	Please indicate material responsible business conduct and sustainability issues pertaining to environmental and social matters that present a risk or an opportunity to your business, rationale for identifying the same, approach to adapt or mitigate the risk along-with its financial implications, as per the following format.						
S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)		
1	GHG Emissions	Risk	Automotive parts manufacturing is a high-emission activity subject to scrutiny from key stakeholders including customers, investors, and governments. Customers may require commitments to lower greenhouse gas (GHG) emissions	GHG emissions can be mitigated by (1) Conducting energy audits and identifying areas of energy reduction (2) Increased sourcing of renewable energy. In the current financial year, a total of 60% of	Failure to mitigate GHG emissions could lead to potential business loss, disinterest from specific groups of investors, and increased costs to comply with regulatory requirements. Positive Implications are savings from RE transition. Our product may fall under competitive premiums such as "Green products". Some investors focused on environmental, social, and governance (ESG) criteria may invest only in companies that achieve GHG reduction targets. Additionally, the government is working on implementing a cap-and-trade emissions trading scheme in India.	energy was sourced from renewable sources.	
2	Waste Management	Risk/Opportunity	Improper handling of hazardous waste by waste management contractors presents risks to land, water bodies, and biodiversity. Adopting circular economy principles for waste recycling could provide Sansera with a valuable opportunity to minimise waste generation.	Ensuring that hazardous waste is handled and disposed of only by contractors authorised by the State Pollution Control Board. Circular economy initiatives include (1) recycling of discarded scrap steel and (2) achieving zero waste to landfill.	Negative financial implications may arise as capital expenditure for recycling discarded scrap steel. Additionally, financial costs could result from compensation due to improper handling of hazardous waste. Positive implications may include reduced compliance costs, lowered GHG emissions, and better alignment with the Sustainable Development Goals (SDG).

3	Energy management	Opportunity	Sansera's manufacturing process consumes a substantial amount of energy, and conserving energy not only improves our financial performance but also supports achieving our emissions reduction goals.	Identifying areas for energy reduction and implementing appropriate measures — all Sansera plants are certified under ISO 50001 (2018) for Energy Management Systems.	Negative financial implications could result in the form of capital expenditure for implementation of energy reduction initiatives. Positive implications to the company's business could result from initiatives taken around energy management attracting customers aligned to sustainable businesses.
4	Product Responsibility	Risk	The risk involves enhanced solutions that address new requirements, especially environmental and social aspects, technological advancements, upgrades, or current market demands.	Greater emphasis on the manufacturing of EV products.	Negative financial implications for the business could result from delays in innovation required by the evolving market landscape. Positive implications include gaining trust from customers and investors.
5	Occupational Health and Safety	Risk	Occupational Health & Safety (OH&S) impacts both individuals and the local community and has the potential to disrupt operations. Risks to employees and workers include physical hazards, chemical exposure,	Sansera has taken various measures to mitigate occupational health and safety risks including: 1. Adoption of organization wide Integrated Policy on Environment Health	Negative financial implications could arise from loss of productivity due to lost man-hours or impact on reputation in case of community incidents. Positive Implications can lead to reduced Incidents.

Safety and Quality Management System. 2. Trainings, internal audits for all SOPs on Operational Health and safety. 3. Maintenance of HIRA (Hazard Identification and Risk Assessment) 4. All plants are certified for ISO 45001 5. Periodic medical checkup for all employees and workers 6. Monitoring of environmental parameters as per PCB standards	
6	Diversity, Equity, Inclusion	Opportunity	Diversity, Equity, and Inclusion (DEI) present significant opportunities for Sansera to foster a more inclusive and equitable workplace, strengthen employee engagement, improve customer satisfaction, and build a positive brand reputation.	Sansera is consciously working to improve the female employee strength across different functions.	Positive financial implications of a more diverse workforce and regulatory compliance.

