Smarten Power Systems Reports Q1 FY27 Business Update; Sells 1.18 Lakh Units, Adds 32 Distributors Across Nine States

- *Commissions a new 5,200 sq. ft. warehouse in Gurugram to support inventory and dispatch operations.*
- *Records highest monthly in-house battery production of 6,600 units in June 2026.*
 - *Launches new HELIX MPPT solar PCU series during the quarter.*

New Delhi, 21st July 2026: Smarten Power Systems, an Indian power backup and solar energy solutions company catering to residential and commercial users, today announced its business update for the quarter ended 30 June 2026 (Q1 FY2026–27). The quarter was marked by operational developments across sales, distribution, manufacturing and infrastructure.

During the quarter, the company sold approximately **1.18 lakh units** across its product portfolio, led by demand for home UPS systems, solar power conditioning units (PCUs), batteries and solar panels. The quarter also witnessed heightened demand for power backup solutions amid elevated summer temperatures and increased electricity consumption across several parts of northern India.

To support seasonal demand and improve inventory management, Smarten commissioned an additional **5,200 sq. ft. warehouse in Gurugram, Haryana**, strengthening its warehousing and logistics capabilities for key markets in northern and north-western India. Continuing its focus on expanding market reach, the company onboarded **32 new distributors across nine states**, further strengthening its distribution network across North, East, West and South India.

The quarter also saw the launch of the **HELIX 1100–1250 series**, a new range of MPPT-based solar power conditioning units (PCUs), expanding Smarten's solar product portfolio. The company additionally introduced two new battery models to strengthen its energy storage offerings.

Commenting on the company's operational performance during the quarter, **Rajnish Sharma, Whole Time Director & Chief Executive Officer, Smarten Power Systems**, said, *"The demand environment for power backup and solar solutions continues to evolve alongside changing energy consumption patterns and increasing emphasis on energy resilience. Our focus during the quarter remained on ensuring that our operational capabilities kept pace with these requirements through investments in manufacturing, distribution and service infrastructure. We remain dedicated to strengthening our operational capabilities and expanding access to reliable power backup and solar energy solutions across our markets."*

On the manufacturing front, Smarten recorded its highest monthly in-house battery production of approximately **6,600 units in June 2026** at its battery manufacturing facility in **Baddi, Himachal Pradesh**. The company is also progressing the development of its upcoming manufacturing facility, which is expected to enhance its production capacity upon commissioning.

During the quarter, Smarten also expanded its in-house after-sales service capabilities while continuing to operate through its established network of franchise service centres. The company stated that it remains focused on meeting the increasing demand through operational excellence, continued product innovation, expansion of its distributor network and enhanced customer service capabilities.

About Smarten Power Systems:

Smarten Power Systems is an Indian company that designs, assembles and supplies power backup and solar energy solutions for residential and commercial use. It develops and manufactures products such as home UPS systems, solar inverters, solar power conditioning units and solar charge controllers while also trading solar panels and batteries are manufactured inhouse as well as some portion of it is traded due to acquisition of the Baddi plant to support integrated energy needs. With a distribution led model, the company serves customers across India through a wide network and also exports its solutions except solar panels to international markets. It currently operates across 23 states and 3 union territories in India and has expanded its presence to more than 17 countries across the Middle East, Africa and South Asia. The company focuses on advancing renewable energy adoption through continuous investment in design, research and development and manufacturing capabilities with the belief that fusion is the future and solar energy is central to a sustainable tomorrow.
