive claim of ₹ 119 Crore in respect of Company's Farakka plant, in the previous financial year 2024-25, the Hon'ble Supreme Court in its judgement dated September 27, 2024 had rejected the special leave petition submitted by WBIDC for unpaid incentive against the earlier favourable order of Hon'ble Calcutta High Court (directing state government to honour its commitments as per West Bengal Incentive Scheme, 2000). The Company had recognised the incentive pertaining to its Sankrail unit amounting to ₹ 138 Crore in the books considering eligibility, reasonable certainty to ultimately realise the incentive amount in terms of WBIS 2013, basis internal assessment backed up by independent legal opinion and Hon'ble Calcutta High court orders in a similar set of cases.

During the quarter ended June 30, 2025, the Company became aware of the enactment of the "Revocation of West Bengal Incentive Schemes and Obligations in the Nature of Grants and Incentives Act, 2025" w.e.f. Subsequent to the above, the Company has filed a writ petition in respect of its incentive claim for Farakka unit with Hon'ble Supreme Court challenging the validity of the Revocation Act on retrospective basis denying benefits of past incentive schemes, overriding any judgement, order, decree of any court, or direction

of any authority, etc. Further, the Company has also obtained an independent legal opinion on the validity of the aforesaid Revocation Act and possible outcome of the aforesaid writ petition filed by the Company in this regard. Based on the same, the Company has assessed the aforesaid incentives receivable of ₹ 257 Crore (Gross value) as good of recovery. Further, the Company has re-assessed the fair value of the aforesaid incentives on account of change in the estimated recovery timelines of the aforesaid incentive and has recorded an adjustment of ₹ 18.27 Crore in this regard under Government Grants including duty credits/refunds in these standalone financial results.

10. During the year ended March 31, 2025, the Company had re-assessed its tax positions in respect of certain tax liabilities and provisions, including in the nature of interest, based on favorable assessment orders from tax authorities including proceedings before the Board for Advance Ruling (BAR) in respect of specific tax matter, against which tax liabilities and interest provisions were made in the books of Company in the earlier years. Management had also assessed that in view of the favourable appellate orders of past assessment years and consequent receipt of refunds post appellate orders, the amount of tax provisions and liabilities carried in the books of Company were reassessed and accordingly, the expense / credits are recognised in the books. The reversal of an amount of tax provision (net) of ₹ 782.15 Crore was recognised in current tax expense in the books of the Company for the year ended March 31, 2025 (including net of tax provision of ₹ 46.81 Crore made during the quarter ended March 31, 2025).

Further, an aggregate liability towards the interest received and interest provision of ₹ 880.43 Crore, against which no appeals were pending, was reversed in the books of the Company and recognised as credit in the Other income for the year ended March 31, 2025 (including ₹ 301.10 Crore for the quarter ended March 31, 2025).

The director is indicted on three counts, namely (i) alleged securities fraud conspiracy (ii) alleged wire fraud conspiracy and (iii) alleged securities fraud for making false and misleading statements and as per US SEC civil complaint, director omitting material facts that rendered certain statements misleading to US investors under Securities Act of 1933 and the Securities Act of 1934. The Company has not been named in these matters.

Having regard to the status of the above-mentioned matters as at reporting date, and the fact that the matters stated above do not pertain to the Company, there were no impact to the Company as at year ended 31st March 2025. There are no changes to the said conclusions as at and for the quarter ended 30th June 2025.

3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the Institute of Chartered Accountants of India. This standard requires that we plan and perform the review to obtain moderate assurance as to whether the Statement is free of material misstatement. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
4. Based on our review conducted as above, nothing has come to our attention that causes us to believe that the accompanying Statement prepared in accordance with the recognition and measurement principles laid down in the aforesaid Indian Accounting Standards ('Ind AS') specified under Section 133 of the Companies Act, 2013, as amended, read with relevant rules issued thereunder and other accounting principles generally accepted in India, has not disclosed the information required to be disclosed in terms of the Listing Regulations, including the manner in which it is to be disclosed, or that it contains any material misstatement.

14. The Competition Commission of India (CCI), vide its order dated August 31, 2016, had imposed a penalty of ₹ 1,163.91 Crores on the Holding Company and ₹ 1,147.59 Crores on its subsidiary, ACC Limited on grounds of alleged cartelisation. On appeal by the Holding Company and ACC Limited, the Competition Appellate Tribunal (COMPAT), subsequently merged with National Company Law Appellate Tribunal (NCLAT), vide its interim Orders dated November 21, 2016 and November 7, 2016 respectively for the Holding Company and ACC Limited, had granted stay against the CCI's Order with the condition to provide a deposit of 10% of the penalty amount through lien on bank deposit of such amount, which was deposited by the Holding Company and ACC and further in case, the appeal is dismissed, interest at 12% p.a. would be payable on the penal amount from the date of the CCI order. NCLAT, vide its Order dated July 25, 2018, dismissed the appeal by the Holding Company and ACC Limited, and upheld the CCI's order. Against this order, the Holding Company and ACC Limited appealed before the Hon'ble Supreme Court, which, by its Order dated October 05, 2018, had admitted the appeal and directed to continue the Interim order passed by the NCLAT dated November 21, 2016 and November 7, 2016 respectively for the Holding Company and ACC Limited. The matter was fixed for hearing before the Hon'ble Supreme Court on November 27, 2024. However, the matter was not listed, and next date will be notified in due course of time.

In a separate matter, pursuant to a reference filed by the Government of Haryana, the CCI by its Order dated January 19, 2017, had imposed a penalty of ₹ 29.84 Crores on the Holding Company and ₹ 35.32 Crores on ACC Limited on grounds of alleged collusive bidding. On appeal by the Holding Company and ACC Limited, COMPAT had stayed the operation of the CCI's Order. The matter was listed before the NCLAT on May 19, 2025, however the same is adjourned for final hearing from August 11, 2025 to August 13, 2025.

Based on the advice of external legal counsel, the Holding Company believe they have a strong case on merits for successful appeal in both the aforesaid matters. Accordingly, no provision (including interest) is recognised in the books by the Group.

15. During the previous financial year 2024-25, the Holding Company's management became aware of an indictment filed by United States Department of Justice (US DOJ) and a civil complaint by Securities and Exchange Commission (US SEC) in the United States District Court for the Eastern District of New York against a non-executive director of the Holding Company. The Holding Company has not been named in these matters.

18. In respect of captive limestone mining lease operations for manufacturing of cement plant in Wadi, Karnataka, the Subsidiary Company ACC Limited ("ACC") has ongoing dispute with Department of Mines & Geology (DMG), Karnataka, over the basis of royalty calculation since earlier years.

ACC has made various representation in the matter including Revisional Authority (RA) and in previous year, it also approached Hon'ble High Court of Karnataka to ensure continuing mining for manufacturing operations of Wadi Plant on provisional deposit of ₹ 125 crores against the demand of DMG.

As at quarter ended June 30, 2025, the entire matter relating to additional royalty claim and show cause notice for not entering supplementary lease agreement, is pending before Hon'ble High Court of Karnataka. Basis the independent legal opinion, management believes that ACC has a strong case on merits, and no provision is considered necessary in the matter in the financial results for the quarter ended June 30, 2025.

A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

We also performed procedures in accordance with the Master Circular issued by the Securities and Exchange Board of India under Regulation 33(8) of the Listing Regulations, to the extent applicable.