7	Sustainable Supply Chain	Risk	Failure to ensure sustainable practices throughout the supply chain, such as responsible sourcing of raw materials, waste management, and compliance with environmental regulations, can result in reputational damage and potential legal consequences. Ethical and social responsibility risks include issues such as labour rights violations, human rights abuses, child labour, or unsafe working conditions within supplier facilities.	Sansera has taken various measures to mitigate risks arising in the supply chain including: 1. Adopting policies for responsible sourcing namely, Supplier Responsible Sourcing of Natural RM Policy, Sustainable Procurement Policy, and Sansera Principles to Enhance Sustainability Performance in the Supply Chain and Sansera policy on Conflict Minerals 2. Sansera's suppliers are required to sign commitments to the policies (except Sansera policy on Conflict Minerals). 3. System & sustainability assessments are conducted before onboarding suppliers	Negative financial implications could arise from impacts on business reputation. Small suppliers may lack resources for compliance. Positive Implications lead to reduce waste & energy cost. It helps in maintaining regulatory compliance.

8	Information Security	Risk	Risks arise from being a target of cyberattacks, including ransomware, malware, and phishing attempts. These could lead to exploitation of vulnerabilities in networks, or software, to gain unauthorized access to the company's sensitive data or disrupt critical systems. Data breaches can occur due to external attacks, insider threats, or inadequate security measures, leading to unauthorized access, theft, or exposure of confidential information.	Sansera has deployed and implemented various technical tools and controls to mitigate Information Security risks including but not limited to: 1. End Point and Servers Protection: CrowdStrike Falcon Complete (EDR) – Protection against Ransomware, Malware etc. 2. Network Perimeter: UTP (Unified Threat Protection) – Protection against external threat / intruders 3. Device Control – includes Bluetooth, External USB Drive, Card Readers etc. 4.	Negative financial implication arising from brand reputation of the company. It also implies costs on AI tools set up and SOC. 10	Health and safety management system:	
a	Whether an occupational health and safety management system has been implemented by the entity? (Yes/ No). If yes, the coverage such system?	Yes, the Health and Safety Management system covers activities across most of our manufacturing locations, offices, research laboratories and supply chain partner and ensures the protection of environment and health & safety of the Company's employees, contractors, visitors, and relevant stakeholders. 14 out of 18 plants are covered by ISO - 45001 (TUV NORD).

b	What are the processes used to identify work-related hazards and assess risks on a routine and non-routine basis by the entity?	The Company has implemented a Hazard Identification and Risk Assessment (HIRA) system for identifying workplace hazards, undertaking risk assessments, implementing necessary controls to mitigate and address risks. SEL identifies possible workplace incidents using a hazard identification process, followed by a likelihood assessment to estimate their frequency or probability. Measures are then implemented to either prevent these incidents by reducing their likelihood or control them to limit their extent and duration, thereby mitigating adverse effects or consequences. In addition to this, the Company has prepared an Emergency Preparedness Plan, and OCP - Operation control procedure/Standards to minimise work-related hazards, among others. SEL ensures HIRA for all activities and products and conducts HIRA studies on an annual basis or as and when required. The necessary guidelines are implemented in line with ISO 45001.
c	Whether you have processes for workers to report the work-related hazards and to remove themselves from such risks. (Y/N)	Yes, several methods have been put in place to report work-related hazards in accordance with ISO 45001, including safety patrols, risk assessments, and near-miss reporting etc. Work-related hazards are reported using the respective formats to the Plant EHS Officer, who in turn reports to the Plant head and maintenance team. Corrective measures, if any, are then identified and implemented by the Plant EHS and maintenance team. To mitigate work-related hazards, SEL conducts emergency mock drills and awareness sessions to prepare its employees and workers.
d	Do the employees/ worker of the entity have access to non-occupational medical and healthcare services? (Yes/ No)	Yes, employees/workers of the entity have access to non-occupational medical and healthcare services. These include services for issues such as road accidents, medical insurance for employees and provision of Company ambulance facilities in case of any emergency (extended to families of the employees). The Company ensures overall well-being of its employees and workers by providing health insurance, term insurance, accident insurance, regular health check-ups and workshops for the mental well-being.

6	Provide details of any corrective actions taken or underway to address significant risks / concerns arising from assessments of health and safety practices and working conditions of value chain partners.	After the sustainability assessment of value chain suppliers, a timeline and target are issued to enable corrective actions and close identified gaps. A follow-up audit is conducted to ensure compliance with Sansera's requirements. Previously, GHG emissions data was not captured; however, it is now actively monitored and submitted to customers as needed. Initially, carbon reduction goals were not included in the EHS objectives, but these goals are now clearly defined. Treated effluent was not considered in environmental aspects and hazard identification but has since been incorporated into the assessment of aspects, impacts, hazards, risks, control measures, opportunities, and impact magnitude. A grievance mechanism was previously unaddressed but is now in place and managed by human resources and the management team. Based on recommendations, smoke detectors have been installed in the goods storage area. Additionally, first aid cases are now analysed to better understand their root causes.

