Dear Sir/Madam,

Sub: Disclosure under Regulation 30 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 – Execution of Time Charter Party Agreement

With reference to the above-mentioned subject, we hereby inform you that Shreeji Shipping Global Limited has entered into a Time Charter Party Agreement with AMNS Shipping and Logistics Private Limited (CIN: U63000GJ2021PTC126941) on September 07, 2026 for deployment of its vessel "MV Sanghi Sudarshan" for coastal cargo movement along the Indian coastline.

MV Sanghi Sudarshan is an approximately 4,400 DWT all-weather coastal vessel with a low draft of approximately 4.5 metres, enabling efficient coastal operations and access to ports and locations having draft limitations. Originally built for carriage of clinker cargo, the vessel has been modified by the Company to meet the specific requirements of its customer for carriage of steel coils, including the requisite strengthening and class certifications. The deployment of the vessel reflects the Company's ability to customise and adapt its assets to meet customer-specific and industry-specific logistics requirements.

This engagement builds upon the Company's earlier foray into long-term coastal cargo movement through the deployment of "MV SJ LILY" by its wholly owned subsidiary, Shreeji Global IFSC Private Limited, under a Time Charter Party Agreement with AMNS Shipping and Logistics Private Limited. The deployment of MV Sanghi Sudarshan marks a further step in expanding the Company's coastal shipping capabilities and strengthening its presence across the Indian coastline, complementing its established expertise in stevedoring, lighterage and cargo handling.

The vessel operates on VLSFO fuel oil instead of diesel, providing an operating cost advantage. Further, its ICV status provides additional operational flexibility on certain routes, enabling more efficient voyage planning, reduction in nautical miles sailed and voyage duration and, consequently, optimisation of transportation cost on a per-tonne-mile basis. The combination of its cargo carrying capacity, shallow-draft capability, fuel efficiency, ICV status and customer-specific configuration make the vessel particularly suited for coastal transportation of steel cargo. These features are expected to enable more efficient cargo movement and optimise the customer's overall logistics cost, while also demonstrating the Company's ability to develop customised maritime solutions around specific customer requirements.

The Company remains focused on identifying and pursuing further opportunities in coastal movement and maritime logistics, with a view to expanding its operational footprint and strengthening its long-term business prospects.
