TARIFF-HAPPY TRUMP STRUGGLING WITH HIGH CONSUMER PRICES

Inflation Forces US Duty Cut on Key Food Staples

Washington: President Donald Trump announced Friday that he was scrapping US tariffs on beef, coffee, tropical fruits and a broad swath of other commodities — a dramatic move that comes amid mounting pressure on his administration to better combat high consumer prices.

Trump has built his second term around imposing steep levies on goods imported into the United States in hopes of encouraging domestic production and lifting the economy. His abrupt retreat from his signature tariff policy on so many staples key to the American diet is significant, and it comes after voters in off-year elections this month cited economic concerns as their top issue, resulting in big wins for Democrats in Virginia, New Jersey and other key races around the country.

"We just did a little bit of a roll-back on some foods like coffee," Trump said aboard Air Force One as he flew to Florida hours after the tariff announcement was made. Pressed on his tariffs helping to increase consumer prices, Trump acknowledged, "I say they may, in some cases" have that effect. "But to a large extent they've been borne by other countries," he added.

Meanwhile, inflation—despite Trump's pronouncements that it

US President Donald Trump speaks to reporters on Friday AP

has vanished since he took office in January—remains elevated, further increasing pressure on US consumers. The Trump administration has insisted that its tariffs had helped fill government coffers and weren't a major factor in higher prices at grocery stores around the country. But Democrats were quick to point Friday's move as an acknowledgement that Trump's policies were hurting American pocketbooks.

"President Trump is finally admitting what we always knew: his tariffs are raising prices for the American people," Virginia Democratic Rep. Don Beyer said in a statement. "After getting drubbed in recent elections because of voters' fury that Trump has broken his promises to fix inflation, the

White House is trying to cast this tariff retreat as a 'pivot to affordability.'"

GROCERY BILL WORRIES

Trump slapped tariffs on most countries around the globe in April. He and his administration still say that tariffs don't increase consumer prices, despite economic evidence to the contrary.

Record-high beef prices have been a particular concern, and Trump had said he intended to take action to try and lower them. Trump's tariffs on Brazil, a major beef exporter, had been a factor.

Trump signed an executive order that also removes tariffs on tea, fruit juice, cocoa, spices, bananas, oranges, tomatoes and certain fertilizers. Some of the products covered aren't produced in the United States, meaning that tariffs meant to spur domestic production had little effect. But reducing the tariffs will still likely mean lower prices for US consumers.

The Food Industry Association, which represents retailers, producers and a variety of related industry firms and services, applauded Trump's move to provide "swift tariff relief," noting that import US taxes "are an important factor" in a "complex mix" of supply chain issues. AP

New Places in Popular Countries

From Page 1

The Commonwealth of Independent States (CIS) is a grouping of former Soviet Union republics. There is also no need for invitations or hotel confirmations. By 2030, Moscow expects to host up to six million international tourists annually, driven largely by travelers from India, China, the Asia-Pacific region and West Asia.

In the first eight months of 2025, Vietnam recorded 443,000 visitors from India, marking a 42.2% rise from the year earlier. That compares with 392,000 Indian visitors in 2023 and 507,000 in 2024. Because of rising interest, MakeMyTrip has launched holiday packages to Phu Quoc, Vietnam, with exclusive direct flights operated by Air India Express starting from next month. The island currently has no direct connectivity from India.

"New destinations are emerging within already popular markets such as Thailand and Vietnam and are driving demand," said MakeMyTrip cofounder and group CEO Rajesh Magow. "We're seeing a healthy uptick for the Philippines as well as it has done away with visas for Indians. Geopolitical developments seem to have impacted bookings for Azerbaijan and Turkey."

As per preliminary data from the Japan National Travel Organization, the island nation saw 233,400 visitor arrivals from India in the January-September period, up 36.6% from the year earlier. Travel company Thomas Cook (India) said destinations like Japan, Vietnam and Sri Lanka have made a strong showing this year. "Additionally, an appreciating Indian rupee versus the Sri Lankan rupee and Vietnam's dong has served to make the destinations even

more attractive and this is reflecting in our numbers," said Rajeev Kale, president and country head for holidays, MICE and visa. "Increased demand for Japan, is resulting in extended stays and we have been able to include new locales like Sapporo in addition to Tokyo, Kyoto, and Osaka."

In the first nine months of this year, Georgia saw 103,968 Indian visitors, up 19%. India is one of the country's most promising and fast-growing source markets, said Maria Omiadze, head, Georgian National Tourism Administration.

"This strong trend reflects the growing momentum of our cooperation with Indian travel partners, enhanced flight connectivity, and the rising appeal of Georgia's diverse offerings from history and culture to gastronomy and nature," she said.

Between January and September this year, South Korea received 153, 619 Indian visitors, up 13% over the same period last year.

Ancillary Dents

From Page 1

Similarly, Delta Corp wrote down the value of its investments in Deltatech Gaming, Head Digital Works and OpenPlay Technologies to zero. The move led to a fair value reduction of ₹378.3 crore as the affected businesses halted revenue-generating operations.

Fintech firm Paytm saw its net profit plunge 98% after booking an impairment of ₹190 crore on a loan extended to its joint venture First Games Technology.

More companies with exposure to poker, rummy and fantasy sports are expected to report similar impairments over the next two quarters, particularly those that raised capital at peak valuations during 2020-22.

Payment firms that previously benefited from gaming transactions are also facing pressure. Mobikwik reported an eightfold increase in net loss to ₹28.6 crore

for the September quarter, alongside a 7% on-year fall in operating revenue to ₹270.2 crore.

An executive at a payments firm said the decline in payment flows due to the RMG ban is temporary and firms can recover even if volumes fall 10-15% month-on-month. However, smaller payment aggregators that had high exposure to gaming could continue to see a meaningful impact on profitability, the person said.

Meanwhile, several gaming firms have exited India or scaled down operations. Hike shut down its RMG app Rush, WinZO exited the RMG segment locally and expanded into the US, and MPL halted all cash gaming in India, with founder Sai Srinivas telling employees that 50% of group revenue vanished overnight due to the new law. Unified Payments Interface transactions under the gaming category fell to 270 million in August, from 351 million in July, after the ban came into effect, as per National Payments Corporation of India data.

Box Office Struggling Overall

From Page 1

"Kiss of the Spider Woman," starring Jennifer Lopez and Diego Luna, cost roughly \$30 million and managed only \$1.6 million in ticket sales over a month.

Franchise films are chugging along. "Predator: Badlands," the ninth installment in a 38-year-old series, collected \$40 million last weekend, about 30% better than analysts had predicted. (It cost \$105 million to make.) Horror flicks like "Weapons" and anime offerings like "Infinity Castle" have also attracted sizable audiences.

Paul Thomas Anderson's "One Battle After Another," an action movie with ele-

ments of comedy, has taken in \$70 million after seven weeks of release.

That said, the box office is hurting as a whole. Theaters in the US and Canada collected \$445 million across all titles in October, the lowest total on record, after adjusting for inflation and excluding 2020, when the pandemic darkened screens. For context, October ticket sales in 2019 totaled an adjusted \$1 billion, according to Comscore.

Haven't dramas and comedies been struggling for a while? Yes. What's different now is the sheer volume of misfires, and the number of major stars involved. Margot Robbie, Colin Farrell, Dwayne Johnson, Channing Ta-

Alternate Markets

From Page 1

This reflected the growing confidence in India's food safety and quality assurance systems.

"Exports to Russia will also be expanded in a big way. They (Russia) are in the process of giving final approvals to 25 fisheries. We are working actively to get more approved," said Goyal.

The minister noted that India had been able to identify alternate markets after the imposition of high US tariffs and gradually resolve export problems. US President Donald

Trump has imposed a steep 50% tariff on Indian goods, half of which are penal tariffs for New Delhi's continued purchases of Russian crude oil.

Andhra Pradesh accounts for 80% of India's total shrimp exports and had been exporting about 70% of its produce to the US. The imposition of tariffs, which touched an effective rate of as much as 59.72%, severely dented the state's shrimp exports to the US.

In October, Australia permitted unpeeled shrimp imports from Andhra Pradesh after an eight-year gap. Australia had earlier restricted imports from India after it found white spot virus in certain consignments.

Local-Global Gains

From Page 1

Blending global expertise with local adaptation has allowed these firms to bring new models to India faster than many domestic ones. BYD, one of the world's largest EV makers, soon followed, expanding steadily amid strong commercial and fleet demand.

Meanwhile, Volvo Cars, Swedish in heritage but owned by China's Geely, carved out a steady premium presence. Volvo's volumes remain comparatively smaller, but they reflect a growing luxury EV segment. "Our growth in India is driven by a strong and loyal customer base and our accelerated focus on electrification," said Jyoti Malhotra, MD of Volvo Car India. The company, an early mover in luxury electric mobility, has committed to launching one new EV every year.

The coexistence of strong domestic and global brands has

transformed India into a highly evolved EV market, particularly in the premium segment.

Volvo, for instance, conducts regular customer clinics to fine-tune features, pricing, and expectations. "All the models that we sell in India are now assembled locally," said Malhotra.

STILL LEADING

In 2019, Chinese brands did not account for a single battery electric vehicle (BEV) sale in India. By October this year, they contributed 57,260 vehicles, claiming 33% of the market by volume, according to Jato Dynamics.

Yet, despite this surge, Indian-owned companies remain the backbone of the country's EV growth. Their BEV sales climbed to 101,724 this calendar year till October, from 74,442 units in 2024. "Localisation, affordability, wider geographic reach and strong alignment with policies like FAME-II and PLI have worked," said Ravi Bhatia, president of Jato Dynamics.

- The unaudited standalone and consolidated financial results have been reviewed and recommended by the Audit Committee and approved by the Board of Directors at their meeting held on November 14, 2025. The above unaudited financial results for the quarter and the six months ended September 30, 2025 have been reviewed by the statutory auditors of the Company.
- The above financial results have been prepared in accordance with the Companies (Indian Accounting Standards) Rules, 2015 (Ind AS prescribed under Section 133 of the Companies Act, 2013) and read with Rules framed thereunder and Regulation 33 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended from time to time.
- The Company manufactures bearings and other related components and is of the view that it is a single business segment in accordance with Ind AS-108 'Operating Segments' notified pursuant to Companies (Accounting Standards) Rules, 2015.
- Exceptional items: During the quarter and six months ended 30 September 2025, the Company has incurred certain demerger expense for IT cost, professional services and employee benefits expenses aggregating to INR 257.4 million towards Scheme of Arrangement. These restructuring costs are non-recurring in nature and do not reflect the Company's normal operating performance.
- The unaudited consolidated financial results include unaudited financial results of a wholly owned subsidiary and two associates of the Company for the quarter and six months ended September 30, 2025.
- The Company has received a certified true copy of the order dated September 26, 2025, from the Hon'ble National Company Law Tribunal, Mumbai Bench ("NCLT"), approving the Scheme of Arrangement among SKF India Limited ("Demerged Company"), SKF India (Industrial) Limited ("Resulting Company"), and their respective shareholders and creditors under section 230-232 and other applicable provisions of the Companies Act, 2013 and ruled framed thereunder (the "Scheme"). The Scheme has an appointed and effective date of October 1, 2025 ("Effective Date"). The Scheme, among other provisions, entails the demerger of the Industrial Undertaking ("Demerged Undertaking") from the Demerged Company into the Resulting Company on a going concern basis. This event qualifies as an adjusting event for the financial results. Accordingly, in line with Ind AS 105 - Non-Current Assets Held for Sale and Discontinued Operations, the Industrial Undertaking has been classified as "Held for Distribution" as of September 30, 2025. The financial results for the quarter and six months ended September 30, 2025, the quarter ended June 30, 2025, the year ended March 31, 2025, and the quarter and six months ended September 30, 2024, have been restated to reflect the impact of the Scheme, with the Industrial Undertaking presented as discontinued operations. Following the implementation of the Scheme, the Resulting Company has ceased to be a subsidiary of the Company.
- The unaudited standalone and consolidated financial results for the quarter ended September 30, 2025 are available on the BSE Limited website (URL: www.bseindia.com), the National Stock Exchange of India Limited website (URL: www.nseindia.com) and on the Company's website (URL: www.skf.com/in).

TARIFF-HAPPY TRUMP STRUGGLING WITH HIGH CONSUMER PRICES

Inflation Forces US Duty Cut on Key Food Staples

Washington: President Donald Trump announced Friday that he was scrapping US tariffs on beef, coffee, tropical fruits and a broad swath of other commodities — a dramatic move that comes amid mounting pressure on his administration to better combat high consumer prices.

Trump has built his second term around imposing steep levies on goods imported into the United States in hopes of encouraging domestic production and lifting the economy. His abrupt retreat from his signature tariff policy on so many staples key to the American diet is significant, and it comes after voters in off-year elections this month cited economic concerns as their top issue, resulting in big wins for Democrats in Virginia, New Jersey and other key races around the country.

"We just did a little bit of a roll-back on some foods like coffee," Trump said aboard Air Force One as he flew to Florida hours after the tariff announcement was made. Pressed on his tariffs helping to increase consumer prices, Trump acknowledged, "I say they may, in some cases" have that effect. "But to a large extent they've been borne by other countries," he added.

Meanwhile, inflation—despite Trump's pronouncements that it

US President Donald Trump speaks to reporters on Friday AP

has vanished since he took office in January—remains elevated, further increasing pressure on US consumers. The Trump administration has insisted that its tariffs had helped fill government coffers and weren't a major factor in higher prices at grocery stores around the country. But Democrats were quick to point Friday's move as an acknowledgement that Trump's policies were hurting American pocketbooks.

"President Trump is finally admitting what we always knew: his tariffs are raising prices for the American people," Virginia Democratic Rep. Don Beyer said in a statement. "After getting drubbed in recent elections because of voters' fury that Trump has broken his promises to fix inflation, the

White House is trying to cast this tariff retreat as a 'pivot to affordability.'"

GROCERY BILL WORRIES

Trump slapped tariffs on most countries around the globe in April. He and his administration still say that tariffs don't increase consumer prices, despite economic evidence to the contrary.

Record-high beef prices have been a particular concern, and Trump had said he intended to take action to try and lower them. Trump's tariffs on Brazil, a major beef exporter, had been a factor.

Trump signed an executive order that also removes tariffs on tea, fruit juice, cocoa, spices, bananas, oranges, tomatoes and certain fertilizers. Some of the products covered aren't produced in the United States, meaning that tariffs meant to spur domestic production had little effect. But reducing the tariffs will still likely mean lower prices for US consumers.

The Food Industry Association, which represents retailers, producers and a variety of related industry firms and services, applauded Trump's move to provide "swift tariff relief," noting that import US taxes "are an important factor" in a "complex mix" of supply chain issues. AP

Local-Global Gains

From Page 1

Blending global expertise with local adaptation has allowed these firms to bring new models to India faster than many domestic ones. BYD, one of the world's largest EV makers, soon followed, expanding steadily amid strong commercial and fleet demand.

Meanwhile, Volvo Cars, Swedish in heritage but owned by China's Geely, carved out a steady premium presence. Volvo's volumes remain comparatively smaller, but they reflect a growing luxury EV segment. "Our growth in India is driven by a strong and loyal customer base and our accelerated focus on electrification," said Jyoti Malhotra, MD of Volvo Car India. The company, an early mover in luxury electric mobility, has committed to launching one new EV every year.