11	Provide details of any corrective actions taken or underway to address significant risks / concerns arising from the assessments at Question 9 above.	No concerns were raised during the assessments that required corrective action.

LEADERSHIP INDICATORS

1	Details of a business process being modified / introduced because of addressing human rights grievances/complaints.	The Company strives to sensitise employees and workers on human rights through its training programs. As there were no grievances related to human rights, no business process was modified or introduced.
2	Details of the scope and coverage of any Human rights due diligence conducted	Sustainability audit conducted by the customers. The Responsible Business Alliance conducted by OEMs covered a range of topics including human rights, child labour, forced labour, working hours, overtime control, health and safety, freedom of movement, and wages.
3	Is the premise/office of the entity accessible to differently abled visitors, as per the requirements of the Rights of Persons with Disabilities Act, 2016?	For visitors with disabilities, Sansera Engineering Limited has a visitor's office on the ground floor in certain premises.
4	Details on assessment of value chain partners:	
		% of value chain partners (by value of business done with such partners) that were assessed

	Child labour	65%
	Forced/involuntary labour	65%
	Sexual harassment	65%
	Discrimination at workplace	65%
	Wages	65%
	Others – please specify	65%
5	Provide details of any corrective actions taken or underway to address significant risks / concerns arising from the assessments at Question 4 above.	No concerns were raised during the assessments that required corrective action.

ESSENTIAL INDICATORS

1	Details of total energy consumption (in Joules or multiples) and energy intensity, in the following format:		
	Parameter	FY 2024-25 (Current Financial Year)	FY 2023-24 (Previous Financial Year)

	Energy intensity per rupee of turnover adjusted for Purchasing Power Parity (PPP) (Total energy consumed / Revenue from operations adjusted for PPP) (in GJ/ ₹Mn adjusted for PPP)	462.68	457.91
	Energy intensity in terms of physical output (in GJ/ unit of product)	0.00426	0.00462
	Energy intensity (<i>optional</i>) – the relevant metric may be selected by the entity		-
	Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.	Yes, TUV SUD	

****Note:** 1) Total fuel consumption value changed for the year **2023-24** due to re-consideration in **PNG conversion factor** and mobile consumption data under **contract services** (Scope 3 emissions). Hence the Energy Intensity changes accordingly.

2	Does the entity have any sites / facilities identified as designated consumers (DCs) under the Performance, Achieve and Trade (PAT) Scheme of the Government of India? (Y/N) If yes, disclose whether targets set under the PAT scheme have been achieved. In case targets have not been achieved, provide the remedial action taken, if any.
	Not applicable to Sansera, as we are not a designated consumer

3	Provide details of the following disclosures related to water, in the following format:

5	Has the entity implemented a mechanism for Zero Liquid Discharge? If yes, provide details of its coverage and implementation	The Company operates treatment plants that reuse treated water for gardening purposes at most facilities. Both Effluent Treatment Plants (ETP) and Sewage Treatment Plants (STP) are implemented. Among the 17 plants, 4 have both ETP and STP, while 15 have STP. Additionally, two non-manufacturing plants utilize a soak pit and septic tank. The treated water from these systems is repurposed for gardening. Specifically, Plant 4 in Manesar and Plant 6 in Rudrapur have wastewater treatment systems, with the treated water subsequently sent to the Common Effluent Treatment Plant (CETP).

	Persistent organic pollutants (POP)		BDL	BDL
	Volatile organic compounds (VOC)		BDL	BDL
	Hazardous air pollutants (HAP)			SEL undertakes third-party lab testing for each of these air emission parameters, including NOx and SOx on a quarterly basis at all its locations to ensure the parameters are within permissible limits. This is done in addition to the Company's internal monitoring systems. The Company also submits the reports to the concerned authority and pollution board
	Others – please specify			
	Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.	Yes, Madhav Associates approved by MoEF. MITCON Consultancy & Engineering Services Ltd. Pune - MoEF approved lab. Universal analysis lab- NABL – TC5023 – Haryana Win met technologies private limited – UP – MoEF approved lab		
7	Provide details of greenhouse gas emissions (Scope 1 and Scope 2 emissions) & its intensity, in the following format:			
	Parameter	Unit	FY 2024-25 (Current Financial Year)	FY 2023-24 (Previous Financial Year)
	Total Scope 1 emissions (Break-up of the GHG into CO2, CH4, N2O, HFCs, PFCs, SF6, NF3, if available)	CO2 in MT	7632.71	6697.86
	Total Scope 2 emissions (Break-up of the GHG into CO2, CH4, N2O, HFCs, PFCs, SF6, NF3, if available)	CO2 in MT	40,584.61	39,693.85

