Skipper to enter PVC plumbing pipes

Kolkata, June 5

Skipper Ltd, which makes transmission towers and agricultural PVC pipes, has planned foray into PVC plumbing pipes, primarily for urban markets. For this, it has entered into technology tie-up and supply agreement for chlorinated PVC compounds with Japan's Sekisui Chemicals Company. It has also entered into another supply and collaboration agreement with Wavin of the Netherlands for piping systems. The new units, which are expected to be commissioned by September, would increase the capacity to 40,000 tonnes. OUR BUREAU

Skipper partners with global cos

STATESMAN NEWS SERVICE
Kolkata, 5 June

City-based manufacturer of transmission towers and PVC pipes, Skipper Limited, has entered into two separate partnerships with Japanese company Sekisui Chemical and the Netherlands-based Wavin Group, Skipper director Mr Devesh Bansal announced here today.

Speaking on the occasion, Mr Noriaki Hama, general manager (sales) of Sekisui, said: "Through this partnership, it will be our endeavour to bring in the latest technology and manufacture the best CPVC pipes in India... In India our goal is to ensure that Skipper and Sekisui together manufacture the most superior quality of pipes for the plumbing industry."

On the partnership with

Wavin - a \$1 billion revenue company - Mr Maarten Hamberg, area manager (Asia-Pacific) said: "The partnership will ensure Wavin's foray into the buoyant eastern India market which has immense potential for growth in the PVC pipes segment."

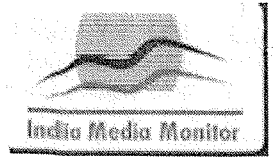

Mr Bansal told reporters that eastern India will no longer be dependent on a few companies in the western or southern parts of the country to bring the latest plumbing products. With its focus on PVC segment now, Skipper will offer global quality products at home.

The company is setting up three new plants in Ghaziabad, Guwahati and Vizag which are expected to be commissioned by the second quarter of the current financial year. With this, its PVC capacity will increase from 22,000 tons to 46,000 tons.

Skipper in foreign tie-ups

Kolkata: Skipper Ltd, the city-based firm with presence in PVC and construction items business, has tied up with Japan-based Sekisui Chemical and the Hyderabad-based planning firm Wavin, in order to boost the plant's business.

Dinesh Dasgupta, director of Skipper, said it has set a target and PVC demand is likely to be of its turnover in four years down the line from the current level of 10%.

Emphasising the tie-up with Sekisui, Dasgupta told it is a technical tie-up with the Japanese firm. "Sekisui is one of the world's foremost manufacturers of PVC compound. They have selected Skipper as their manufacturing partners in India. We shall develop PVC pipes with the Sekisui technology," he said.

On Wavin tie-up, he said the NSE and BSE listed firm will have exclusive rights to sell the Hupac Polyethylene push fit plumbing systems for the hot and cold water and central heating. For PVC, Skipper is setting up two new manufacturing units in Guwahati and Gwalior. It has set up a facility in Anantnag, too.