The coexistence of strong domestic and global brands has

transformed India into a highly evolved EV market, particularly in the premium segment.

Volvo, for instance, conducts regular customer clinics to fine-tune features, pricing, and expectations. "All the models that we sell in India are now assembled locally," said Malhotra.

STILL LEADING

In 2019, Chinese brands did not account for a single battery electric vehicle (BEV) sale in India. By October this year, they contributed 57,260 vehicles, claiming 33% of the market by volume, according to Jato Dynamics.

Yet, despite this surge, Indian-owned companies remain the backbone of the country's EV growth. Their BEV sales climbed to 101,724 this calendar year till October, from 74,442 units in 2024. "Localisation, affordability, wider geographic reach and strong alignment with policies like FAME-II and PLI have worked," said Ravi Bhatia, president of Jato Dynamics.

Box Office Struggling Overall

From Page 1

"Kiss of the Spider Woman," starring Jennifer Lopez and Diego Luna, cost roughly \$30 million and managed only \$1.6 million in ticket sales over a month.

Franchise films are chugging along. "Predator: Badlands," the ninth installment in a 38-year-old series, collected \$40 million last weekend, about 30% better than analysts had predicted. (It cost \$105 million to make.) Horror flicks like "Weapons" and anime offerings like "Infinity Castle" have also attracted sizable audiences.

Paul Thomas Anderson's "One Battle After Another," an action movie with ele-

ments of comedy, has taken in \$70 million after seven weeks of release.

That said, the box office is hurting as a whole. Theaters in the US and Canada collected \$445 million across all titles in October, the lowest total on record, after adjusting for inflation and excluding 2020, when the pandemic darkened screens. For context, October ticket sales in 2019 totaled an adjusted \$1 billion, according to Comscore.

Haven't dramas and comedies been struggling for a while? Yes. What's different now is the sheer volume of misfires, and the number of major stars involved. Margot Robbie, Colin Farrell, Dwayne Johnson, Channing Ta-

tum, Austin Butler, Keanu Reeves, Emma Stone, Sweeney and Russell Crowe have all failed to fill seats (to varying degrees) over the past three months.

"It has seriously begun to look like the bottom is falling out," Owen Gleiberman, chief film critic for Variety, the entertainment trade news outlet, wrote last week.

During the pandemic, Hollywood largely ended the long-held practice of giving theaters an exclusive window of about 90 days to show new movies. Instead, movies started to become available for digital rental or purchase after as little as 17 days.

This diminished the incentive to see movies in theaters — especially dramas and comedies, which play just fine on living room TVs.

Alternate Markets

From Page 1

This reflected the growing confidence in India's food safety and quality assurance systems.

"Exports to Russia will also be expanded in a big way. They (Russia) are in the process of giving final approvals to 25 fisheries. We are working actively to get more approved," said Goyal.

The minister noted that India had been able to identify alternate markets after the imposition of high US tariffs and gradually resolve export problems. US President Donald

Trump has imposed a steep 50% tariff on Indian goods, half of which are penal tariffs for New Delhi's continued purchases of Russian crude oil.

Andhra Pradesh accounts for 80% of India's total shrimp exports and had been exporting about 70% of its produce to the US. The imposition of tariffs, which touched an effective rate of as much as 59.72%, severely dented the state's shrimp exports to the US.

In October, Australia permitted unpeeled shrimp imports from Andhra Pradesh after an eight-year gap. Australia had earlier restricted imports from India after it found white spot virus in certain consignments.

a) The unaudited standalone and consolidated financial results have been reviewed and recommended by the Audit Committee and approved by the Board of Directors at their meeting held on November 14, 2025. The above unaudited financial results for the quarter and the six months ended September 30, 2025 have been reviewed by the statutory auditors of the Company.

b) The above financial results have been prepared in accordance with the Companies (Indian Accounting Standards) Rules, 2015 (Ind AS prescribed under Section 133 of the Companies Act, 2013) and read with Rules framed thereunder and Regulation 33 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended from time to time.

c) The Company manufactures bearings and other related components and is of the view that it is a single business segment in accordance with Ind AS-108 'Operating Segments' notified pursuant to Companies (Accounting Standards) Rules, 2015.

d) Exceptional items: During the quarter and six months ended 30 September 2025, the Company has incurred certain demerger expense for IT cost, professional services and employee benefits expenses aggregating to INR 257.4 million towards Scheme of Arrangement. These restructuring costs are non-recurring in nature and do not reflect the Company's normal operating performance.

e) The unaudited consolidated financial results include unaudited financial results of a wholly owned subsidiary and two associates of the Company for the quarter and six months ended September 30, 2025.

f) The Company has received a certified true copy of the order dated September 26, 2025, from the Hon'ble National Company Law Tribunal, Mumbai Bench ("NCLT"), approving the Scheme of Arrangement among SKF India Limited ("Demerged Company"), SKF India (Industrial) Limited ("Resulting Company"), and their respective shareholders and creditors under section 230-232 and other applicable provisions of the Companies Act, 2013 and ruled framed thereunder (the "Scheme"). The Scheme has an appointed and effective date of October 1, 2025. The certified copy of the NCLT order was filed with the Registrar of Companies on October 1, 2025 ("Effective Date"). The Scheme, among other provisions, entails the demerger of the Industrial Undertaking ("Demerged Undertaking") from the Demerged Company into the Resulting Company on a going concern basis. This event qualifies as an adjusting event for the financial results. Accordingly, in line with Ind AS 105 – Non-Current Assets Held for Sale and Discontinued Operations, the Industrial Undertaking has been classified as "Held for Distribution" as of September 30, 2025. The financial results for the quarter and six months ended September 30, 2025, the quarter ended June 30, 2025, the year ended March 31, 2025, and the quarter and six months ended September 30, 2024, have been restated to reflect the impact of the Scheme, with the Industrial Undertaking presented as discontinued operations. Following the implementation of the Scheme, the Resulting Company has ceased to be a subsidiary of the Company.

g) The unaudited standalone and consolidated financial results for the quarter ended September 30, 2025 are available on the BSE Limited website (URL: www.bseindia.com), the National Stock Exchange of India Limited website (URL: www.nseindia.com) and on the Company's website (URL: www.skf.com/in).

TARIFF-HAPPY TRUMP STRUGGLING WITH HIGH CONSUMER PRICES

Inflation Forces US Duty Cut on Key Food Staples

Washington: President Donald Trump announced Friday that he was scrapping US tariffs on beef, coffee, tropical fruits and a broad swath of other commodities — a dramatic move that comes amid mounting pressure on his administration to better combat high consumer prices.

Trump has built his second term around imposing steep levies on goods imported into the United States in hopes of encouraging domestic production and lifting the economy. His abrupt retreat from his signature tariff policy on so many staples key to the American diet is significant, and it comes after voters in off-year elections this month cited economic concerns as their top issue, resulting in big wins for Democrats in Virginia, New Jersey and other key races around the country.

"We just did a little bit of a roll-back on some foods like coffee," Trump said aboard Air Force One as he flew to Florida hours after the tariff announcement was made. Pressed on his tariffs helping to increase consumer prices, Trump acknowledged, "I say they may, in some cases" have that effect. "But to a large extent they've been borne by other countries," he added.

Meanwhile, inflation—despite Trump's pronouncements that it

US President Donald Trump speaks to reporters on Friday AP

has vanished since he took office in January—remains elevated, further increasing pressure on US consumers. The Trump administration has insisted that its tariffs had helped fill government coffers and weren't a major factor in higher prices at grocery stores around the country. But Democrats were quick to point Friday's move as an acknowledgement that Trump's policies were hurting American pocketbooks.

"President Trump is finally admitting what we always knew: his tariffs are raising prices for the American people," Virginia Democratic Rep. Don Beyer said in a statement. "After getting drubbed in recent elections because of voters' fury that Trump has broken his promises to fix inflation, the

White House is trying to cast this tariff retreat as a 'pivot to affordability.'"

GROCERY BILL WORRIES

Trump slapped tariffs on most countries around the globe in April. He and his administration still say that tariffs don't increase consumer prices, despite economic evidence to the contrary.

Record-high beef prices have been a particular concern, and Trump had said he intended to take action to try and lower them. Trump's tariffs on Brazil, a major beef exporter, had been a factor.

Trump signed an executive order that also removes tariffs on tea, fruit juice, cocoa, spices, bananas, oranges, tomatoes and certain fertilizers. Some of the products covered aren't produced in the United States, meaning that tariffs meant to spur domestic production had little effect. But reducing the tariffs will still likely mean lower prices for US consumers.

The Food Industry Association, which represents retailers, producers and a variety of related industry firms and services, applauded Trump's move to provide "swift tariff relief," noting that import US taxes "are an important factor" in a "complex mix" of supply chain issues. AP

New Places in Popular Countries

From Page 1

The Commonwealth of Independent States (CIS) is a grouping of former Soviet Union republics. There is also no need for invitations or hotel confirmations. By 2030, Moscow expects to host up to six million international tourists annually, driven largely by travelers from India, China, the Asia-Pacific region and West Asia.

In the first eight months of 2025, Vietnam recorded 443,000 visitors from India, marking a 42.2% rise from the year earlier. That compares with 392,000 Indian visitors in 2023 and 507,000 in 2024. Because of rising interest, MakeMyTrip has launched holiday packages to Phu Quoc, Vietnam, with exclusive direct flights operated by Air India Express starting from next month. The island currently has no direct connectivity from India.

"New destinations are emerging within already popular markets such as Thailand and Vietnam and are driving demand," said MakeMyTrip cofounder and group CEO Rajesh Magow. "We're seeing a healthy uptick for the Philippines as well as it has done away with visas for Indians. Geopolitical developments seem to have impacted bookings for Azerbaijan and Turkey."

As per preliminary data from the Japan National Travel Organization, the island nation saw 233,400 visitor arrivals from India in the January-September period, up 36.6% from the year earlier.

more attractive and this is reflecting in our numbers," said Rajeev Kale, president and country head for holidays, MICE and visa. "Increased demand for Japan, is resulting in extended stays and we have been able to include new localities like Sapporo in addition to Tokyo, Kyoto, and Osaka."

In the first nine months of this year, Georgia saw 103,968 Indian visitors, up 19%. India is one of the country's most promising and fast-growing source markets, said Maria Omiadze, head, Georgian National Tourism Administration.

"This strong trend reflects the growing momentum of our cooperation with Indian travel partners, enhanced flight connectivity, and the rising appeal of Georgia's diverse offerings from history and culture to gastronomy and nature," she said.

Between January and September this year, South Korea received 153,619 Indian visitors, up 13% over the same period last year.

Ancillary Dents

From Page 1

Similarly, Delta Corp wrote down the value of its investments in Deltatech Gaming, Head Digital Works and OpenPlay Technologies to zero. The move led to a fair value reduction of ₹378.3 crore as the affected businesses halted revenue-generating operations.

Fintech firm Paytm saw its net profit plunge 98% after booking an impairment of ₹190 crore on a loan extended to its joint venture First Games Technology.

More companies with exposure to poker, rummy and fantasy sports are expected to report similar impairments over the next two quarters, particularly those that raised capital at peak valuations during 2020-22.

Payment firms that previously benefited from gaming transactions are also facing pressure. Mobikwik reported an eightfold increase in net loss to ₹28.6 crore

for the September quarter, alongside a 7% on-year fall in operating revenue to ₹270.2 crore.

An executive at a payments firm said the decline in payment flows due to the RMG ban is temporary and firms can recover even if volumes fall 10-15% month-on-month. However, smaller payment aggregators that had high exposure to gaming could continue to see a meaningful impact on profitability, the person said.

Meanwhile, several gaming firms have exited India or scaled down operations. Hike shut down its RMG app Rush, WinZO exited the RMG segment locally and expanded into the US, and MPL halted all cash gaming in India, with founder Sai Srinivas telling employees that 50% of group revenue vanished overnight due to the new law. Unified Payments Interface transactions under the gaming category fell to 270 million in August, from 351 million in July, after the ban came into effect, as per National Payments Corporation of India data.

Local-Global Gains

From Page 1

Blending global expertise with local adaptation has allowed these firms to bring new models to India faster than many domestic ones. BYD, one of the world's largest EV makers, soon followed, expanding steadily amid strong commercial and fleet demand.

Meanwhile, Volvo Cars, Swedish in heritage but owned by China's Geely, carved out a steady premium presence. Volvo's volumes remain comparatively smaller, but they reflect a growing luxury EV segment. "Our growth in India is driven by a strong and loyal customer base and our accelerated focus on electrification," said Jyoti Malhotra, MD of Volvo Car India. The company, an early mover in luxury electric mobility, has committed to launching one new EV every year.

The coexistence of strong domestic and global brands has

transformed India into a highly evolved EV market, particularly in the premium segment.

Volvo, for instance, conducts regular customer clinics to fine-tune features, pricing, and expectations. "All the models that we sell in India are now assembled locally," said Malhotra.

STILL LEADING

In 2019, Chinese brands did not account for a single battery electric vehicle (BEV) sale in India. By October this year, they contributed 57,260 vehicles, claiming 33% of the market by volume, according to Jato Dynamics.

Yet, despite this surge, Indian-owned companies remain the backbone of the country's EV growth. Their BEV sales climbed to 101,724 this calendar year till October, from 74,442 units in 2024. "Localisation, affordability, wider geographic reach and strong alignment with policies like FAME-II and PLI have worked," said Ravi Bhatia, president of Jato Dynamics.

Box Office Struggling Overall

From Page 1

"Kiss of the Spider Woman," starring Jennifer Lopez and Diego Luna, cost roughly \$30 million and managed only \$1.6 million in ticket sales over a month.

Franchise films are chugging along. "Predator: Badlands," the ninth installment in a 38-year-old series, collected \$40 million last weekend, about 30% better than analysts had predicted. (It cost \$105 million to make.) Horror flicks like "Weapons" and anime offerings like "Infinity Castle" have also attracted sizable audiences.

Paul Thomas Anderson's "One Battle After Another," an action movie with ele-

ments of comedy, has taken in \$70 million after seven weeks of release.

That said, the box office is hurting as a whole. Theaters in the US and Canada collected \$445 million across all titles in October, the lowest total on record, after adjusting for inflation and excluding 2020, when the pandemic darkened screens. For context, October ticket sales in 2019 totaled an adjusted \$1 billion, according to Comscore.

Haven't dramas and comedies been struggling for a while? Yes. What's different now is the sheer volume of misfires, and the number of major stars involved. Margot Robbie, Colin Farrell, Dwayne Johnson, Channing Ta-

tum, Austin Butler, Keanu Reeves, Emma Stone, Sweeney and Russell Crowe have all failed to fill seats (to varying degrees) over the past three months.

"It has seriously begun to look like the bottom is falling out," Owen Gleiberman, chief film critic for Variety, the entertainment trade news outlet, wrote last week.

During the pandemic, Hollywood largely ended the long-held practice of giving theaters an exclusive window of about 90 days to show new movies. Instead, movies started to become available for digital rental or purchase after as little as 17 days.

This diminished the incentive to see movies in theaters — especially dramas and comedies, which play just fine on living room TVs.

Alternate Markets

From Page 1

This reflected the growing confidence in India's food safety and quality assurance systems.

"Exports to Russia will also be expanded in a big way. They (Russia) are in the process of giving final approvals to 25 fisheries. We are working actively to get more approved," said Goyal.

