**Subject: Intimation under Regulation 30 of SEBI (LODR) Regulations, 2015 – Launch of AI-based Product by Subsidiary Company**

Respected Sir/Madam,

With immense pleasure, we here inform to your office that one of our subsidiary viz., **Ai4Pharma Tech Limited** has displayed and successfully launched its First AI-driven product, “**ChatGMP**”, a pharmaceutical domain-trained conversational platform based on Generative AI technology built exclusively for pharmaceutical teams working in GMP-regulated environments.

Unlike generic chatbots, **ChatGMP** is designed from the ground up to understand the language, compliance requirements, and operational nuances of pharma teams — enabling smarter, faster, and compliant communication across departments.

**Key Features of ChatGMP:**

- **Comprehensive Data Access**  
ChatGMP aggregates inspection data from multiple FDA sources, competitor profiles, and historical compliance records. No more jumping across websites or manually pulling data—everything is in one place.
- **Smart Query Functionality**  
Have a question like “What were the top FDA 483 observations in the last year for sterile facilities?”? Just ask ChatGMP. The platform understands complex queries and returns structured, contextual answers.
- **Versatile Data Analysis**  
ChatGMP doesn’t just provide data—it helps you analyze it. Identify trends, flag risk areas, and compare competitor performance across geographies or product types.
- **Time Efficiency and Quick Decision-Making**  
By automating data gathering and simplifying analysis, ChatGMP slashes the time it takes to make critical compliance decisions.