	Total Scope 1 and Scope 2 emission intensity in terms of physical output	TCO ₂ e/unit of product	0.00037	0.00039
	Total Scope 1 and Scope 2 emission intensity (<i>optional</i>) – per ton of production	CO ₂ in MT/ton of production	-	-
	Note: Indicate if any independent assessment/evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.	Yes, Limited assurance has been carried out by an external agency (TUV SUD)		

****Note: Scope 1 for the year 2023-24 changed due to**

- 1) Re-consideration of conversion factor for PNG as it was earlier considered in SCM
- 2) Previously Lubricant was considered in Scope 1. However, it is considered under scope 3 emission Inventory.
- 3) Contract services for mobile consumption were considered previously. This changes as the Inventory will fall under scope 3 emissions.
- 4) As the Scope 1 changes, the emission Intensity for 23-24 also changes accordingly.

Scope 3 emissions

Parameter	Unit	FY 2024-25	FY 2023-24
Total Scope 3 emissions (Break-up of the GHG into CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs, SF ₆ , NF ₃ , if available)	Metric tonnes of CO ₂ equivalent	3548.33	3883.87
Total Scope 3 emissions per rupee of turnover	Tonnes of CO ₂ e per rupee of turnover	0.13	0.15
Total Scope 3 emission intensity (optional) – the relevant metric may be selected by the entity	Tonnes of CO ₂ e per rupee of turnover	—	—

Note: Scope 3 emissions are considered for three categories such as Employee commuting, Business travel and Waste generated from Operations. Sansera is working on further applicable categories. Over 90% of the waste generated from operations are recycled such as steel scrap, boring scrap, aluminium scrap etc.

8	Does the entity have any project related to reducing Green House Gas emission? If yes, then provide details.	Yes, Sansera has various projects to reduce greenhouse gas emissions. Introduced fluke machines to detect leakage in compressors. 1200 kW solar rooftop available in 4 plants. SEC (Specific energy consumption)
----------	--	--

		reduction year on year as part of EnMS (Energy management system) journey. Additional 400 KWP solar roof top installed in Plant 5. Wind & Solar energy procurement - 60% of total consumption across all plants (90% in Karnataka plants) Auto cutoff of machinery and equipment power during idle time. Hydraulic Intermittent power pack is Introduced to reduce power consumption. More than 90,000 KWH is saved through washing machine (OMETA Oil) for machines. Usage of Heat pump instead of electric heater for washing machine. Acs is replaced with Inverter Acs. Procurement of IE3 and IE4 motors with 93% to 95% energy efficiency Waste heat recovery by using compressors in washing machines in place of electric heaters Aluminium transient pipes are used for compressed air distribution to reduce pressure loss. Energy efficient air screw compressors procured. Energy efficiency considered in inbuilt SPM machines. Pumps and motors have been optimized for lesser power consumption in Sansera deep hole drilling machines. LPG to PNG conversion in all plants. Photosensors adopted for lightings.	
9	Provide details related to waste management by the entity, in the following format:

****Note: Recycled waste in 2023-24 changed due to calculation differences.**

10	Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.	Sansera has established the following waste management practices: 1. Segregation of all the waste at source with colour coded bins. 2. Separate storage locations for both Hazardous and non-hazardous waste. (Stored via 3C method- covered, concrete, container) and non-hazardous waste (stored via 3C method) 3. Maintained quantity register for generation and disposal (Form -3, 8 & 10) 4. Sansera has a Monitoring & Measurement Plan where Initiatives like recollection of cotton waste & recollection of used oil by using centrifugal pump, re-use of plastic bins & cans are undertaken. 5. Procedure for waste management Environment Occupational Health and safety Procedure-20 ,23A & 24) is followed.