The minister noted that India had been able to identify alternate markets after the imposition of high US tariffs and gradually resolve export problems. US President Donald

Trump has imposed a steep 50% tariff on Indian goods, half of which are penal tariffs for New Delhi's continued purchases of Russian crude oil.

Andhra Pradesh accounts for 80% of India's total shrimp exports and had been exporting about 70% of its produce to the US. The imposition of tariffs, which touched an effective rate of as much as 59.72%, severely dented the state's shrimp exports to the US.

In October, Australia permitted unpeeled shrimp imports from Andhra Pradesh after an eight-year gap. Australia had earlier restricted imports from India after it found white spot virus in certain consignments.

c) The Company manufactures bearings and other related components and is of the view that it is a single business segment in accordance with Ind AS-108 'Operating Segments' notified pursuant to Companies (Accounting Standards) Rules, 2015.
d) Exceptional items: During the quarter and six months ended 30 September 2025, the Company has incurred certain demerger expense for IT cost, professional services and employee benefits expenses aggregating to INR 257.4 million towards Scheme of Arrangement. These restructuring costs are non-recurring in nature and do not reflect the Company's normal operating performance.
e) The unaudited consolidated financial results include unaudited financial results of a wholly owned subsidiary and two associates of the Company for the quarter and six months ended September 30, 2025.
f) The Company has received a certified true copy of the order dated September 26, 2025, from the Hon'ble National Company Law Tribunal, Mumbai Bench ("NCLT"), approving the Scheme of Arrangement amongst SKF India Limited ("Demerged Company"), SKF India (Industrial) Limited ("Resulting Company"), and their respective shareholders and creditors under section 230-232 and other applicable provisions of the Companies Act, 2013 and ruled framed thereunder (the "Scheme"). The Scheme has an appointed and effective date of October 1, 2025 ("Effective Date"). The Scheme, among other provisions, entails the demerger of the Industrial Undertaking ("Demerged Undertaking") from the Demerged Company into the Resulting Company on a going concern basis. This event qualifies as an adjusting event for the financial results. Accordingly, in line with Ind AS 105 - Non-Current Assets Held for Sale and Discontinued Operations, the Industrial Undertaking has been classified as "Held for Distribution" as of September 30, 2025. The financial results for the quarter and six months ended September 30, 2025, the quarter ended June 30, 2025, the year ended March 31, 2025, and the quarter and six months ended September 30, 2024, have been restated to reflect the impact of the Scheme, with the Industrial Undertaking presented as discontinued operations. Following the implementation of the Scheme, the Resulting Company has ceased to be a subsidiary of the Company.
g) The unaudited standalone and consolidated financial results for the quarter ended September 30, 2025 are available on the BSE Limited website (URL: www.bseindia.com), the National Stock Exchange of India Limited website (URL: www.nseindia.com) and on the Company's website (URL: www.skf.com/in).

TARIFF-HAPPY TRUMP STRUGGLING WITH HIGH CONSUMER PRICES

Inflation Forces US Duty Cut on Key Food Staples

Washington: President Donald Trump announced Friday that he was scrapping US tariffs on beef, coffee, tropical fruits and a broad swath of other commodities — a dramatic move that comes amid mounting pressure on his administration to better combat high consumer prices.

Trump has built his second term around imposing steep levies on goods imported into the United States in hopes of encouraging domestic production and lifting the economy. His abrupt retreat from his signature tariff policy on so many staples key to the American diet is significant, and it comes after voters in off-year elections this month cited economic concerns as their top issue, resulting in big wins for Democrats in Virginia, New Jersey and other key races around the country.

US President Donald Trump speaks to reporters on Friday AP

White House is trying to cast this tariff retreat as a 'pivot to affordability.'

GROCERY BILL WORRIES

Trump slapped tariffs on most countries around the globe in April. He and his administration still say that tariffs don't increase consumer prices, despite economic evidence to the contrary.

Record-high beef prices have been a particular concern, and Trump had said he intended to take action to try and lower them. Trump's tariffs on Brazil, a major beef exporter, had been a factor.

Trump signed an executive order that also removes tariffs on tea, fruit juice, cocoa, spices, bananas, oranges, tomatoes and certain fertilizers. Some of the products covered aren't produced in the United States, meaning that tariffs meant to spur domestic production had little effect. But reducing the tariffs will still likely mean lower prices for US consumers.

The Food Industry Association, which represents retailers, producers and a variety of related industry firms and services, applauded Trump's move to provide "swift tariff relief," noting that import US taxes "are an important factor" in a "complex mix" of supply chain issues. AP

"We just did a little bit of a roll-back on some foods like coffee," Trump said aboard Air Force One as he flew to Florida hours after the tariff announcement was made. Pressed on his tariffs helping to increase consumer prices, Trump acknowledged, "I say they may, in some cases" have that effect. "But to a large extent they've been borne by other countries," he added.

Meanwhile, inflation—despite Trump's pronouncements that it

New Places in Popular Countries

From Page 1

The Commonwealth of Independent States (CIS) is a grouping of former Soviet Union republics. There is also no need for invitations or hotel confirmations. By 2030, Moscow expects to host up to six million international tourists annually, driven largely by travelers from India, China, the Asia-Pacific region and West Asia.

"New destinations are emerging within already popular markets such as Thailand and Vietnam and are driving demand," said MakeMyTrip cofounder and group CEO Rajesh Magow. "We're seeing a healthy uptick for the Philippines as well as it has done away with visas for Indians. Geopolitical developments seem to have impacted bookings for Azerbaijan and Turkey."

As per preliminary data from the Japan National Travel Organization, the island nation saw 233,400 visitor arrivals from India in the January-September period, up 36.6% from the year earlier.

more attractive and this is reflecting in our numbers," said Rajeev Kale, president and country head for holidays, MICE and visa. "Increased demand for Japan, is resulting in extended stays and we have been able to include new localities like Sapporo in addition to Tokyo, Kyoto, and Osaka."

In the first nine months of this year, Georgia saw 103,968 Indian visitors, up 19%. India is one of the country's most promising and fast-growing source markets, said Maria Omiadze, head, Georgian National Tourism Administration.

"This strong trend reflects the growing momentum of our cooperation with Indian travel partners, enhanced flight connectivity, and the rising appeal of Georgia's diverse offerings from history and culture to gastronomy and nature," she said.

Between January and September this year, South Korea received 153,619 Indian visitors, up 13% over the same period last year.

Travel company Thomas Cook (India) said destinations like Japan, Vietnam and Sri Lanka have made a strong showing this year. "Additionally, an appreciating Indian rupee versus the Sri Lankan rupee and Vietnam's dong has served to make the destinations even

Ancillary Dents

From Page 1

Similarly, Delta Corp wrote down the value of its investments in Deltatech Gaming, Head Digital Works and OpenPlay Technologies to zero. The move led to a fair value reduction of ₹378.3 crore as the affected businesses halted revenue-generating operations.

Fintech firm Paytm saw its net profit plunge 98% after booking an impairment of ₹190 crore on a loan extended to its joint venture First Games Technology.

More companies with exposure to poker, rummy and fantasy sports are expected to report similar impairments over the next two quarters, particularly those that raised capital at peak valuations during 2020-22.

Payment firms that previously benefited from gaming transactions are also facing pressure. Mobikwik reported an eightfold increase in net loss to ₹28.6 crore

for the September quarter, alongside a 7% on-year fall in operating revenue to ₹270.2 crore.

An executive at a payments firm said the decline in payment flows due to the RMG ban is temporary and firms can recover even if volumes fall 10-15% month-on-month. However, smaller payment aggregators that had high exposure to gaming could continue to see a meaningful impact on profitability, the person said.

Meanwhile, several gaming firms have exited India or scaled down operations. Hike shut down its RMG app Rush, WinZO exited the RMG segment locally and expanded into the US, and MPL halted all cash gaming in India, with founder Sai Srinivas telling employees that 50% of group revenue vanished overnight due to the new law. Unified Payments Interface transactions under the gaming category fell to 270 million in August, from 351 million in July, after the ban came into effect, as per National Payments Corporation of India data.

Local-Global Gains

From Page 1

Blending global expertise with local adaptation has allowed these firms to bring new models to India faster than many domestic ones. BYD, one of the world's largest EV makers, soon followed, expanding steadily amid strong commercial and fleet demand.

Meanwhile, Volvo Cars, Swedish in heritage but owned by China's Geely, carved out a steady premium presence. Volvo's volumes remain comparatively smaller, but they reflect a growing luxury EV segment. "Our growth in India is driven by a strong and loyal customer base and our accelerated focus on electrification," said Jyoti Malhotra, MD of Volvo Car India. The company, an early mover in luxury electric mobility, has committed to launching one new EV every year.

The coexistence of strong domestic and global brands has

transformed India into a highly evolved EV market, particularly in the premium segment.

Volvo, for instance, conducts regular customer clinics to fine-tune features, pricing, and expectations. "All the models that we sell in India are now assembled locally," said Malhotra.

STILL LEADING

In 2019, Chinese brands did not account for a single battery electric vehicle (BEV) sale in India. By October this year, they contributed 57,260 vehicles, claiming 33% of the market by volume, according to Jato Dynamics.

Yet, despite this surge, Indian-owned companies remain the backbone of the country's EV growth. Their BEV sales climbed to 101,724 this calendar year till October, from 74,442 units in 2024. "Localisation, affordability, wider geographic reach and strong alignment with policies like FAME-II and PLI have worked," said Ravi Bhatia, president of Jato Dynamics.

Box Office Struggling Overall

From Page 1

"Kiss of the Spider Woman," starring Jennifer Lopez and Diego Luna, cost roughly \$30 million and managed only \$1.6 million in ticket sales over a month.

Franchise films are chugging along. "Predator: Badlands," the ninth installment in a 38-year-old series, collected \$40 million last weekend, about 30% better than analysts had predicted. (It cost \$105 million to make.) Horror flicks like "Weapons" and anime offerings like "Infinity Castle" have also attracted sizable audiences.

Paul Thomas Anderson's "One Battle After Another," an action movie with ele-

ments of comedy, has taken in \$70 million after seven weeks of release.

That said, the box office is hurting as a whole. Theaters in the US and Canada collected \$445 million across all titles in October, the lowest total on record, after adjusting for inflation and excluding 2020, when the pandemic darkened screens. For context, October ticket sales in 2019 totaled an adjusted \$1 billion, according to Comscore.

Haven't dramas and comedies been struggling for a while? Yes. What's different now is the sheer volume of misfires, and the number of major stars involved. Margot Robbie, Colin Farrell, Dwayne Johnson, Channing Ta-

tum, Austin Butler, Keanu Reeves, Emma Stone, Sweeney and Russell Crowe have all failed to fill seats (to varying degrees) over the past three months.

"It has seriously begun to look like the bottom is falling out," Owen Gleiberman, chief film critic for Variety, the entertainment trade news outlet, wrote last week.

During the pandemic, Hollywood largely ended the long-held practice of giving theaters an exclusive window of about 90 days to show new movies. Instead, movies started to become available for digital rental or purchase after as little as 17 days.

This diminished the incentive to see movies in theaters — especially dramas and comedies, which play just fine on living room TVs.

Alternate Markets

From Page 1

This reflected the growing confidence in India's food safety and quality assurance systems.

"Exports to Russia will also be expanded in a big way. They (Russia) are in the process of giving final approvals to 25 fisheries. We are working actively to get more approved," said Goyal.

The minister noted that India had been able to identify alternate markets after the imposition of high US tariffs and gradually resolve export problems. US President Donald

Trump has imposed a steep 50% tariff on Indian goods, half of which are penal tariffs for New Delhi's continued purchases of Russian crude oil.

Andhra Pradesh accounts for 80% of India's total shrimp exports and had been exporting about 70% of its produce to the US. The imposition of tariffs, which touched an effective rate of as much as 59.72%, severely dented the state's shrimp exports to the US.

In October, Australia permitted unpeeled shrimp imports from Andhra Pradesh after an eight-year gap. Australia had earlier restricted imports from India after it found white spot virus in certain consignments.

TARIFF-HAPPY TRUMP STRUGGLING WITH HIGH CONSUMER PRICES

Inflation Forces US Duty Cut on Key Food Staples

Washington: President Donald Trump announced Friday that he was scrapping US tariffs on beef, coffee, tropical fruits and a broad swath of other commodities — a dramatic move that comes amid mounting pressure on his administration to better combat high consumer prices.

Trump has built his second term around imposing steep levies on goods imported into the United States in hopes of encouraging domestic production and lifting the economy. His abrupt retreat from his signature tariff policy on so many staples key to the American diet is significant, and it comes after voters in off-year elections this month cited economic concerns as their top issue, resulting in big wins for Democrats in Virginia, New Jersey and other key races around the country.

"We just did a little bit of a roll-back on some foods like coffee," Trump said aboard Air Force One as he flew to Florida hours after the tariff announcement was made. Pressed on his tariffs helping to increase consumer prices, Trump acknowledged, "I say they may, in some cases" have that effect. "But to a large extent they've been borne by other countries," he added.

Meanwhile, inflation—despite Trump's pronouncements that it

US President Donald Trump speaks to reporters on Friday AP

has vanished since he took office in January—remains elevated, further increasing pressure on US consumers. The Trump administration has insisted that its tariffs had helped fill government coffers and weren't a major factor in higher prices at grocery stores around the country. But Democrats were quick to point Friday's move as an acknowledgement that Trump's policies were hurting American pocketbooks.

"President Trump is finally admitting what we always knew: his tariffs are raising prices for the American people," Virginia Democratic Rep. Don Beyer said in a statement. "After getting drubbed in recent elections because of voters' fury that Trump has broken his promises to fix inflation, the

White House is trying to cast this tariff retreat as a 'pivot to affordability.'"

GROCERY BILL WORRIES

Trump slapped tariffs on most countries around the globe in April. He and his administration still say that tariffs don't increase consumer prices, despite economic evidence to the contrary.

Record-high beef prices have been a particular concern, and Trump had said he intended to take action to try and lower them. Trump's tariffs on Brazil, a major beef exporter, had been a factor.

Trump signed an executive order that also removes tariffs on tea, fruit juice, cocoa, spices, bananas, oranges, tomatoes and certain fertilizers. Some of the products covered aren't produced in the United States, meaning that tariffs meant to spur domestic production had little effect. But reducing the tariffs will still likely mean lower prices for US consumers.

The Food Industry Association, which represents retailers, producers and a variety of related industry firms and services, applauded Trump's move to provide "swift tariff relief," noting that import US taxes "are an important factor" in a "complex mix" of supply chain issues. AP

New Places in Popular Countries

From Page 1

The Commonwealth of Independent States (CIS) is a grouping of former Soviet Union republics. There is also no need for invitations or hotel confirmations. By 2030, Moscow expects to host up to six million international tourists annually, driven largely by travelers from India, China, the Asia-Pacific region and West Asia.

In the first eight months of 2025, Vietnam recorded 443,000 visitors from India, marking a 42.2% rise from the year earlier. That compares with 392,000 Indian visitors in 2023 and 507,000 in 2024. Because of rising interest, MakeMyTrip has launched holiday packages to Phu Quoc, Vietnam, with exclusive direct flights operated by Air India Express starting from next month. The island currently has no direct connectivity from India.

"New destinations are emerging within already popular markets such as Thailand and Vietnam and are driving demand," said MakeMyTrip cofounder and group CEO Rajesh Magow. "We're seeing a healthy uptick for the Philippines as well as it has done away with visas for Indians. Geopolitical developments seem to have impacted bookings for Azerbaijan and Turkey."

