Quick Heal® Technologies Receives ICSA Labs Excellence in Information Security Testing Award

Global Security Company Honored for Five Years of Continuous ICSA Labs Information Security Testing

Boston – February 29, 2016 – Quick Heal Technologies today announced it has been named a 2016 Excellence in Information Security Testing Award recipient by ICSA Labs for successful completion of five years of continuous ICSA Labs information security testing.

The Excellence in Information Security Testing (EIST) Award recognizes clients that have continually tested their products and maintained their information security certification with ICSA Labs. ICSA Labs' clients benefit by working closely with technical analysts, leveraging criteria for product development, accessing research and participating in consortia, all with the objective of contributing to improved products that benefit customers and the security ecosystem.

Upon accepting the award, Sanjay Katkar, Co-founder, Chief Technology Officer, Quick Heal Technologies Ltd. said, "For more than 20 years now, Quick Heal has been dedicated to addressing the best interests of our customers. Being recognized by ICSA Labs is a major proof point of our longstanding commitment to excellence through ongoing testing, certification and best practices."

Quick Heal, a global security company, launched its Seqrite product line in North America last year. Seqrite provides small-to-midsize enterprises (SMEs) what they need to thwart internal and external threats, cyberattacks and malicious intents before they strike, all through a simple-to-use, cloud interface. Offered through the North American IT channel, Seqrite delivers cross-platform support for Apple, Windows, iOS and Android endpoints, along with servers and networks/gateways, and total mobile device management.

"It requires a full commitment to achieve and maintain ICSA Labs' information security certification," said George Japak, managing director, ICSA Labs. "ICSA Labs' Excellence in Information Security Testing (EIST) Awards recognizes Quick Heal's dedication to their continued quality improvement process and their contribution to a more secure environment for the industry."