11	If the entity has operations/offices in/around ecologically sensitive areas (such as national parks, wildlife sanctuaries, biosphere reserves, wetlands, biodiversity hotspots, forests, coastal regulation zones etc.) where environmental approvals / clearances are required, please specify details in the following format:		
S. No.	Location of operations/ offices	Type of operations	Whether the conditions of environmental approval / clearance are being complied with? (Y/N) If no, the reasons thereof and corrective action taken, if any.
	SEL does not have any plants around ecologically sensitive areas (such as national parks, wildlife sanctuaries, biosphere reserves, wetlands, biodiversity hotspots, forests and coastal regulation zones).		

12	Details of environmental impact assessments of projects undertaken by the entity based on applicable laws, in the current financial year:					
S. No.	Name and brief details of project	EIA Notification No.	Date	Whether conducted by independent external agency (Yes / No)	Results communicated in public domain (Yes / No)	Relevant Web link
	Not Applicable					

13	Is the entity compliant with the applicable environmental law/ regulations/ guidelines in India; such as the Water (Prevention and Control of Pollution) Act, Air (Prevention and Control of Pollution) Act, Environment protection act and rules thereunder (Y/N). If not, provide details of all such non-compliances, in the following format:	Yes, SEL is compliant with all the applicable environmental laws.		
S. No.	Specify the law / regulation / guidelines which was not complied with	Provide details of the non-compliance	Any fines / penalties / action taken by regulatory agencies such as pollution control boards or by courts	Corrective action taken, if any

LEADERSHIP INDICATORS

1	Water withdrawal, consumption and discharge in areas of water stress (in kilolitres):					
	For each facility / plant located in areas of water stress, provide the following information:					
	(i) Name of the area	Sansera does not withdraw, consume or discharge water in areas of water stress.				
	(ii) Nature of operations					
	(iii) Water withdrawal, consumption and discharge in the following format:					
	Parameter	FY 2024-25 (Current Financial Year)	FY 2023-24 (Previous Financial Year)

					With treatment – please specify level of treatment	
				Others	No treatment	
					With treatment – please specify level of treatment	
				Total water discharged (in kilolitres)		
				Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.		No

3With respect to the ecologically sensitive areas reported at Question 11 of Essential Indicators above, provide details of significant direct & indirect impact of the entity on biodiversity in such areas along-with prevention and remediation activities. SEL does not have any plants around ecologically sensitive areas (such as national parks, wildlife sanctuaries, biosphere reserves, wetlands, biodiversity hotspots, forests and coastal regulation zones, among others). The Company is in industrial areas/estates, as a result its impact on biodiversity is minimal.

4	If the entity has undertaken any specific initiatives or used innovative technology or solutions to improve resource efficiency, or reduce impact due to emissions / effluent discharge / waste generated, please provide details of the same as well as outcome of such initiatives, as per the following format:		
S. No.	Initiative undertaken	Details of the initiative (Web-link, if any, may be provided along-with summary)	Outcome of the initiative
1	Efficient preventive maintenance measures for DG and furnaces	Periodical maintenance is carried out to avoid unwanted breakdowns	Increased efficiency
2	STP and ETP	STP - waste water is treated and used for gardening ETP - Effluents are treated and sent to an authorised agency and treated water is used for gardening	Reduced water consumption
3	Solar and wind energy usage	Solar and wind are power used for utility power consumptions	CO2 emission reduced (Scope 2)
4	Eco-friendly coolant used to reduce load on the ETPs	Eco-friendly-based coolant is used to increase the life and reduce the operating cost of the ETP	Reduced natural resource consumption

5	Does the entity have a business continuity and disaster management plan? Give details in 100 words/ web link.	The company has established a robust enterprise risk management framework and processes, focusing on the proactive identification and treatment of risks to mitigate their impacts effectively. It allocates adequate resources and management energy towards ensuring business continuity management systems are resilient. Internal systems and capabilities are continually improved with redundancies to enhance operational reliability. The organization adheres to BCMS and Disaster Management Plans aligned with National Disaster Management Authority guidelines, ensuring readiness to manage such circumstances adeptly. Compliance with relevant laws, regulations, and international standards, including ISO 22301, is rigorously maintained across all operational areas. The company prioritizes policy communication, stakeholder training, and regular testing to ensure organizational readiness, with periodic reviews for continuous improvement. Additionally, plans are underway to implement a public addressing system for Plant 12 in 2025.
6	Disclose any significant adverse impact to the environment, arising from the value chain of the entity. What mitigation or adaptation measures have been taken by the entity in this regard.	SEL conducts systemic assessments before onboarding a supplier. If the supplier is determined to be at high risk (significant impact to the environment), the supplier is not onboarded. Through this process the Company endeavours to minimise the impact of the value chain on the environment. Wastewater, air quality, noise pollution aspects are covered in these assessments.
7	Percentage of value chain partners (by value of business done with such partners) that were assessed for environmental impacts.	65%