As per preliminary data from the Japan National Travel Organization, the island nation saw 233,400 visitor arrivals from India in the January-September period, up 36.6% from the year earlier. Haven't dramas and comedies been struggling for a while? Yes. What's different now is the sheer volume of misfires, and the number of major stars involved. Margot Robbie, Colin Farrell, Dwayne Johnson, Channing Ta-

tum, Austin Butler, Keanu Reeves, Emma Stone, Sweeney and Russell Crowe have all failed to fill seats (to varying degrees) over the past three months.

"It has seriously begun to look like the bottom is falling out," Owen Gleiberman, chief film critic for Variety, the entertainment trade news outlet, wrote last week.

During the pandemic, Hollywood largely ended the long-held practice of giving theaters an exclusive window of about 90 days to show new movies. Instead, movies started to become available for digital rental or purchase after as little as 17 days.

This diminished the incentive to see movies in theaters — especially dramas and comedies, which play just fine on living room TVs.

Alternate Markets

From Page 1

This reflected the growing confidence in India's food safety and quality assurance systems.

"Exports to Russia will also be expanded in a big way. They (Russia) are in the process of giving final approvals to 25 fisheries. We are working actively to get more approved," said Goyal.

The minister noted that India had been able to identify alternate markets after the imposition of high US tariffs and gradually resolve export problems. US President Donald

Trump has imposed a steep 50% tariff on Indian goods, half of which are penal tariffs for New Delhi's continued purchases of Russian crude oil.

Andhra Pradesh accounts for 80% of India's total shrimp exports and had been exporting about 70% of its produce to the US. The imposition of tariffs, which touched an effective rate of as much as 59.72%, severely dented the state's shrimp exports to the US.

In October, Australia permitted unpeeled shrimp imports from Andhra Pradesh after an eight-year gap. Australia had earlier restricted imports from India after it found white spot virus in certain consignments.

a) The unaudited standalone and consolidated financial results have been reviewed and recommended by the Audit Committee and approved by the Board of Directors at their meeting held on November 14, 2025. The above unaudited financial results for the quarter and the six months ended September 30, 2025 have been reviewed by the statutory auditors of the Company.

b) The above financial results have been prepared in accordance with the Companies (Indian Accounting Standards) Rules, 2015 (Ind AS prescribed under Section 133 of the Companies Act, 2013) and read with Rules framed thereunder and Regulation 33 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended from time to time.

c) The Company manufactures bearings and other related components and is of the view that it is a single business segment in accordance with Ind AS-108 'Operating Segments' notified pursuant to Companies (Accounting Standards) Rules, 2015.

d) Exceptional items: During the quarter and six months ended 30 September 2025, the Company has incurred certain demerger expense for IT cost, professional services and employee benefits expenses aggregating to INR 257.4 million towards Scheme of Arrangement. These restructuring costs are non-recurring in nature and do not reflect the Company's normal operating performance.

e) The unaudited consolidated financial results include unaudited financial results of a wholly owned subsidiary and two associates of the Company for the quarter and six months ended September 30, 2025.

f) The Company has received a certified true copy of the order dated September 26, 2025, from the Hon'ble National Company Law Tribunal, Mumbai Bench ("NCLT"), approving the Scheme of Arrangement amongst SKF India Limited ("Demerged Company"), SKF India (Industrial) Limited ("Resulting Company"), and their respective shareholders and creditors under section 230-232 and other applicable provisions of the Companies Act, 2013 and ruled framed thereunder (the "Scheme"). The Scheme has an appointed and effective date of October 1, 2025. The certified copy of the NCLT order was filed with the Registrar of Companies on October 1, 2025 ("Effective Date"). The Scheme, among other provisions, entails the demerger of the Industrial Undertaking ("Demerged Undertaking") from the Demerged Company into the Resulting Company on a going concern basis. This event qualifies as an adjusting event for the financial results. Accordingly, in line with Ind AS 105 - Non-Current Assets Held for Sale and Discontinued Operations, the Industrial Undertaking has been classified as "Held for Distribution" as of September 30, 2025. The financial results for the quarter and six months ended September 30, 2025, the quarter ended June 30, 2025, the year ended March 31, 2025, and the quarter and six months ended September 30, 2024, have been restated to reflect the impact of the Scheme, with the Industrial Undertaking presented as discontinued operations. Following the implementation of the Scheme, the Resulting Company has ceased to be a subsidiary of the Company.

g) The unaudited standalone and consolidated financial results for the quarter ended September 30, 2025 are available on the BSE Limited website (URL: www.bseindia.com), the National Stock Exchange of India Limited website (URL: www.nseindia.com) and on the Company's website (URL: www.skf.com/in).

AROUND THE WORLD

THE ECONOMIC TIMES | HYDERABAD | SUNDAY | 16 NOVEMBER 2025 | WWW.ECONOMICTIMES.COM

TARIFF-HAPPY TRUMP STRUGGLING WITH HIGH CONSUMER PRICES

Inflation Forces US Duty Cut on Key Food Staples

Washington: President Donald Trump announced Friday that he was scrapping US tariffs on beef, coffee, tropical fruits and a broad swath of other commodities — a dramatic move that comes amid mounting pressure on his administration to better combat high consumer prices.

Trump has built his second term around imposing steep levies on goods imported into the United States in hopes of encouraging domestic production and lifting the economy. His abrupt retreat from his signature tariff policy on so many staples key to the American diet is significant, and it comes after voters in off-year elections this month cited economic concerns as their top issue, resulting in big wins for Democrats in Virginia, New Jersey and other key races around the country.

"We just did a little bit of a roll-back on some foods like coffee," Trump said aboard Air Force One as he flew to Florida hours after the tariff announcement was made. Pressed on his tariffs helping to increase consumer prices, Trump acknowledged, "I say they may, in some cases" have that effect. "But to a large extent they've been borne by other countries," he added.

Meanwhile, inflation—despite Trump's pronouncements that it

US President Donald Trump speaks to reporters on Friday AP

has vanished since he took office in January—remains elevated, further increasing pressure on US consumers. The Trump administration has insisted that its tariffs had helped fill government coffers and weren't a major factor in higher prices at grocery stores around the country. But Democrats were quick to point Friday's move as an acknowledgement that Trump's policies were hurting American pocketbooks.

"President Trump is finally admitting what we always knew: his tariffs are raising prices for the American people," Virginia Democratic Rep. Don Beyer said in a statement. "After getting drubbed in recent elections because of voters' fury that Trump has broken his promises to fix inflation, the

White House is trying to cast this tariff retreat as a 'pivot to affordability.'"

GROCERY BILL WORRIES

Trump slapped tariffs on most countries around the globe in April. He and his administration still say that tariffs don't increase consumer prices, despite economic evidence to the contrary.

Record-high beef prices have been a particular concern, and Trump had said he intended to take action to try and lower them. Trump's tariffs on Brazil, a major beef exporter, had been a factor.

Trump signed an executive order that also removes tariffs on tea, fruit juice, cocoa, spices, bananas, oranges, tomatoes and certain fertilizers. Some of the products covered aren't produced in the United States, meaning that tariffs meant to spur domestic production had little effect. But reducing the tariffs will still likely mean lower prices for US consumers.

The Food Industry Association, which represents retailers, producers and a variety of related industry firms and services, applauded Trump's move to provide "swift tariff relief," noting that import US taxes "are an important factor" in a "complex mix" of supply chain issues. AP

New Places in Popular Countries

From Page 1

The Commonwealth of Independent States (CIS) is a grouping of former Soviet Union republics. There is also no need for invitations or hotel confirmations. By 2030, Moscow expects to host up to six million international tourists annually, driven largely by travelers from India, China, the Asia-Pacific region and West Asia.

In the first eight months of 2025, Vietnam recorded 443,000 visitors from India, marking a 42.2% rise from the year earlier. That compares with 392,000 Indian visitors in 2023 and 507,000 in 2024. Because of rising interest, MakeMyTrip has launched holiday packages to Phu Quoc, Vietnam, with exclusive direct flights operated by Air India Express starting from next month. The island currently has no direct connectivity from India.

"New destinations are emerging within already popular markets such as Thailand and Vietnam and are driving demand," said MakeMyTrip cofounder and group CEO Rajesh Magow. "We're seeing a healthy uptick for the Philippines as well as it has done away with visas for Indians. Geopolitical developments seem to have impacted bookings for Azerbaijan and Turkey."

As per preliminary data from the Japan National Travel Organization, the island nation saw 233,400 visitor arrivals from India in the January-September period, up 36.6% from the year earlier.

more attractive and this is reflecting in our numbers," said Rajeev Kale, president and country head for holidays, MICE and visa. "Increased demand for Japan, is resulting in extended stays and we have been able to include new localities like Sapporo in addition to Tokyo, Kyoto, and Osaka."

In the first nine months of this year, Georgia saw 103,968 Indian visitors, up 19%. India is one of the country's most promising and fast-growing source markets, said Maria Omiadze, head, Georgian National Tourism Administration. "This strong trend reflects the growing momentum of our cooperation with Indian travel partners, enhanced flight connectivity, and the rising appeal of Georgia's diverse offerings from history and culture to gastronomy and nature," she said.

Between January and September this year, South Korea received 153, 619 Indian visitors, up 13% over the same period last year.

Ancillary Dents

From Page 1

Similarly, Delta Corp wrote down the value of its investments in Deltatech Gaming, Head Digital Works and OpenPlay Technologies to zero. The move led to a fair value reduction of ₹378.3 crore as the affected businesses halted revenue-generating operations.

Fintech firm Paytm saw its net profit plunge 98% after booking an impairment of ₹190 crore on a loan extended to its joint venture First Games Technology.

More companies with exposure to poker, rummy and fantasy sports are expected to report similar impairments over the next two quarters, particularly those that raised capital at peak valuations during 2020-22.

Payment firms that previously benefited from gaming transactions are also facing pressure. Mobikwik reported an eightfold increase in net loss to ₹28.6 crore

for the September quarter, alongside a 7% on-year fall in operating revenue to ₹270.2 crore.

An executive at a payments firm said the decline in payment flows due to the RMG ban is temporary and firms can recover even if volumes fall 10-15% month-on-month. However, smaller payment aggregators that had high exposure to gaming could continue to see a meaningful impact on profitability, the person said.

Meanwhile, several gaming firms have exited India or scaled down operations. Hike shut down its RMG app Rush, WinZO exited the RMG segment locally and expanded into the US, and MPL halted all cash gaming in India, with founder Sai Srinivas telling employees that 50% of group revenue vanished overnight due to the new law. Unified Payments Interface transactions under the gaming category fell to 270 million in August, from 351 million in July, after the ban came into effect, as per National Payments Corporation of India data.

Local-Global Gains

From Page 1

Blending global expertise with local adaptation has allowed these firms to bring new models to India faster than many domestic ones. BYD, one of the world's largest EV makers, soon followed, expanding steadily amid strong commercial and fleet demand.

Meanwhile, Volvo Cars, Swedish in heritage but owned by China's Geely, carved out a steady premium presence. Volvo's volumes remain comparatively smaller, but they reflect a growing luxury EV segment. "Our growth in India is driven by a strong and loyal customer base and our accelerated focus on electrification," said Jyoti Malhotra, MD of Volvo Car India. The company, an early mover in luxury electric mobility, has committed to launching one new EV every year.

The coexistence of strong domestic and global brands has

transformed India into a highly evolved EV market, particularly in the premium segment.

Volvo, for instance, conducts regular customer clinics to fine-tune features, pricing, and expectations. "All the models that we sell in India are now assembled locally," said Malhotra.

STILL LEADING

In 2019, Chinese brands did not account for a single battery electric vehicle (BEV) sale in India. By October this year, they contributed 57,260 vehicles, claiming 33% of the market by volume, according to Jato Dynamics.

Yet, despite this surge, Indian-owned companies remain the backbone of the country's EV growth. Their BEV sales climbed to 101,724 this calendar year till October, from 74,442 units in 2024. "Localisation, affordability, wider geographic reach and strong alignment with policies like FAME-II and PLI have worked," said Ravi Bhatia, president of Jato Dynamics.

Box Office Struggling Overall

From Page 1

"Kiss of the Spider Woman," starring Jennifer Lopez and Diego Luna, cost roughly \$30 million and managed only \$1.6 million in ticket sales over a month.

Franchise films are chugging along. "Predator: Badlands," the ninth installment in a 38-year-old series, collected \$40 million last weekend, about 30% better than analysts had predicted. (It cost \$105 million to make.) Horror flicks like "Weapons" and anime offerings like "Infinity Castle" have also attracted sizable audiences.

Paul Thomas Anderson's "One Battle After Another," an action movie with ele-

ments of comedy, has taken in \$70 million after seven weeks of release.

That said, the box office is hurting as a whole. Theaters in the US and Canada collected \$445 million across all titles in October, the lowest total on record, after adjusting for inflation and excluding 2020, when the pandemic darkened screens. For context, October ticket sales in 2019 totaled an adjusted \$1 billion, according to Comscore.

Haven't dramas and comedies been struggling for a while? Yes. What's different now is the sheer volume of misfires, and the number of major stars involved. Margot Robbie, Colin Farrell, Dwayne Johnson, Channing Ta-

tum, Austin Butler, Keanu Reeves, Emma Stone, Sweeney and Russell Crowe have all failed to fill seats (to varying degrees) over the past three months.

"It has seriously begun to look like the bottom is falling out," Owen Gleiberman, chief film critic for Variety, the entertainment trade news outlet, wrote last week.

During the pandemic, Hollywood largely ended the long-held practice of giving theaters an exclusive window of about 90 days to show new movies. Instead, movies started to become available for digital rental or purchase after as little as 17 days.

This diminished the incentive to see movies in theaters — especially dramas and comedies, which play just fine on living room TVs.

Alternate Markets

From Page 1

This reflected the growing confidence in India's food safety and quality assurance systems.

"Exports to Russia will also be expanded in a big way. They (Russia) are in the process of giving final approvals to 25 fisheries. We are working actively to get more approved," said Goyal.

The minister noted that India had been able to identify alternate markets after the imposition of high US tariffs and gradually resolve export problems. US President Donald

Trump has imposed a steep 50% tariff on Indian goods, half of which are penal tariffs for New Delhi's continued purchases of Russian crude oil.

Andhra Pradesh accounts for 80% of India's total shrimp exports and had been exporting about 70% of its produce to the US. The imposition of tariffs, which touched an effective rate of as much as 59.72%, severely dented the state's shrimp exports to the US.

In October, Australia permitted unpeeled shrimp imports from Andhra Pradesh after an eight-year gap. Australia had earlier restricted imports from India after it found white spot virus in certain consignments.

TARIFF-HAPPY TRUMP STRUGGLING WITH HIGH CONSUMER PRICES

Inflation Forces US Duty Cut on Key Food Staples

Washington: President Donald Trump announced Friday that he was scrapping US tariffs on beef, coffee, tropical fruits and a broad swath of other commodities — a dramatic move that comes amid mounting pressure on his administration to better combat high consumer prices.

Trump has built his second term around imposing steep levies on goods imported into the United States in hopes of encouraging domestic production and lifting the economy. His abrupt retreat from his signature tariff policy on so many staples key to the American diet is significant, and it comes after voters in off-year elections this month cited economic concerns as their top issue, resulting in big wins for Democrats in Virginia, New Jersey and other key races around the country.

