BRENT FUTURES AT \$76.2

Oil Steady, Supported by Middle East Supply Fears

Oil prices pared gains in volatile trade on Tuesday as fears of an escalation in the Middle East conflict and a drop in production from Libya's largest oilfield raised the prospect of tight supplies.

However, buying was capped by a weak demand outlook in China, while a global market recovery from a sell-off on Monday provided support.

Brent crude futures were down 8 cents, or 0.12%, to \$76.21 a barrel, while U.S. West Texas Intermediate crude futures were down 8 cents, or 0.11%, to \$72.86. Both contracts gained over \$1 a barrel earlier in the session.

Despite a rebound in the early session driven by concerns over supply disruptions and rising tensions in the Middle East, crude oil futures could continue their downward trend as market reactions to disappointing U.S. job growth data and weak economic signals from China created a wave of negative sentiment," said Hans Albring, senior market analyst at XTB FINRA.

Local equities witness milder declines at times of global routs

Strong Growth, MF Inflows Help India Avoid Big Falls

Rajesh Mascarenhas

Mumbai: Indian equities have seen milder declines in the past two years when there had been sell-offs in global markets. Analysts say the wall of domestic money flow has averted sharper drops in the local market.

For instance, following the Bank of Japan's decision to raise its key interest rate to 0.25% from near-zero to counter the yen's decline against the US dollar, most Asian markets fell between 4% and 11% in the last five trading sessions. In contrast, the Nifty dropped 3.8%.

"Indian markets have shown resilience on the back of strong economic growth and an equally healthy growth in corporate earnings," said Gaurav Dua, head of capital market strategy at Shriram.

"In addition to fundamentals, the strong domestic inflows have also supported the Indian equity market."

Domestic institutions led by mutual funds have invested nearly ₹ 7.34 lakh crore in equities since 2022, while foreign institutional investors have sold shares worth ₹ 85,000 crore during the same period.

Between April 1 and April 17, indices such as the Dow Jones, Nasdaq, Nikkei, and KOSPI fell between 4% and 6%, while the Nifty was down 1.4%.

Similarly, in the period between October 17 and October 27, 2022, when the Nasdaq, Dow Jones, Nikkei, and KOSPI declined by over 4%, the Nifty fell 2.3%.

"The underlying ability of the Indian economy to decouple from the rest of the EMs," said Satish Menon, executive director, Geojit Financial Services.

"The outlook for corporate earnings and the stock market appears promising."

"Strong economic growth, corporate earnings, domestic investment, and international investor confidence position India's stock market for continued outperformance," said Vipul Bhowar, director (listed investments), Waterfield Advisors.

Falls in Global Indices: A Comparison

Political Turmoil Unlikely to Impact Indian FMCG Cos

Marico shares close nearly 6% lower as co earns 12% of revenue from Bangladesh

Kiran Kabta Somvanshi

ET Intelligence Group: India's neighbouring countries such as Bangladesh, Sri Lanka and Nepal have been traditional frontier markets for Indian consumer goods companies. However, political or economic turmoil in these countries never had a significant or lasting impact on Indian companies.

While several consumer goods companies such as Godrej Consumer, Britannia and Asian Paints have presence in Bangladesh, their exposure is not singularly significant to their overall operations.

Little wonder then that stocks of most fast-moving consumer goods (FMCG) companies did not take a major beating on Tuesday.

Marico shares, however, closed nearly 6% lower since the company earns nearly 12% of its revenue from the eastern neighbour.

The company had set up a subsidiary in Bangladesh in 1998 and listed it on the Dhaka Stock Exchange in 2006. Over the years, the subsidiary has become a significant contributor to the overall business of its Indian parent, accounting for 44% of its overseas revenue in the previous financial year. The company has two factories in Bangladesh, both located in Gazipur, Dhaka, and five depots. It is among the top three multinational FMCG companies in Bangladesh.

Textile Stocks Surge on Likely Market Share Gain

Kairavi Lukka & Rajesh Naidu

Mumbai: Shares of textile and garment-making companies surged in a weak market on Tuesday fuelled by expectations that the political turmoil in Bangladesh, a major textile manufacturer and exporter, could benefit the Indian industry.

Analysts said the upside could be short-lived as it remains uncertain if domestic companies would benefit from the unrest in the neighbouring country.

SP Apparels, KPR Mill and Gokaldas Exports rallied between 15% and 20% on Tuesday. The BSE 500 index advanced 0.4%.

"Though the textile stocks have gone up, we do not see any short-term benefits to these companies due to the political unrest in Bangladesh as we believe brands and retailers will wait and watch for the next two weeks to see if the situation calms down," said Purna Jhanjhanwala, vice president, Ekara Capital.

Jhanjhanwala said if the tensions remain unabated, Indian companies may get incremental orders over the next six months or in the next season.

"In the shorter term, spinning and fabric supply companies that export to Bangladesh may see some disruptions in their order books," she said.

Industry officials said it would be hasty to conclude that the textile business in Bangladesh would shift to India soon.

"Does the Indian textiles market have the production capacity, workforce, and raw material inventory to be able to match up to the production of the Bangladesh market?" said Rahul Mehta, chief mentor, Clothing Manufacturers Association of India (CMAI). "We have very few factories which can pull off large-scale production. So, it is too early to form a concrete view of the possible gains or losses to the Indian markets."

So far in 2024, shares of the garment and textile companies have given returns between 4% and 66% as against the 15% gain in the benchmark BSE 500.

Wall St Bounces, Japan's Nikkei Jumps 10.2%

Stronger-than-expected profits from several big US companies help drive the market

AP

US stocks bounced back, and calm is returning to Wall Street after Japan's market soared earlier Tuesday to claw back losses from its worst day since 1987.

The S&P 500 was up 1.2% in morning trading and on track to break a brutal three-day losing streak. It had tumbled a bit more than 6% after several weaker-than-expected reports raised worries the Federal Reserve had pressed the brakes too hard for too long on the U.S. economy through high interest rates in order to beat inflation.

The Dow Jones Industrial Average was up 384 points, or 0.9%, at 10:35 a.m. Eastern time, and the Nasdaq composite was up 1.8%. That was the opposite of the day before.

Stronger-than-expected profit reports from several big U.S. companies helped drive the market. Knowles, the company behind Tylenol and Band-Aids, jumped 3.5% after reporting stronger profit than expected thanks in part to higher prices for its products. Uber rolled 7.4% higher after easily topping profit forecasts for the latest quarter.

Caterpillar gained 3.3% after reporting stronger earnings than expected but weaker revenue.

Several technical factors may have accelerated the recent swoon for markets, beyond weak U.S. hiring

data and other dispiriting U.S. economic reports, in what strategists at Barclays called "a perfect storm" for causing extreme market moves. One is centered in Tokyo, where a week-trade hedge funds and other investors began unraveling last week after the Bank of Japan made becoming more expensive by raising interest rates above virtually zero.

That scrambled trades where investors had borrowed Japanese yen at low cost and invested it elsewhere around the world. The resulting exits from these investments may have helped accelerate the declines for markets around the world.
