Snowman Logistics ties up new Temperature-Controlled Warehouse in Pune

Snowman Logistics, India's leading provider of integrated temperature-controlled logistics services, is proud to announce the commencement of construction of a new temperature-controlled warehouse facility in Pune that is being developed under the Built-to-Suit (BTS) model by Whitecastle Infra, who are experienced developers in the region. Snowman already operates 16,000 pallets in Pune, and aims to target the fast-growing demand in the region for high quality temperature-controlled services with the addition of this new facility of 5,900 pallets, scheduled to be operational by June 2026.

The facility is designed to cater to a wide range of industries that are prevalent in the Pune region including Ice Cream, Chocolates, Dairy Products, Quick Service/Fast Food Restaurants (QSR), Coffee chains, Meat, Poultry, Seafood, Pharmaceuticals, and other industrial goods that require temperature-controlled storage and distribution.

Commenting on the development, Ishaan Gupta, Director, Snowman Logistics, stated, "This new facility in Pune is a testament to our ongoing efforts to expand our footprint and deliver world-class cold chain solutions through both owned and asset light models. It will play a crucial role in supporting the growing demand for temperature-sensitive logistics across diverse sectors."

This strategic expansion reinforces Snowman's commitment to strengthening India's cold chain infrastructure across key consumption and production hubs. Snowman is already the industry leader with an existing capacity of 154,330 pallets across 21 cities, including major markets such as Mumbai, Chennai, Bengaluru, Delhi and Kolkata, and more - the new Pune facility marks another milestone in the company's growth trajectory.
