Dear Sir/Madam,

Subject: Submission of Press Release on Commissioning of 3 MW Solar Power Plant at Kutch Facility

Pursuant to Regulation 30 of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015, and in continuation of our disclosures made from time to time, we hereby submit the enclosed Press Release issued by the Company regarding the commissioning of its 3 MW solar power plant at Moda village, Rapar Taluka, Kutch, Gujarat.

The solar power plant has been established with an investment of approximately ₹7.5 Crore and will be utilised entirely for captive consumption by the Company. The plant is expected to generate annual power cost savings of approximately ₹3 Crore and meet around 40% of the total electricity requirement of the Kutch facility.

The commissioning of the solar power plant further strengthens the Company's renewable energy footprint and its focus on improving operational efficiency, reducing power costs and promoting sustainable and energy-efficient manufacturing operations.

You are requested to take the same on your records.

Thanking you,

Yours faithfully,

For, Sanstar Limited

Commissions 3 MW Solar Power Plant at Kutch
Covers around 40% of Kutch Facility's Electricity Requirement

Ahmedabad, 12th August 2026: Sanstar Limited ("Sanstar" or the "Company") (BSE: 544217 | NSE: SANSTAR) one of the largest producers of maize based specialty products and ingredient solutions in India, today announced the commissioning of its 3 MW solar power plant at Moda village, Rapar Taluka, Kutch, Gujarat.

The solar power plant has been set up with an investment of approximately Rs. 7.5 Crore and will be utilised entirely for captive consumption by Sanstar. The project has been undertaken primarily to reduce the Company's power costs.

The 3 MW solar plant is expected to generate annual power cost savings of around Rs. 3 Crore and meet approximately 40% of the total electricity requirement of the Kutch facility. The project is therefore expected to support the Company's efforts towards improving cost efficiency while increasing the share of renewable energy in its power consumption.

The commissioning of the plant further strengthens Sanstar's focus on sustainable and energy efficient operations. The new 3 MW solar capacity adds to the Company's existing 3.5 MW solar power capacity and 1.6 MW of biogas based power capacity at its Dhule facility, further strengthening the renewable energy footprint and ESG initiatives. With these initiatives, a substantial portion of the Company's current power requirements has already been transitioned to renewable sources.

Commenting on the development, Mr. Gouthamchand Chowdhary, Chairman and Managing Director said:

"The commissioning of our 3 MW solar power plant at Kutch is an important step in our continued focus on improving operational efficiency while strengthening our commitment to sustainable manufacturing. The project has been undertaken with a clear focus on reducing our power costs and increasing the contribution of renewable energy to our operations. This initiative further strengthens our renewable energy footprint, building on our existing solar and biogas based power capacity. Going forward, we will continue to explore opportunities to integrate renewable energy and resource efficient solutions across our operations, in line with our broader sustainability objectives and our focus on creating long term value for our stakeholders."

About Sanstar:

Sanstar Limited is one of India's leading corn based specialty products and ingredient solutions companies, engaged in the manufacture of starch, glucose, modified starches, dextrose and other corn derivatives. Sanstar operates state of the art manufacturing facilities and serves a diverse range of industries including food and beverage, pharmaceuticals, animal nutrition, paper, and textiles. Sanstar is committed to sustainable, responsible manufacturing and consistently investing in technology led growth. Recently, Sanstar commissioned its new facility at Dhule plant, taking the total installed capacity from 1,100 TPD to 2,350 TPD of processing maize based speciality products.