"We just did a little bit of a roll-back on some foods like coffee," Trump said aboard Air Force One as he flew to Florida hours after the tariff announcement was made. Pressed on his tariffs helping to increase consumer prices, Trump acknowledged, "I say they may, in some cases" have that effect. "But to a large extent they've been borne by other countries," he added.

Meanwhile, inflation—despite Trump's pronouncements that it

US President Donald Trump speaks to reporters on Friday AP

has vanished since he took office in January—remains elevated, further increasing pressure on US consumers. The Trump administration has insisted that its tariffs had helped fill government coffers and weren't a major factor in higher prices at grocery stores around the country. But Democrats were quick to point Friday's move as an acknowledgement that Trump's policies were hurting American pocketbooks.

"President Trump is finally admitting what we always knew: his tariffs are raising prices for the American people," Virginia Democratic Rep. Don Beyer said in a statement. "After getting drubbed in recent elections because of voters' fury that Trump has broken his promises to fix inflation, the

White House is trying to cast this tariff retreat as a 'pivot to affordability.'"

GROCERY BILL WORRIES

Trump slapped tariffs on most countries around the globe in April. He and his administration still say that tariffs don't increase consumer prices, despite economic evidence to the contrary.

Record-high beef prices have been a particular concern, and Trump had said he intended to take action to try and lower them. Trump's tariffs on Brazil, a major beef exporter, had been a factor.

Trump signed an executive order that also removes tariffs on tea, fruit juice, cocoa, spices, bananas, oranges, tomatoes and certain fertilizers. Some of the products covered aren't produced in the United States, meaning that tariffs meant to spur domestic production had little effect. But reducing the tariffs will still likely mean lower prices for US consumers.

The Food Industry Association, which represents retailers, producers and a variety of related industry firms and services, applauded Trump's move to provide "swift tariff relief," noting that import US taxes "are an important factor" in a "complex mix" of supply chain issues. AP

New Places in Popular Countries

From Page 1

The Commonwealth of Independent States (CIS) is a grouping of former Soviet Union republics. There is also no need for invitations or hotel confirmations. By 2030, Moscow expects to host up to six million international tourists annually, driven largely by travelers from India, China, the Asia-Pacific region and West Asia.

In the first eight months of 2025, Vietnam recorded 443,000 visitors from India, marking a 42.2% rise from the year earlier. That compares with 392,000 Indian visitors in 2023 and 507,000 in 2024. Because of rising interest, MakeMyTrip has launched holiday packages to Phu Quoc, Vietnam, with exclusive direct flights operated by Air India Express starting from next month. The island currently has no direct connectivity from India.

"New destinations are emerging within already popular markets such as Thailand and Vietnam and are driving demand," said MakeMyTrip cofounder and group CEO Rajesh Magow. "We're seeing a healthy uptick for the Philippines as well as it has done away with visas for Indians. Geopolitical developments seem to have impacted bookings for Azerbaijan and Turkey."

As per preliminary data from the Japan National Travel Organization, the island nation saw 233,400 visitor arrivals from India in the January-September period, up 36.6% from the year earlier.

Travel company Thomas Cook (India) said destinations like Japan, Vietnam and Sri Lanka have made a strong showing this year. "Additionally, an appreciating Indian rupee versus the Sri Lankan rupee and Vietnam's dong has served to make the destinations even

more attractive and this is reflecting in our numbers," said Rajeev Kale, president and country head for holidays, MICE and visa. "Increased demand for Japan, is resulting in extended stays and we have been able to include new locales like Sapporo in addition to Tokyo, Kyoto, and Osaka."

In the first nine months of this year, Georgia saw 103,968 Indian visitors, up 19%. India is one of the country's most promising and fast-growing source markets, said Maria Omiadze, head, Georgian National Tourism Administration.

"This strong trend reflects the growing momentum of our cooperation with Indian travel partners, enhanced flight connectivity, and the rising appeal of Georgia's diverse offerings from history and culture to gastronomy and nature," she said.

Between January and September this year, South Korea received 153, 619 Indian visitors, up 13% over the same period last year.

Ancillary Dents

From Page 1

Similarly, Delta Corp wrote down the value of its investments in Deltatech Gaming, Head Digital Works and OpenPlay Technologies to zero. The move led to a fair value reduction of ₹378.3 crore as the affected businesses halted revenue-generating operations.

Fintech firm Paytm saw its net profit plunge 98% after booking an impairment of ₹190 crore on a loan extended to its joint venture First Games Technology.

More companies with exposure to poker, rummy and fantasy sports are expected to report similar impairments over the next two quarters, particularly those that raised capital at peak valuations during 2020-22.

Payment firms that previously benefited from gaming transactions are also facing pressure. Mobikwik reported an eightfold increase in net loss to ₹28.6 crore

for the September quarter, alongside a 7% on-year fall in operating revenue to ₹270.2 crore.

An executive at a payments firm said the decline in payment flows due to the RMG ban is temporary and firms can recover even if volumes fall 10-15% month-on-month. However, smaller payment aggregators that had high exposure to gaming could continue to see a meaningful impact on profitability, the person said.

Meanwhile, several gaming firms have exited India or scaled down operations. Hike shut down its RMG app Rush, WinZO exited the RMG segment locally and expanded into the US, and MPL halted all cash gaming in India, with founder Sai Srinivas telling employees that 50% of group revenue vanished overnight due to the new law. Unified Payments Interface transactions under the gaming category fell to 270 million in August, from 351 million in July, after the ban came into effect, as per National Payments Corporation of India data.

Local-Global Gains

From Page 1

Blending global expertise with local adaptation has allowed these firms to bring new models to India faster than many domestic ones. BYD, one of the world's largest EV makers, soon followed, expanding steadily amid strong commercial and fleet demand.

Meanwhile, Volvo Cars, Swedish in heritage but owned by China's Geely, carved out a steady premium presence. Volvo's volumes remain comparatively smaller, but they reflect a growing luxury EV segment. "Our growth in India is driven by a strong and loyal customer base and our accelerated focus on electrification," said Jyoti Malhotra, MD of Volvo Car India. The company, an early mover in luxury electric mobility, has committed to launching one new EV every year.

The coexistence of strong domestic and global brands has

transformed India into a highly evolved EV market, particularly in the premium segment.

Volvo, for instance, conducts regular customer clinics to fine-tune features, pricing, and expectations. "All the models that we sell in India are now assembled locally," said Malhotra.

STILL LEADING

In 2019, Chinese brands did not account for a single battery electric vehicle (BEV) sale in India. By October this year, they contributed 57,260 vehicles, claiming 33% of the market by volume, according to Jato Dynamics.

Yet, despite this surge, Indian-owned companies remain the backbone of the country's EV growth. Their BEV sales climbed to 101,724 this calendar year till October, from 74,442 units in 2024. "Localisation, affordability, wider geographic reach and strong alignment with policies like FAME-II and PLI have worked," said Ravi Bhatia, president of Jato Dynamics.

Box Office Struggling Overall

From Page 1

"Kiss of the Spider Woman," starring Jennifer Lopez and Diego Luna, cost roughly \$30 million and managed only \$1.6 million in ticket sales over a month.

Franchise films are chugging along. "Predator: Badlands," the ninth installment in a 38-year-old series, collected \$40 million last weekend, about 30% better than analysts had predicted. (It cost \$105 million to make.) Horror flicks like "Weapons" and anime offerings like "Infinity Castle" have also attracted sizable audiences.

Paul Thomas Anderson's "One Battle After Another," an action movie with ele-

ments of comedy, has taken in \$70 million after seven weeks of release.

That said, the box office is hurting as a whole. Theaters in the US and Canada collected \$445 million across all titles in October, the lowest total on record, after adjusting for inflation and excluding 2020, when the pandemic darkened screens. For context, October ticket sales in 2019 totaled an adjusted \$1 billion, according to Comscore.

Haven't dramas and comedies been struggling for a while? Yes. What's different now is the sheer volume of misfires, and the number of major stars involved. Margot Robbie, Colin Farrell, Dwayne Johnson, Channing Ta-

tum, Austin Butler, Keanu Reeves, Emma Stone, Sweeney and Russell Crowe have all failed to fill seats (to varying degrees) over the past three months.

"It has seriously begun to look like the bottom is falling out," Owen Gleiberman, chief film critic for Variety, the entertainment trade news outlet, wrote last week.

During the pandemic, Hollywood largely ended the long-held practice of giving theaters an exclusive window of about 90 days to show new movies. Instead, movies started to become available for digital rental or purchase after as little as 17 days.

This diminished the incentive to see movies in theaters — especially dramas and comedies, which play just fine on living room TVs.

Alternate Markets

From Page 1

This reflected the growing confidence in India's food safety and quality assurance systems.

"Exports to Russia will also be expanded in a big way. They (Russia) are in the process of giving final approvals to 25 fisheries. We are working actively to get more approved," said Goyal.

The minister noted that India had been able to identify alternate markets after the imposition of high US tariffs and gradually resolve export problems. US President Donald

Trump has imposed a steep 50% tariff on Indian goods, half of which are penal tariffs for New Delhi's continued purchases of Russian crude oil.

Andhra Pradesh accounts for 80% of India's total shrimp exports and had been exporting about 70% of its produce to the US. The imposition of tariffs, which touched an effective rate of as much as 59.72%, severely dented the state's shrimp exports to the US.

In October, Australia permitted unpeeled shrimp imports from Andhra Pradesh after an eight-year gap. Australia had earlier restricted imports from India after it found white spot virus in certain consignments.

a) The unaudited standalone and consolidated financial results have been reviewed and recommended by the Audit Committee and approved by the Board of Directors at their meeting held on November 14, 2025. The above unaudited financial results for the quarter and the six months ended September 30, 2025 have been reviewed by the statutory auditors of the Company.
b) The above financial results have been prepared in accordance with the Companies (Indian Accounting Standards) Rules, 2015 (Ind AS prescribed under Section 133 of the Companies Act, 2013) and read with Rules framed thereunder and Regulation 33 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended from time to time.
c) The Company manufactures bearings and other related components and is of the view that it is a single business segment in accordance with Ind AS-108 'Operating Segments' notified pursuant to Companies (Accounting Standards) Rules, 2015.
d) Exceptional items: During the quarter and six months ended 30 September 2025, the Company has incurred certain demerger expense for IT cost, professional services and employee benefits expenses aggregating to INR 257.4 million towards Scheme of Arrangement. These restructuring costs are non-recurring in nature and do not reflect the Company's normal operating performance.
e) The unaudited consolidated financial results include unaudited financial results of a wholly owned subsidiary and two associates of the Company for the quarter and six months ended September 30, 2025.
f) The Company has received a certified true copy of the order dated September 26, 2025, from the Hon'ble National Company Law Tribunal, Mumbai Bench ("NCLT"), approving the Scheme of Arrangement among SKF India Limited ("Demerged Company"), SKF India (Industrial) Limited ("Resulting Company"), and their respective shareholders and creditors under section 230-232 and other applicable provisions of the Companies Act, 2013 and ruled framed thereunder (the "Scheme"). The Scheme has an appointed and effective date of October 1, 2025 ("Effective Date"). The Scheme, among other provisions, entails the demerger of the Industrial Undertaking ("Demerged Undertaking") from the Demerged Company into the Resulting Company on a going concern basis. This event qualifies as an adjusting event for the financial results. Accordingly, in line with Ind AS 105 - Non-Current Assets Held for Sale and Discontinued Operations, the Industrial Undertaking has been classified as "Held for Distribution" as of September 30, 2025. The financial results for the quarter and six months ended September 30, 2025, the quarter ended June 30, 2025, the year ended March 31, 2025, and the quarter and six months ended September 30, 2024, have been restated to reflect the impact of the Scheme, with the Industrial Undertaking presented as discontinued operations. Following the implementation of the Scheme, the Resulting Company has ceased to be a subsidiary of the Company.
g) The unaudited standalone and consolidated financial results for the quarter ended September 30, 2025 are available on the BSE Limited website (URL: www.bseindia.com), the National Stock Exchange of India Limited website (URL: www.nseindia.com) and on the Company's website (URL: www.skf.com/in).

TARIFF-HAPPY TRUMP STRUGGLING WITH HIGH CONSUMER PRICES

Inflation Forces US Duty Cut on Key Food Staples

Washington: President Donald Trump announced Friday that he was scrapping US tariffs on beef, coffee, tropical fruits and a broad swath of other commodities — a dramatic move that comes amid mounting pressure on his administration to better combat high consumer prices.

Trump has built his second term around imposing steep levies on goods imported into the United States in hopes of encouraging domestic production and lifting the economy. His abrupt retreat from his signature tariff policy on so many staples key to the American diet is significant, and it comes after voters in off-year elections this month cited economic concerns as their top issue, resulting in big wins for Democrats in Virginia, New Jersey and other key races around the country.

"We just did a little bit of a roll-back on some foods like coffee," Trump said aboard Air Force One as he flew to Florida hours after the tariff announcement was made. Pressed on his tariffs helping to increase consumer prices, Trump acknowledged, "I say they may, in some cases" have that effect. "But to a large extent they've been borne by other countries," he added.

Meanwhile, inflation—despite Trump's pronouncements that it

US President Donald Trump speaks to reporters on Friday AP

has vanished since he took office in January—remains elevated, further increasing pressure on US consumers. The Trump administration has insisted that its tariffs had helped fill government coffers and weren't a major factor in higher prices at grocery stores around the country. But Democrats were quick to point Friday's move as an acknowledgement that Trump's policies were hurting American pocketbooks.

"President Trump is finally admitting what we always knew: his tariffs are raising prices for the American people," Virginia Democratic Rep. Don Beyer said in a statement. "After getting drubbed in recent elections because of voters' fury that Trump has broken his promises to fix inflation, the

White House is trying to cast this tariff retreat as a 'pivot to affordability.'"

GROCERY BILL WORRIES

Trump slapped tariffs on most countries around the globe in April. He and his administration still say that tariffs don't increase consumer prices, despite economic evidence to the contrary.

Record-high beef prices have been a particular concern, and Trump had said he intended to take action to try and lower them. Trump's tariffs on Brazil, a major beef exporter, had been a factor.

Trump signed an executive order that also removes tariffs on tea, fruit juice, cocoa, spices, bananas, oranges, tomatoes and certain fertilizers. Some of the products covered aren't produced in the United States, meaning that tariffs meant to spur domestic production had little effect. But reducing the tariffs will still likely mean lower prices for US consumers.

The Food Industry Association, which represents retailers, producers and a variety of related industry firms and services, applauded Trump's move to provide "swift tariff relief," noting that import US taxes "are an important factor" in a "complex mix" of supply chain issues. AP

The minister noted that India had been able to identify alternate markets after the imposition of high US tariffs and gradually resolve export problems. US President Donald

Trump has imposed a steep 50% tariff on Indian goods, half of which are penal tariffs for New Delhi's continued purchases of Russian crude oil.

Andhra Pradesh accounts for 80% of India's total shrimp exports and had been exporting about 70% of its produce to the US. The imposition of tariffs, which touched an effective rate of as much as 59.72%, severely dented the state's shrimp exports to the US.

In October, Australia permitted unpeeled shrimp imports from Andhra Pradesh after an eight-year gap. Australia had earlier restricted imports from India after it found white spot virus in certain consignments.