P7 Businesses, when engaging in influencing public and regulatory policy, should do so in a manner that is responsible and transparent

ESSENTIAL INDICATORS

1a	Number of affiliations with trade and industry chambers/ associations.	6

Other than as described in the preceding paragraph, which sets out the scope of our engagement, we did not perform assurance procedures on the remaining information included in the integrated reporting, and accordingly, we do not express a conclusion on this information. It was not part of our engagement to review product- or service-related information, references to external information sources, expert opinions and future-related statements in the Report.

Responsibility of the Company

The legal representatives of the Company are responsible for the preparation of the sustainability information in accordance with the Reporting Criteria. This responsibility includes in particular the selection and use of appropriate methods for sustainability reporting, the collection and compilation of information and the making of appropriate assumptions or, where appropriate, the making of appropriate estimates. Furthermore, the legal representatives are responsible for necessary internal controls to enable the preparation of a sustainability report that is free of material - intentional or unintentional - erroneous information.

Verification methodology and procedures performed

The verification engagement has been planned and performed in accordance with the verification methodology developed by the TÜV SÜD Group, which is based upon the ISAE 3000 (Revised), and ISO 17029. The applied level of assurance was "limited assurance". Because the level of assurance obtained in a limited assurance, the engagement is lower than in a reasonable assurance engagement, the procedures the verification team performs in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. A limited assurance engagement consists of making inquiries, primarily of persons responsible for the preparation of the Sustainability information and applying analytical and other limited assurance procedures.

The verification was based on a systematic and evidence-based assurance process limited as stated above. The selection of assurance procedures is subject to the auditor's own judgment.

The procedures included amongst others:

- Inquiries of personnel who are responsible for the stakeholder engagement und materiality analysis to understand the reporting boundaries.
- Evaluation of the design and implementation of the systems and processes for compiling, analysing, and aggregating sustainability information as well as for internal controls
- Inquiries of company's representatives responsible for collecting, preparing and consolidating sustainability information and performing internal controls

- Analytical procedures and inspection of sustainability information as reported at group level by all locations.
- Assessment of local data collection and management procedures, along with control mechanisms, through offsite verification and onsite survey at selected multiple sites:

Conclusion

Based on the assessment procedures carried out from 02-06-2025 to 20-06-2025, TÜV SÜD has not become aware of any facts that lead to the conclusion that the selected sustainability information has not been prepared, in all material aspects, in reference to the Reporting Criteria.

Limitations

The assurance process was subject to the following limitations:

The subject matter information covered by the engagement are described in the "scope of the engagement". Assurance of further information included in the integrated reporting was not performed. Accordingly, TÜV SÜD do not express a conclusion on this information.

Financial data were only considered to the extent to check the compliance with the economic indicators provided by the GRI Standards and were drawn directly from independently audited financial accounts. TÜV SÜD did not perform any further assurance procedures on data, which were subject of the annual financial audit.

The assurance scope excluded forward-looking statements, product- or service-related information, external information sources and expert opinions.

Use of this Statement

The Company must reproduce the TÜV SÜD statement and possible attachments in full and without omissions, changes, or additions.

This statement is by the scope of the engagement solely intended to inform the Company as to the results of the mandated assessment. TÜV SÜD has not considered the interest of any other party in the selected sustainability information, this assurance report or the conclusions TÜV SÜD has reached. Therefore, nothing in the engagement or this statement provides third parties with any rights or claims whatsoever.

Independence and competence of the verifier

TÜV SÜD South Asia Pvt Ltd. is an independent certification and testing organization and member of the international TÜV SÜD Group, with accreditations also in the areas of social responsibility and environmental protection. The assurance team was assembled based on the knowledge, experience and qualification of the auditors. TÜV SÜD South Asia Pvt Ltd hereby declares that there is no conflict of interest with the Company.
