Smarten Power Systems Reports Q2 FY27 Business Update; Sells 1.07 Lakh Units, Adds 22 Distributors and Unveils Seven New Products

- Sells 1,06,625 units across its product portfolio during Q2 FY27.
- Adds 22 new distributors to further strengthen its distribution network.
- Records production volume of 47,919 units during the quarter.
- Unveils seven new products across its solar, hybrid and power backup portfolio.

New Delhi, 21st October 2026: Smarten Power Systems, an Indian power backup and solar energy solutions company catering to residential and commercial users, today announced its business update for the quarter ended 30 September 2026 (Q2 FY2026–27). The quarter witnessed continued business activity across sales, distribution, manufacturing and product development, alongside the unveiling of new products at an industry expo.

During the quarter, the company sold **1,06,625 units** across its product portfolio, including home UPS systems, solar power conditioning units (PCUs), hybrid solar solutions and on-grid solar systems. The Company continues to focus on expanding its market reach and strengthening the availability of its products across key markets.

As part of its distribution expansion initiatives, Smarten onboarded **22 new distributors** during the quarter, further extending its distribution network and supporting its efforts to improve market penetration across its operating geographies.

The quarter also marked a key step in the Company's product development initiatives, with **seven new products unveiled at an industry expo**. The launches included **Helio 3600, Hybrid Ultra+ 4.5 kVA, Hybrid Ultra+ 7.5 kVA, On-Grid Star 3 kW, Nova 2075, Nova 2650 and Everon 1100**. These additions expand the Company's product offerings across solar power conditioning, hybrid power solutions and power backup systems.

On the manufacturing front, Smarten recorded a production volume of **47,919 units during Q2 FY27**, reflecting its ongoing manufacturing operations to support business requirements and product availability.

Commenting on the Company's business performance during the quarter, **Rajnish Sharma, Whole Time Director & Chief Executive Officer, Smarten Power Systems, said**, *"India's power backup and solar energy industry is undergoing a significant transformation, with residential rooftop solar, hybrid power solutions and energy storage increasingly shaping consumer demand. As households look beyond conventional inverter and battery systems towards integrated solutions that combine solar generation, reliable backup and efficient energy management, we believe product innovation, manufacturing capabilities and a strong distribution and service network will play an increasingly important role in the industry's evolution. Our focus during the quarter remained on strengthening our distribution network, expanding our product portfolio and aligning our manufacturing operations with business requirements. The unveiling of seven new products during the quarter further reflects our commitment to expanding our offerings across solar, hybrid and power backup solutions. We remain focused on strengthening our market presence, enhancing manufacturing capabilities and making reliable and efficient energy solutions accessible to a wider customer base."*

About Smarten Power Systems:

Smarten Power Systems is an Indian company that designs, assembles and supplies power backup and solar energy solutions for residential and commercial use. It develops and manufactures products such as home UPS systems, solar inverters, solar power conditioning units and solar charge controllers while also trading solar panels and batteries are manufactured inhouse as well as some portion of it is traded due to acquisition of the Baddi plant to support integrated energy needs. With a distribution led model, the company serves customers across India through a wide network and also exports its solutions except solar panels to international markets. It currently operates across 23 states and 3 union territories in India and has expanded its presence to more than 17 countries across the Middle East, Africa and South Asia. The company focuses on advancing renewable energy adoption through continuous investment in design, research and development and manufacturing capabilities with the belief that fusion is the future and solar energy is central to a sustainable tomorrow.