Central Bank of India

Short Tender Notice

Date: 15.11.2025

The Central Bank of India invites **online** tenders from eligible bidders for Furnishing (Furniture, Electrical, Data cabling & Low side Air-conditioning) work at Existing premises of Branch CANTT ROAD and ALAMBAGH under Regional Office Lucknow. For a detailed Notice Inviting Tenders visit the webpage: <http://www.centralbankofindia.co.in/en/active-tender> and for online submission of bids visit the webpage: <https://centralbank.abprocure.com/EPROC/>

The deadline for submission of bids is 08.12.2025 upto 3.00pm

- a) The unaudited standalone and consolidated financial results have been reviewed and recommended by the Audit Committee and approved by the Board of Directors at their meeting held on November 14, 2025. The above unaudited financial results for the quarter and the six months ended September 30, 2025 have been reviewed by the statutory auditors of the Company.
- b) The above financial results have been prepared in accordance with the Companies (Indian Accounting Standards) Rules, 2015 (Ind AS prescribed under Section 133 of the Companies Act, 2013) and read with Rules framed thereunder and Regulation 33 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended from time to time.
- c) The Company manufactures bearings and other related components and is of the view that it is a single business segment in accordance with Ind AS-108 "Operating Segments" notified pursuant to Companies (Accounting Standards) Rules, 2015.
- d) Exceptional items: During the quarter and six months ended 30 September 2025, the Company has incurred certain demerger expense for IT cost, professional services and employee benefits expenses aggregating to INR 257.4 million towards Scheme of Arrangement. These restructuring costs are non-recurring in nature and do not reflect the Company's normal operating performance.
- e) The unaudited consolidated financial results include unaudited financial results of a wholly owned subsidiary and two associates of the Company for the quarter and six months ended September 30, 2025.
- f) The Company has received a certified true copy of the order dated September 26, 2025, from the Hon'ble National Company Law Tribunal, Mumbai Bench ("NCLT"), approving the Scheme of Arrangement among SKF India Limited ("Demerged Company"), SKF India (Industrial) Limited ("Resulting Company"), and their respective shareholders and creditors under section 230-232 and other applicable provisions of the Companies Act, 2013 and ruled framed thereunder (the "Scheme"). The Scheme has an appointed and effective date of October 1, 2025. The certified copy of the NCLT order was filed with the Registrar of Companies on October 1, 2025 ("Effective Date"). The Scheme, among other provisions, entails the demerger of the Industrial Undertaking ("Demerged Undertaking") from the Demerged Company into the Resulting Company on a going concern basis. This event qualifies as an adjusting event for the financial results. Accordingly, in line with Ind AS 105 - Non-Current Assets Held for Sale and Discontinued Operations, the Industrial Undertaking has been classified as "Held for Distribution" as of September 30, 2025. The financial results for the quarter and six months ended September 30, 2025, the quarter ended June 30, 2025, the year ended March 31, 2025, and the quarter and six months ended September 30, 2024, have been restated to reflect the impact of the Scheme, with the Industrial Undertaking presented as discontinued operations. Following the implementation of the Scheme, the Resulting Company has ceased to be a subsidiary of the Company.
- g) The unaudited standalone and consolidated financial results for the quarter ended September 30, 2025 are available on the BSE Limited website (URL: www.bseindia.com), the National Stock Exchange of India Limited website (URL: www.nseindia.com) and on the Company's website (URL: www.skf.com/in).

TARIFF-HAPPY TRUMP STRUGGLING WITH HIGH CONSUMER PRICES

Inflation Forces US Duty Cut on Key Food Staples

Washington: President Donald Trump announced Friday that he was scrapping US tariffs on beef, coffee, tropical fruits and a broad swath of other commodities — a dramatic move that comes amid mounting pressure on his administration to better combat high consumer prices.

Trump has built his second term around imposing steep levies on goods imported into the United States in hopes of encouraging domestic production and lifting the economy. His abrupt retreat from his signature tariff policy on so many staples key to the American diet is significant, and it comes after voters in off-year elections this month cited economic concerns as their top issue, resulting in big wins for Democrats in Virginia, New Jersey and other key races around the country.

US President Donald Trump speaks to reporters on Friday AP

White House is trying to cast this tariff retreat as a 'pivot to affordability.'

GROCERY BILL WORRIES

Trump slapped tariffs on most countries around the globe in April. He and his administration still say that tariffs don't increase consumer prices, despite economic evidence to the contrary.

Record-high beef prices have been a particular concern, and Trump had said he intended to take action to try and lower them. Trump's tariffs on Brazil, a major beef exporter, had been a factor.

Trump signed an executive order that also removes tariffs on tea, fruit juice, cocoa, spices, bananas, oranges, tomatoes and certain fertilizers. Some of the products covered aren't produced in the United States, meaning that tariffs meant to spur domestic production had little effect. But reducing the tariffs will still likely mean lower prices for US consumers.

The Food Industry Association, which represents retailers, producers and a variety of related industry firms and services, applauded Trump's move to provide "swift tariff relief," noting that import US taxes "are an important factor" in a "complex mix" of supply chain issues. AP

New Places in Popular Countries

From Page 1

The Commonwealth of Independent States (CIS) is a grouping of former Soviet Union republics. There is also no need for invitations or hotel confirmations. By 2030, Moscow expects to host up to six million international tourists annually, driven largely by travelers from India, China, the Asia-Pacific region and West Asia.

In the first eight months of 2025, Vietnam recorded 443,000 visitors from India, marking a 42.2% rise from the year earlier. That compares with 392,000 Indian visitors in 2023 and 507,000 in 2024. Because of rising interest, MakeMyTrip has launched holiday packages to Phu Quoc, Vietnam, with exclusive direct flights operated by Air India Express starting from next month. The island currently has no direct connectivity from India.

"New destinations are emerging within already popular markets such as Thailand and Vietnam and are driving demand," said MakeMyTrip cofounder and group CEO Rajesh Magow. "We're seeing a healthy uptick for the Philippines as well as it has done away with visas for Indians. Geopolitical developments seem to have impacted bookings for Azerbaijan and Turkey."

As per preliminary data from the Japan National Travel Organization, the island nation saw 233,400 visitor arrivals from India in the January-September period, up 36.6% from the year earlier.

more attractive and this is reflecting in our numbers," said Rajeev Kale, president and country head for holidays, MICE and visa. "Increased demand for Japan, is resulting in extended stays and we have been able to include new localities like Sapporo in addition to Tokyo, Kyoto, and Osaka."

In the first nine months of this year, Georgia saw 103,968 Indian visitors, up 19%. India is one of the country's most promising and fast-growing source markets, said Maria Omiadze, head, Georgian National Tourism Administration. "This strong trend reflects the growing momentum of our cooperation with Indian travel partners, enhanced flight connectivity, and the rising appeal of Georgia's diverse offerings from history and culture to gastronomy and nature," she said.

Between January and September this year, South Korea received 153, 619 Indian visitors, up 13% over the same period last year.

Ancillary Dents

From Page 1

Similarly, Delta Corp wrote down the value of its investments in Deltatech Gaming, Head Digital Works and OpenPlay Technologies to zero. The move led to a fair value reduction of ₹378.3 crore as the affected businesses halted revenue-generating operations.

Fintech firm Paytm saw its net profit plunge 98% after booking an impairment of ₹190 crore on a loan extended to its joint venture First Games Technology. More companies with exposure to poker, rummy and fantasy sports are expected to report similar impairments over the next two quarters, particularly those that raised capital at peak valuations during 2020-22.

Payment firms that previously benefited from gaming transactions are also facing pressure. Mobikwik reported an eightfold increase in net loss to ₹28.6 crore

for the September quarter, alongside a 7% on-year fall in operating revenue to ₹270.2 crore.

An executive at a payments firm said the decline in payment flows due to the RMG ban is temporary and firms can recover even if volumes fall 10-15% month-on-month. However, smaller payment aggregators that had high exposure to gaming could continue to see a meaningful impact on profitability, the person said.

Meanwhile, several gaming firms have exited India or scaled down operations. Hike shut down its RMG app Rush, WinZO exited the RMG segment locally and expanded into the US, and MPL halted all cash gaming in India, with founder Sai Srinivas telling employees that 50% of group revenue vanished overnight due to the new law. Unified Payments Interface transactions under the gaming category fell to 270 million in August, from 351 million in July, after the ban came into effect, as per National Payments Corporation of India data.

Local-Global Gains

From Page 1

Blending global expertise with local adaptation has allowed these firms to bring new models to India faster than many domestic ones. BYD, one of the world's largest EV makers, soon followed, expanding steadily amid strong commercial and fleet demand.

Meanwhile, Volvo Cars, Swedish in heritage but owned by China's Geely, carved out a steady premium presence. Volvo's volumes remain comparatively smaller, but they reflect a growing luxury EV segment. "Our growth in India is driven by a strong and loyal customer base and our accelerated focus on electrification," said Jyoti Malhotra, MD of Volvo Car India. The company, an early mover in luxury electric mobility, has committed to launching one new EV every year.

The coexistence of strong domestic and global brands has

transformed India into a highly evolved EV market, particularly in the premium segment.

Volvo, for instance, conducts regular customer clinics to fine-tune features, pricing, and expectations. "All the models that we sell in India are now assembled locally," said Malhotra.

STILL LEADING

In 2019, Chinese brands did not account for a single battery electric vehicle (BEV) sale in India. By October this year, they contributed 57,260 vehicles, claiming 33% of the market by volume, according to Jato Dynamics.

Yet, despite this surge, Indian-owned companies remain the backbone of the country's EV growth. Their BEV sales climbed to 101,724 this calendar year till October, from 74,442 units in 2024. "Localisation, affordability, wider geographic reach and strong alignment with policies like FAME-II and PLI have worked," said Ravi Bhatia, president of Jato Dynamics.

Box Office Struggling Overall

From Page 1

"Kiss of the Spider Woman," starring Jennifer Lopez and Diego Luna, cost roughly \$30 million and managed only \$1.6 million in ticket sales over a month.

Franchise films are chugging along. "Predator: Badlands," the ninth installment in a 38-year-old series, collected \$40 million last weekend, about 30% better than analysts had predicted. (It cost \$105 million to make.) Horror flicks like "Weapons" and anime offerings like "Infinity Castle" have also attracted sizable audiences.

Paul Thomas Anderson's "One Battle After Another," an action movie with ele-

ments of comedy, has taken in \$70 million after seven weeks of release.

That said, the box office is hurting as a whole. Theaters in the US and Canada collected \$445 million across all titles in October, the lowest total on record, after adjusting for inflation and excluding 2020, when the pandemic darkened screens. For context, October ticket sales in 2019 totaled an adjusted \$1 billion, according to Comscore.

Haven't dramas and comedies been struggling for a while? Yes. What's different now is the sheer volume of misfires, and the number of major stars involved. Margot Robbie, Colin Farrell, Dwayne Johnson, Channing Ta-

tum, Austin Butler, Keanu Reeves, Emma Stone, Sweeney and Russell Crowe have all failed to fill seats (to varying degrees) over the past three months.

"It has seriously begun to look like the bottom is falling out," Owen Gleiberman, chief film critic for Variety, the entertainment trade news outlet, wrote last week.

During the pandemic, Hollywood largely ended the long-held practice of giving theaters an exclusive window of about 90 days to show new movies. Instead, movies started to become available for digital rental or purchase after as little as 17 days.

This diminished the incentive to see movies in theaters — especially dramas and comedies, which play just fine on living room TVs.

Alternate Markets

From Page 1

This reflected the growing confidence in India's food safety and quality assurance systems.

"Exports to Russia will also be expanded in a big way. They (Russia) are in the process of giving final approvals to 25 fisheries. We are working actively to get more approved," said Goyal.

The minister noted that India had been able to identify alternate markets after the imposition of high US tariffs and gradually resolve export problems. US President Donald

Trump has imposed a steep 50% tariff on Indian goods, half of which are penal tariffs for New Delhi's continued purchases of Russian crude oil.

Andhra Pradesh accounts for 80% of India's total shrimp exports and had been exporting about 70% of its produce to the US. The imposition of tariffs, which touched an effective rate of as much as 59.72%, severely dented the state's shrimp exports to the US.

In October, Australia permitted unpeeled shrimp imports from Andhra Pradesh after an eight-year gap. Australia had earlier restricted imports from India after it found white spot virus in certain consignments.

TARIFF-HAPPY TRUMP STRUGGLING WITH HIGH CONSUMER PRICES

Inflation Forces US Duty Cut on Key Food Staples

Washington: President Donald Trump announced Friday that he was scrapping US tariffs on beef, coffee, tropical fruits and a broad swath of other commodities — a dramatic move that comes amid mounting pressure on his administration to better combat high consumer prices.

Trump has built his second term around imposing steep levies on goods imported into the United States in hopes of encouraging domestic production and lifting the economy. His abrupt retreat from his signature tariff policy on so many staples key to the American diet is significant, and it comes after voters in off-year elections this month cited economic concerns as their top issue, resulting in big wins for Democrats in Virginia, New Jersey and other key races around the country.

"We just did a little bit of a roll-back on some foods like coffee," Trump said aboard Air Force One as he flew to Florida hours after the tariff announcement was made. Pressed on his tariffs helping to increase consumer prices, Trump acknowledged, "I say they may, in some cases" have that effect. "But to a large extent they've been borne by other countries," he added.

Meanwhile, inflation—despite Trump's pronouncements that it

US President Donald Trump speaks to reporters on Friday AP

has vanished since he took office in January—remains elevated, further increasing pressure on US consumers. The Trump administration has insisted that its tariffs had helped fill government coffers and weren't a major factor in higher prices at grocery stores around the country. But Democrats were quick to point Friday's move as an acknowledgement that Trump's policies were hurting American pocketbooks.

"President Trump is finally admitting what we always knew: his tariffs are raising prices for the American people," Virginia Democratic Rep. Don Beyer said in a statement. "After getting drubbed in recent elections because of voters' fury that Trump has broken his promises to fix inflation, the

White House is trying to cast this tariff retreat as a 'pivot to affordability.'"

GROCERY BILL WORRIES

Trump slapped tariffs on most countries around the globe in April. He and his administration still say that tariffs don't increase consumer prices, despite economic evidence to the contrary.

Record-high beef prices have been a particular concern, and Trump had said he intended to take action to try and lower them. Trump's tariffs on Brazil, a major beef exporter, had been a factor.

Trump signed an executive order that also removes tariffs on tea, fruit juice, cocoa, spices, bananas, oranges, tomatoes and certain fertilizers. Some of the products covered aren't produced in the United States, meaning that tariffs meant to spur domestic production had little effect. But reducing the tariffs will still likely mean lower prices for US consumers.

The Food Industry Association, which represents retailers, producers and a variety of related industry firms and services, applauded Trump's move to provide "swift tariff relief," noting that import US taxes "are an important factor" in a "complex mix" of supply chain issues. AP

New Places in Popular Countries

From Page 1

The Commonwealth of Independent States (CIS) is a grouping of former Soviet Union republics. There is also no need for invitations or hotel confirmations. By 2030, Moscow expects to host up to six million international tourists annually, driven largely by travelers from India, China, the Asia-Pacific region and West Asia.

In the first eight months of 2025, Vietnam recorded 443,000 visitors from India, marking a 42.2% rise from the year earlier. That compares with 392,000 Indian visitors in 2023 and 507,000 in 2024. Because of rising interest, MakeMyTrip has launched holiday packages to Phu Quoc, Vietnam, with exclusive direct flights operated by Air India Express starting from next month. The island currently has no direct connectivity from India.

