Exit option for early investors in Feb may lead to oversupply in market, exacerbate selling and add to overall weakness

₹80,000-cr Shares to Exit IPO Lock-in Soon

Rajesh Mascarenhas
Mumbai: The lock-in period for shares worth as much as ₹80,000 crore of 32 newly listed companies is set to end in February, according to Nuvama Alternative & Quantitative Research. These shares are part of the placements to investors and promoters done before the initial public offerings (IPOs). Bankers and brokers said a chunk of these shares could flood the market as various investors would look to book profits with the stock market precariously perched. "Release of lock-in would necessarily mean an anticipation of oversupply in the market, which in turn has an effect on the stock prices," said Venkatraghavan S, MD of investment banking, Equirus. "For savvy investors, we expect there will be a discipline and strategy to their divestment, driven by demand supply considerations while some of the selling could be on account of portfolio rebalancing." Market observers will be keenly monitoring the actions of pre-IPO

investors and promoters in firms such as Brainbees, Ola Electric Mobility, Premier Energies, Akums Drugs and Pichma, Concord Biotech, Juniper Hotels, Ceigal India and Swiggy, among others. The end of the lock-in may not mean an immediate sell-off, but shares of companies with weaker prospects are more vulnerable. "Stocks with weak or negative performance may see anchor investors trimming their holdings," said Abhishek Pagaria, head of Nuvama Alternative & Quantitative Research. "However, six-month-plus lock-ins, typically held by strategic investors and promoters, are less likely to result in open market selling. Any exits in such cases will likely occur through block deals." Brainbees will see 33.53 crore shares worth ₹16,000 crore getting released from the lock-in period on February 10. Ola Electric Mobility will see 196 crore shares worth ₹13,000 crore unlocked on the same day. Similarly, shares worth ₹9,900 crore of Premier Energies will exit the lock-in on February 23, while Akums

Ready for Bourses

Company	Lock-in Open Date	Lock-in Shares (Cr)	% of Outstanding Shares	Lock-in Value (₹ Cr)
Brainbees	10-Feb	33.53	6.46	15,980
Ola Electric Mobility	10-Feb	196.22	4.45	13,105
Premier Energies	23-Feb	10.56	2.34	9,918
Akums Drugs	03-Feb	9.43	5.99	5,259
Concord Biotech	14-Feb	2.09	2.00	4,293
Juniper Hotels	26-Feb	12.80	5.75	3,590
Ceigal India	10-Feb	10.81	6.21	3,289

*Lock-in value is tentative based on 30-Jan price. Source: Nuvama Alternative & Quantitative Research

Drugs and Pharma will see ₹5,300 crore worth of shares unlocked on February 3. As per Sebi guidelines, anchor investors face a lock-in period of 90 days for 50% of their allotted shares from the date of allotment, and 30 days for the remaining 50%. For promoters, the lock-in requirement is 18 months for allotments up to 20% of the post-issue paid-up capital. For allotments exceeding 20%, the lock-in period is six months. Non-promoter investors also have a lock-in period of six months. According to Vaibhav Porwal, co-founder of Dezerv, oversupply from lock-in expiry must be seen in the context of the kind of free float being added to the daily trading volume of each of the stocks. "Companies like Ola Electric and Brainbees were not widely owned prior to the IPO, and generally institutional investors can stagger their supply over time," he said. "Conversely, stocks like Swiggy were heavily distributed among HNIs and even retailers prior to the IPO and could potentially see a lot of supply come up to book profits."

ONLY 10% HIKE PER YEAR WITHOUT PRIOR APPROVAL

Irdai Caps Health Insurance Premium Hikes for Seniors

Our Bureau
Mumbai: In a major relief for senior citizens struggling with rising healthcare costs, the Insurance Regulatory and Development Authority of India (IRDAI) has stepped in to curb steep health insurance premium hikes. Insurers can no longer raise premiums for policyholders aged 60 and above by more than 10% per year, without prior approval, which will ensure accessibility of health insurance to those who are the most vulnerable to medical inflation. The regulator has restricted all health and general insurers who offer indemnity-based health insurance from hiking health insurance premiums charged to senior citizens by more than 10% in one year, according to a circular dated January 30, 2025. Some policyholders had raised concerns over rates doubling within a year. "As part of the ongoing monitoring of insurance products offered in the Indian insurance market, it is observed that there has been a steep increase in premium rates under some of the health insurance products offered to senior citizens (aged 60 years and above)," IRDAI said. "In this context, the most vulnerable age group is the senior citizens having limited sources of income, and this group is impacted the most when there is a steep increase in health insurance premium. This matter has been engaging the attention of IRDAI and is a regulatory concern." Premium rates in the health insurance segment are driven by soaring hospital bills and medical inflation. Insurers set their rates based on the anticipated claim payouts, along with the expenses of acquiring and servicing policies.

Tata Motors Shares Slump over 7% After Weak Q3 Numbers

Ruchita Sonawane
Mumbai: Tata Motors shares slumped as much as 9% on Thursday after the company's third-quarter net profit dropped 22%, missing analyst estimates. Analysts said the weak performance of its British subsidiary Jaguar and Land Rover (JLR), which contributed nearly two-thirds of its total revenue, weighed down investor sentiment despite a more cheerful outlook for the March quarter. The stock ended at ₹697, down 7.4% over the previous day. "The markets were pricing in good results for Tata Motors ahead of the results but the miss in JLR margins leads to a higher impact on the stock," said Mumuksh Mandeshia, Research Analyst, Anand Rathi Institutional Equities. Mandeshia said that the management commentary indicates chal-

lenges on the demand as well as the margin side in the absence of positive triggers. Jefferies downgraded the stock to 'Underperform' from 'buy' after three and a half years despite expectations of a seasonally better fourth quarter. The brokerage slashes the target price to ₹660. "JLR faces weak demand in China and Europe, rising customer acquisition cost, and higher warranty expense," said analysts at Jefferies in a note. "India Commercial Vehicle (CV) and Passenger Vehicle (PV) demand has slowed down, and competition is rising in Electric Vehicles (EVs)." It prefers Mahindra & Mahindra, Eicher Motors and TVS Motor Company among auto stocks. "Since the JLR business contributes to almost 70% of Tata Motor's business, the lower volume growth in that segment led to the

steep decline in the stock today," said Vinit Bolinjkar, Head of Research, Ventura Securities. "The margins are expected to come off further." Bolinjkar also prefers other auto stocks such as TVS Motor Company, Maruti Suzuki and Hero MotoCorp. Anand Rathi's Mandeshia prefers Eicher and Maruti. CLSA maintained an 'Outperform' rating on Tata Motors but lowered the target price to ₹630. "In the past six months, Tata Motors shares have dropped nearly 40%." "The valuations are reasonable as the stock has corrected from peaks in the last three months, but the lack of triggers caps the upside potential in the stock in the near term," said Mandeshia. "The FY26 guidance is likely to set the trajectory for the following quarters. If the guidance is not cut and beats estimates there could be further upside."