"New destinations are emerging within already popular markets such as Thailand and Vietnam and are driving demand," said MakeMyTrip cofounder and group CEO Rajesh Magow. "We're seeing a healthy uptick for the Philippines as well as it has done away with visas for Indians. Geopolitical developments seem to have impacted bookings for Azerbaijan and Turkey."

As per preliminary data from the Japan National Travel Organization, the island nation saw 233,400 visitor arrivals from India in the January-September period, up 36.6% from the year earlier. Travel company Thomas Cook (India) said destinations like Japan, Vietnam and Sri Lanka have made a strong showing this year. "Additionally, an appreciating Indian rupee versus the Sri Lankan rupee and Vietnam's dong has served to make the destinations even

more attractive and this is reflecting in our numbers," said Rajeev Kale, president and country head for holidays, MICE and visa. "Increased demand for Japan, is resulting in extended stays and we have been able to include new locales like Sapporo in addition to Tokyo, Kyoto, and Osaka."

In the first nine months of this year, Georgia saw 103,968 Indian visitors, up 19%. India is one of the country's most promising and fast-growing source markets, said Maria Omiadze, head, Georgian National Tourism Administration.

"This strong trend reflects the growing momentum of our cooperation with Indian travel partners, enhanced flight connectivity, and the rising appeal of Georgia's diverse offerings from history and culture to gastronomy and nature," she said.

Between January and September this year, South Korea received 153, 619 Indian visitors, up 13% over the same period last year.

Ancillary Dents

From Page 1

Similarly, Delta Corp wrote down the value of its investments in Deltatech Gaming, Head Digital Works and OpenPlay Technologies to zero. The move led to a fair value reduction of ₹378.3 crore as the affected businesses halted revenue-generating operations.

Fintech firm Paytm saw its net profit plunge 98% after booking an impairment of ₹190 crore on a loan extended to its joint venture First Games Technology.

More companies with exposure to poker, rummy and fantasy sports are expected to report similar impairments over the next two quarters, particularly those that raised capital at peak valuations during 2020-22.

Payment firms that previously benefited from gaming transactions are also facing pressure. Mobikwik reported an eightfold increase in net loss to ₹28.6 crore

for the September quarter, alongside a 7% on-year fall in operating revenue to ₹270.2 crore.

An executive at a payments firm said the decline in payment flows due to the RMG ban is temporary and firms can recover even if volumes fall 10-15% month-on-month. However, smaller payment aggregators that had high exposure to gaming could continue to see a meaningful impact on profitability, the person said.

Meanwhile, several gaming firms have exited India or scaled down operations. Hike shut down its RMG app Rush, WinZO exited the RMG segment locally and expanded into the US, and MPL halted all cash gaming in India, with founder Sai Srinivas telling employees that 50% of group revenue vanished overnight due to the new law. Unified Payments Interface transactions under the gaming category fell to 270 million in August, from 351 million in July, after the ban came into effect, as per National Payments Corporation of India data.

Local-Global Gains

From Page 1

Blending global expertise with local adaptation has allowed these firms to bring new models to India faster than many domestic ones. BYD, one of the world's largest EV makers, soon followed, expanding steadily amid strong commercial and fleet demand.

Meanwhile, Volvo Cars, Swedish in heritage but owned by China's Geely, carved out a steady premium presence. Volvo's volumes remain comparatively smaller, but they reflect a growing luxury EV segment. "Our growth in India is driven by a strong and loyal customer base and our accelerated focus on electrification," said Jyoti Malhotra, MD of Volvo Car India. The company, an early mover in luxury electric mobility, has committed to launching one new EV every year.

The coexistence of strong domestic and global brands has

transformed India into a highly evolved EV market, particularly in the premium segment.

Volvo, for instance, conducts regular customer clinics to fine-tune features, pricing, and expectations. "All the models that we sell in India are now assembled locally," said Malhotra.

STILL LEADING

In 2019, Chinese brands did not account for a single battery electric vehicle (BEV) sale in India. By October this year, they contributed 57,260 vehicles, claiming 33% of the market by volume, according to Jato Dynamics.

Yet, despite this surge, Indian-owned companies remain the backbone of the country's EV growth. Their BEV sales climbed to 101,724 this calendar year till October, from 74,442 units in 2024. "Localisation, affordability, wider geographic reach and strong alignment with policies like FAME-II and PLI have worked," said Ravi Bhatia, president of Jato Dynamics.

Box Office Struggling Overall

From Page 1

"Kiss of the Spider Woman," starring Jennifer Lopez and Diego Luna, cost roughly \$30 million and managed only \$1.6 million in ticket sales over a month.

Franchise films are chugging along. "Predator: Badlands," the ninth installment in a 38-year-old series, collected \$40 million last weekend, about 30% better than analysts had predicted. (It cost \$105 million to make.) Horror flicks like "Weapons" and anime offerings like "Infinity Castle" have also attracted sizable audiences.

Paul Thomas Anderson's "One Battle After Another," an action movie with ele-

ments of comedy, has taken in \$70 million after seven weeks of release.

That said, the box office is hurting as a whole. Theaters in the US and Canada collected \$445 million across all titles in October, the lowest total on record, after adjusting for inflation and excluding 2020, when the pandemic darkened screens. For context, October ticket sales in 2019 totaled an adjusted \$1 billion, according to Comscore.

Haven't dramas and comedies been struggling for a while? Yes. What's different now is the sheer volume of misfires, and the number of major stars involved. Margot Robbie, Colin Farrell, Dwayne Johnson, Channing Ta-

tum, Austin Butler, Keanu Reeves, Emma Stone, Sweeney and Russell Crowe have all failed to fill seats (to varying degrees) over the past three months.

"It has seriously begun to look like the bottom is falling out," Owen Gleiberman, chief film critic for Variety, the entertainment trade news outlet, wrote last week.

During the pandemic, Hollywood largely ended the long-held practice of giving theaters an exclusive window of about 90 days to show new movies. Instead, movies started to become available for digital rental or purchase after as little as 17 days.

This diminished the incentive to see movies in theaters — especially dramas and comedies, which play just fine on living room TVs.

Alternate Markets

From Page 1

This reflected the growing confidence in India's food safety and quality assurance systems.

"Exports to Russia will also be expanded in a big way. They (Russia) are in the process of giving final approvals to 25 fisheries. We are working actively to get more approved," said Goyal.

The minister noted that India had been able to identify alternate markets after the imposition of high US tariffs and gradually resolve export problems. US President Donald

Trump has imposed a steep 50% tariff on Indian goods, half of which are penal tariffs for New Delhi's continued purchases of Russian crude oil.

Andhra Pradesh accounts for 80% of India's total shrimp exports and had been exporting about 70% of its produce to the US. The imposition of tariffs, which touched an effective rate of as much as 59.72%, severely dented the state's shrimp exports to the US.

In October, Australia permitted unpeeled shrimp imports from Andhra Pradesh after an eight-year gap. Australia had earlier restricted imports from India after it found white spot virus in certain consignments.

a) The unaudited standalone and consolidated financial results have been reviewed and recommended by the Audit Committee and approved by the Board of Directors at their meeting held on November 14, 2025. The above unaudited financial results for the quarter and the six months ended September 30, 2025 have been reviewed by the statutory auditors of the Company.
b) The above financial results have been prepared in accordance with the Companies (Indian Accounting Standards) Rules, 2015 (Ind AS prescribed under Section 133 of the Companies Act, 2013) and read with Rules framed thereunder and Regulation 33 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended from time to time.
c) The Company manufactures bearings and other related components and is of the view that it is a single business segment in accordance with Ind AS-108 'Operating Segments' notified pursuant to Companies (Accounting Standards) Rules, 2015.
d) Exceptional items: During the quarter and six months ended 30 September 2025, the Company has incurred certain demerger expense for IT cost, professional services and employee benefits expenses aggregating to INR 2574 million towards Scheme of Arrangement. These restructuring costs are non-recurring in nature and do not reflect the Company's normal operating performance.
e) The unaudited consolidated financial results include unaudited financial results of a wholly owned subsidiary and two associates of the Company for the quarter and six months ended September 30, 2025.
f) The Company has received a certified true copy of the order dated September 26, 2025, from the Hon'ble National Company Law Tribunal, Mumbai Bench ("NCLT"), approving the Scheme of Arrangement among SKF India Limited ("Demerged Company"), SKF India (Industrial) Limited ("Resulting Company"), and their respective shareholders and creditors under section 230-232 and other applicable provisions of the Companies Act, 2013 and ruled framed thereunder (the "Scheme"). The Scheme has an appointed and effective date of October 1, 2025 ("Effective Date"). The Scheme, among other provisions, entails the demerger of the Industrial Undertaking ("Demerged Undertaking") from the Demerged Company into the Resulting Company on a going concern basis. This event qualifies as an adjusting event for the financial results. Accordingly, in line with Ind AS 105 - Non-Current Assets Held for Sale and Discontinued Operations, the Industrial Undertaking has been classified as "Held for Distribution" as of September 30, 2025. The financial results for the quarter and six months ended September 30, 2025, the quarter ended June 30, 2025, the year ended March 31, 2025, and the quarter and six months ended September 30, 2024, have been restated to reflect the impact of the Scheme, with the Industrial Undertaking presented as discontinued operations. Following the implementation of the Scheme, the Resulting Company has ceased to be a subsidiary of the Company.
g) The unaudited standalone and consolidated financial results for the quarter ended September 30, 2025 are available on the BSE Limited website (URL: www.bseindia.com), the National Stock Exchange of India Limited website (URL: www.nseindia.com) and on the Company's website (URL: www.skf.com/in).

a) The unaudited standalone and consolidated financial results have been reviewed and recommended by the Audit Committee and approved by the Board of Directors at their meeting held on November 14, 2025. The above unaudited financial results for the quarter and the six months ended September 30, 2025 have been reviewed by the statutory auditors of the Company.

b) The above financial results have been prepared in accordance with the Companies (Indian Accounting Standards) Rules, 2015 (Ind AS) prescribed under Section 133 of the Companies Act, 2013 and read with Rules framed thereunder and Regulation 33 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended from time to time.

c) The Company manufactures bearings and other related components and is of the view that it is a single business segment in accordance with Ind AS-108 'Operating Segments' notified pursuant to Companies (Accounting Standards) Rules, 2015.

d) Exceptional items: During the quarter and six months ended 30 September 2025, the Company has incurred certain demerger expense for IT cost, professional services and employee benefits expenses aggregating to INR 257.4 million towards Scheme of Arrangement. These restructuring costs are non-recurring in nature and do not reflect the Company's normal operating performance.

e) The unaudited consolidated financial results include unaudited financial results of a wholly owned subsidiary and two associates of the Company for the quarter and six months ended September 30, 2025.

f) The Company has received a certified true copy of the order dated September 26, 2025, from the Hon'ble National Company Law Tribunal, Mumbai Bench ("NCLT"), approving the Scheme of Arrangement among SKF India Limited ("Demerged Company"), SKF India (Industrial) Limited ("Resulting Company"), and their respective shareholders and creditors under section 230-232 and other applicable provisions of the Companies Act, 2013 and ruled framed thereunder (the "Scheme"). The Scheme has an appointed and effective date of October 1, 2025. The certified copy of the NCLT order was filed with the Registrar of Companies on October 1, 2025 ("Effective Date"). The Scheme, among other provisions, entails the demerger of the Industrial Undertaking ("Demerged Undertaking") from the Demerged Company into the Resulting Company on a going concern basis. This event qualifies as an adjusting event for the financial results. Accordingly, in line with Ind AS 105 - Non-Current Assets Held for Sale and Discontinued Operations, the Industrial Undertaking has been classified as "Held for Distribution" as of September 30, 2025. The financial results for the quarter and six months ended September 30, 2025, the quarter ended June 30, 2025, the year ended March 31, 2025, and the quarter and six months ended September 30, 2024, have been restated to reflect the impact of the Scheme, with the Industrial Undertaking presented as discontinued operations. Following the implementation of the Scheme, the Resulting Company has ceased to be a subsidiary of the Company.

g) The unaudited standalone and consolidated financial results for the quarter ended September 30, 2025 are available on the BSE Limited website (URL: www.bseindia.com), the National Stock Exchange of India Limited website (URL: www.nseindia.com) and on the Company's website (URL: www.skf.com/in).

a) The unaudited standalone and consolidated financial results have been reviewed and recommended by the Audit Committee and approved by the Board of Directors at their meeting held on November 14, 2025. The above unaudited financial results for the quarter and the six months ended September 30, 2025 have been reviewed by the statutory auditors of the Company.

b) The above financial results have been prepared in accordance with the Companies (Indian Accounting Standards) Rules, 2015 (Ind AS) prescribed under Section 133 of the Companies Act, 2013 and read with Rules framed thereunder and Regulation 33 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended from time to time.

c) The Company manufactures bearings and other related components and is of the view that it is a single business segment in accordance with Ind AS-105 'Operating Segments: notified pursuant to Companies (Accounting Standards) Rules, 2015.

d) Exceptional Items: During the quarter and six months ended 30 September 2025, the Company has incurred certain demerger expense for IT cost, professional services and employee benefits expenses aggregating to INR 274.5 million towards Scheme of Arrangement. These restructuring costs are non-recurring in nature and do not reflect the Company's normal operating performance.

e) The unaudited consolidated financial results include unaudited financial results of a wholly owned subsidiary and two associates of the Company for the quarter and six months ended September 30, 2025.

f) The Company has received a certified true copy of the order dated September 26, 2025, from the Hon'ble National Company Law Tribunal, Mumbai Bench ("NCLT"), approving the Scheme of Arrangement among SKF India Limited ("Demerged Company"), SKF India (Industrial) Limited ("Resulting Company"), and their respective shareholders and creditors under section 230-232 and other applicable provisions of the Companies Act, 2013 and ruled framed thereunder ("Scheme"). The Scheme has an appointed and effective date of October 1, 2025. The certified copy of the NCLT order was received by the Registrar of Companies on October 1, 2025 (Effective Date). The Scheme, among other provisions, entails the demerger of the Industrial Undertaking "from the Demerged Company into the Resulting Company on a going concern basis. This event qualifies as an adjusting event for the financial results. Accordingly, in line with Ind AS 105 - Non-Current Assets Held for Sale and Discontinued Operations, the Industrial Undertaking has been classified as "Held for Distribution" as of September 30, 2025. The financial results for the quarter and six months ended September 30, 2025, the quarter ended June 30, 2025, the year ended March 31, 2025, and the quarter and six months ended September 30, 2024, have been restated to reflect the impact of the Scheme, with the Industrial Undertaking presented as discontinued operations.

Following the implementation of the Scheme, the Resulting Company has ceased to be a subsidiary of the Company.

g) The unaudited standalone and consolidated financial results for the quarter ended September 30, 2025 are available on the BSE Limited website (URL: www.bseindia.com), the National Stock Exchange of India Limited website (URL: www.nseindia.com) and on the Company's website (URL: www.skf.com/in).

EEPC India thanks Government of India under the able guidance of **Hon’ble Prime Minister of India, Shri Narendra Modi** and **Hon’ble Union Minister of Commerce and Industry, Shri Piyush Goyal**, for launching the **INR 25,060 Crore Export Promotion Mission (EPM)**-to enhance export competitiveness for MSMEs, first – time exporters & labour intensive sectors through a unified and adaptive export framework.

Shri Piyush Goyal
Hon’ble Union Minister
of Commerce and Industry

We are grateful that Engineering Sector, has been earmarked as one of the core sectors to receive priority assistance under the EPM as the sector has been affected by the global tariff shift.

EPM brings together all export support under a single, out come – based mechanism. By consolidating schemes like IES & MAI, EPM delivers an inclusive, technology – enabled framework. EPM addresses the real challenges faced by Indian exporters, building a stronger and more resilient trade ecosystem- **A BIG LEAP TOWARDS VIKSIT BHARAT @2047.**

Shri Narendra Modi
Hon’ble Prime Minister of India

Shri Pankaj Chadha **Shri Aakash Shah**
Chairman, EEPC India Vice Chairman, EEPC India

- a) The unaudited standalone and consolidated financial results have been reviewed and recommended by the Audit Committee and approved by the Board of Directors at their meeting held on November 14, 2025. The above unaudited financial results for the quarter and the six months ended September 30, 2025 have been reviewed by the statutory auditors of the Company.
- b) The above financial results have been prepared in accordance with the Companies (Indian Accounting Standards) Rules, 2015 (Ind AS prescribed under Section 133 of the Companies Act, 2013) and read with Rules framed thereunder and Regulation 33 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended from time to time.
- c) The Company manufactures bearings and other related components and is of the view that it is a single business segment in accordance with Ind AS-108 'Operating Segments' notified pursuant to Companies (Accounting Standards) Rules, 2015.
- d) Exceptional items: During the quarter and six months ended 30 September 2025, the Company has incurred certain demerger expense for IT cost, professional services and employee benefits expenses aggregating to INR 2574 million towards Scheme of Arrangement. These restructuring costs are non-recurring in nature and do not reflect the Company's normal operating performance.
- e) The unaudited consolidated financial results include unaudited financial results of a wholly owned subsidiary and two associates of the Company for the quarter and six months ended September 30, 2025.
- f) The Company has received a certified true copy of the order dated September 26, 2025, from the Hon'ble National Company Law Tribunal, Mumbai Bench ("NCLT"), approving the Scheme of Arrangement among SKF India Limited ("Demerged Company"), SKF India (Industrial) Limited ("Resulting Company"), and their respective shareholders and creditors under section 230-232 and other applicable provisions of the Companies Act, 2013 and ruled framed thereunder (the "Scheme"). The Scheme has an appointed and effective date of October 1, 2025. The certified copy of the NCLT order was filed with the Registrar of Companies on October 1, 2025 ("Effective Date"). The Scheme, among other provisions, entails the demerger of the Industrial Undertaking ("Demerged Undertaking") from the Demerged Company into the Resulting Company on a going concern basis. This event qualifies as an adjusting event for the financial results. Accordingly, in line with Ind AS 105 – Non-Current Assets Held for Sale and Discontinued Operations, the Industrial Undertaking has been classified as "Held for Distribution" as of September 30, 2025. The financial results for the quarter and six months ended September 30, 2025, the quarter ended June 30, 2025, the year ended March 31, 2025, and the quarter and six months ended September 30, 2024, have been restated to reflect the impact of the Scheme, with the Industrial Undertaking presented as discontinued operations.
- Following the implementation of the Scheme, the Resulting Company has ceased to be a subsidiary of the Company.
- g) The unaudited standalone and consolidated financial results for the quarter ended September 30, 2025 are available on the BSE Limited website (URL: www.bseindia.com), the National Stock Exchange of India Limited website (URL: www.nseindia.com) and on the Company's website (URL: www.skf.com/in).

EEPC India thanks Government of India under the able guidance of **Hon'ble Prime Minister of India, Shri Narendra Modi** and **Hon'ble Union Minister of Commerce and Industry, Shri Piyush Goyal**, for launching the **INR 25,060 Crore Export Promotion Mission (EPM)**-to enhance export competitiveness for MSMEs, first – time exporters & labour intensive sectors through a unified and adaptive export framework.

Shri Piyush Goyal
Hon'ble Union Minister
of Commerce and Industry

We are grateful that Engineering Sector, has been earmarked as one of the core sectors to receive priority assistance under the EPM as the sector has been affected by the global tariff shift.

EPM brings together all export support under a single, out come – based mechanism. By consolidating schemes like IES & MAI, EPM delivers an inclusive, technology – enabled framework. EPM addresses the real challenges faced by Indian exporters, building a stronger and more resilient trade ecosystem- **A BIG LEAP TOWARDS VIKSIT BHARAT @2047.**

Shri Narendra Modi
Hon'ble Prime Minister of India

Shri Pankaj Chadha **Shri Aakash Shah**
Chairman, EEPC India Vice Chairman, EEPC India

- a) The unaudited standalone and consolidated financial results have been reviewed and recommended by the Audit Committee and approved by the Board of Directors at their meeting held on November 14, 2025. The above unaudited financial results for the quarter and the six months ended September 30, 2025 have been reviewed by the statutory auditors of the Company.
- b) The above financial results have been prepared in accordance with the Companies (Indian Accounting Standards) Rules, 2015 (Ind AS prescribed under Section 133 of the Companies Act, 2013) and read with Rules framed thereunder and Regulation 33 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended from time to time.
- c) The Company manufactures bearings and other related components and is of the view that it is a single business segment in accordance with Ind AS-108 'Operating Segments' notified pursuant to Companies (Accounting Standards) Rules, 2015.
- d) Exceptional items: During the quarter and six months ended 30 September 2025, the Company has incurred certain demerger expense for IT cost, professional services and employee benefits expenses aggregating to INR 257.4 million towards Scheme of Arrangement. These restructuring costs are non-recurring in nature and do not reflect the Company's normal operating performance.
- e) The unaudited consolidated financial results include unaudited financial results of a wholly owned subsidiary and two associates of the Company for the quarter and six months ended September 30, 2025.
- f) The Company has received a certified true copy of the order dated September 26, 2025, from the Hon'ble National Company Law Tribunal, Mumbai Bench ("NCLT"), approving the Scheme of Arrangement among SKF India Limited ("Demerged Company"), SKF India (Industrial) Limited ("Resulting Company"), and their respective shareholders and creditors under section 230-232 and other applicable provisions of the Companies Act, 2013 and ruled framed thereunder (the "Scheme"). The Scheme has an appointed and effective date of October 1, 2025. The certified copy of the NCLT order was filed with the Registrar of Companies on October 1, 2025 ("Effective Date"). The Scheme, among other provisions, entails the demerger of the Industrial Undertaking ("Demerged Undertaking") from the Demerged Company into the Resulting Company on a going concern basis. This event qualifies as an adjusting event for the financial results. Accordingly, in line with Ind AS 105 - Non-Current Assets Held for Sale and Discontinued Operations, the Industrial Undertaking has been classified as "Held for Distribution" as of September 30, 2025. The financial results for the quarter and six months ended September 30, 2025, the quarter ended June 30, 2025, the year ended March 31, 2025, and the quarter and six months ended September 30, 2024, have been restated to reflect the impact of the Scheme, with the Industrial Undertaking presented as discontinued operations.
- Following the implementation of the Scheme, the Resulting Company has ceased to be a subsidiary of the Company.
- g) The unaudited standalone and consolidated financial results for the quarter ended September 30, 2025 are available on the BSE Limited website (URL: www.bseindia.com), the National Stock Exchange of India Limited website (URL: www.nseindia.com) and on the Company's website (URL: www.skf.com/in).

EEPC India thanks Government of India under the able guidance of Hon’ble Prime Minister of India, Shri Narendra Modi and Hon’ble Union Minister of Commerce and Industry, Shri Piyush Goyal, for launching the INR 25,060 Crore Export Promotion Mission (EPM)-to enhance export competitiveness for MSMEs, first – time exporters & labour intensive sectors through a unified and adaptive export framework.

Shri Piyush Goyal
Hon’ble Union Minister
of Commerce and Industry

We are grateful that Engineering Sector, has been earmarked as one of the core sectors to receive priority assistance under the EPM as the sector has been affected by the global tariff shift.

EPM brings together all export support under a single, out come – based mechanism. By consolidating schemes like IES & MAI, EPM delivers an inclusive, technology – enabled framework. EPM addresses the real challenges faced by Indian exporters, building a stronger and more resilient trade ecosystem- A BIG LEAP TOWARDS VIKSIT BHARAT @2047.

Shri Narendra Modi
Hon’ble Prime Minister of India

Shri Pankaj Chadha **Shri Aakash Shah**
Chairman, EEPC India Vice Chairman, EEPC India

Net Profit/(Loss) for the Period Before Tax for Continuing Operations	394.1	631.5	567.7	3,551.5
Net Profit/(Loss) for the Period Before Tax for Discontinued Operations	1,013.6	970.8	702.6	4,079.6
Net Profit/(Loss) for the Period Before Tax	1,407.7	1,602.3	1,270.3	7,631.1
Net Profit/(Loss) for the Period After Tax for Continuing Operations	287.2	467.4	421.6	2,633.2
Net Profit/(Loss) for the Period After Tax for Discontinued Operations	769.3	718.6	521.8	3,024.9
Net Profit/(Loss) for the Period After Tax	1,056.5	1,186.0	943.4	5,658.1
Total Comprehensive Income for the Period [Comprehensive Profit/(Loss) for the Period (After Tax) and Other Comprehensive Income (After Tax)]	1,081.9	1,186.0	943.4	5,578.0

- a) The unaudited standalone and consolidated financial results have been reviewed and recommended by the Audit Committee and approved by the Board of Directors at their meeting held on November 14, 2025. The above unaudited financial results for the quarter and the six months ended September 30, 2025 have been reviewed by the statutory auditors of the Company.
- b) The above financial results have been prepared in accordance with the Companies (Indian Accounting Standards) Rules, 2015 (Ind AS prescribed under Section 133 of the Companies Act, 2013) and read with Rules framed thereunder and Regulation 33 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended from time to time.
- c) The Company manufactures bearings and other related components and is of the view that it is a single business segment in accordance with Ind AS-108 'Operating Segments' notified pursuant to Companies (Accounting Standards) Rules, 2015.
- d) Exceptional items: During the quarter and six months ended 30 September 2025, the Company has incurred certain demerger expense for IT cost, professional services and employee benefits expenses aggregating to INR 257.4 million towards Scheme of Arrangement. These restructuring costs are non-recurring in nature and do not reflect the Company's normal operating performance.
- e) The unaudited consolidated financial results include unaudited financial results of a wholly owned subsidiary and two associates of the Company for the quarter and six months ended September 30, 2025.
- f) The Company has received a certified true copy of the order dated September 26, 2025, from the Hon'ble National Company Law Tribunal, Mumbai Bench ("NCLT"), approving the Scheme of Arrangement among SKF India Limited ("Demerged Company"), SKF India (Industrial) Limited ("Resulting Company"), and their respective shareholders and creditors under section 230-232 and other applicable provisions of the Companies Act, 2013 and ruled framed thereunder (the "Scheme"). The Scheme has an appointed and effective date of October 1, 2025. The certified copy of the NCLT order was filed with the Registrar of Companies on October 1, 2025 ("Effective Date"). The Scheme, among other provisions, entails the demerger of the Industrial Undertaking ("Demerged Undertaking") from the Demerged Company into the Resulting Company on a going concern basis. This event qualifies as an adjusting event for the financial results. Accordingly, in line with Ind AS 105 - Non-Current Assets Held for Sale and Discontinued Operations, the Industrial Undertaking has been classified as "Held for Distribution" as of September 30, 2025. The financial results for the quarter and six months ended September 30, 2025, the quarter ended June 30, 2025, the year ended March 31, 2025, and the quarter and six months ended September 30, 2024, have been restated to reflect the impact of the Scheme, with the Industrial Undertaking presented as discontinued operations. Following the implementation of the Scheme, the Resulting Company has ceased to be a subsidiary of the Company.
- g) The unaudited standalone and consolidated financial results for the quarter ended September 30, 2025 are available on the BSE Limited website (URL: www.bseindia.com), the National Stock Exchange of India Limited website (URL: www.nseindia.com) and on the Company's website (URL: www.skf.com/in).

A NEW ERA IN MOTION

ONE LEGACY. TWO FUTURES.

For over a century, SKF India Ltd. has powered progress through innovation and precision.

On 1st October 2025, we turned the page to uncover a bold new chapter of our growth story. SKF India Ltd. demerged its industrial business, forming two focused entities, driving innovation and long-term stakeholder value.

SKF India (Industrial) Ltd.

SKF India Ltd.

As we evolve, our unwavering commitment to quality products and services remains the cornerstone of everything we do.

Genuine Bearings. Trusted Service.

a) The unaudited standalone and consolidated financial results have been reviewed and recommended by the Audit Committee and approved by the Board of Directors at their meeting held on November 14, 2025. The above unaudited financial results for the quarter and the six months ended September 30, 2025 have been reviewed by the statutory auditors of the Company. b) The above financial results have been prepared in accordance with the Companies (Indian Accounting Standards) Rules, 2015 (Ind AS prescribed under Section 133 of the Companies Act, 2013) and read with Rules framed thereunder and Regulation 33 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended from time to time. c) The Company manufactures bearings and other related components and is of the view that it is a single business segment in accordance with Ind AS-108 'Operating Segments' notified pursuant to Companies (Accounting Standards) Rules, 2015. d) Exceptional Items: During the quarter and six months ended 30 September 2025, the Company has incurred certain demerger expense for ITC, professional services and employee benefits expenses aggregating to INR 2574 million towards Scheme of Arrangement. These restructuring costs are non-recurring in nature and do not reflect the Company's normal operating performance. e) The unaudited consolidated financial results include unaudited financial results of a wholly owned subsidiary and two associates of the Company for the quarter and six months ended September 30, 2025. f) The Company has received a certified true copy of the order dated September 26, 2025, from the Hon'ble National Company Law Tribunal, Mumbai Bench ("NCLT"), approving the Scheme of Arrangement among SKF India Limited ("Demerged Company"), SKF India (Industrial) Limited ("Resulting Company"), and their respective shareholders and creditors under section 230-232 and other applicable provisions of the Companies Act, 2013 and ruled framed thereunder (the "Scheme"). The Scheme has an appointed and effective date of October 1, 2025. The certified copy of the NCLT order was filed with the Registrar of Companies on October 1, 2025 ("Effective Date"). The Scheme, among other provisions, entails the demerger of the Industrial Undertaking ("Demerged Undertaking") from the Demerged Company into the Resulting Company on a going concern basis. This event qualifies as an adjusting event for the financial results. Accordingly, in line with Ind AS 105 – Non-Current Assets Held for Sale and Discontinued Operations, the Industrial Undertaking has been classified as "Held for Distribution" as of September 30, 2025. The financial results for the quarter and six months ended September 30, 2025, the quarter ended June 30, 2025, the year ended March 31, 2025, and the quarter and six months ended September 30, 2024, have been restated to reflect the impact of the Scheme, with the Industrial Undertaking presented as discontinued operations. Following the implementation of the Scheme, the Resulting Company has ceased to be a subsidiary of the Company. g) The unaudited standalone and consolidated financial results for the quarter ended September 30, 2025 are available on the SKF Limited website (URL: www.skfindia.com), the National Stock Exchange of India Limited website (URL: www.nseindia.com) and on the Company's website (URL: www.skf.com/in).
