Sub: **SSWL bags European Patent for innovative design concept in semi-full face wheels**

Dear Sir,

We are pleased to inform you that we have been granted Patent from the European Patent office for our innovative design concept in semi-full face wheels (also known as styled wheels).

The design is an improvement on existing semi-full-face designs, specially modified to enhance the life-cycle of the product and higher pay load capacity. These wheels are used in passenger cars and have an appeal (styling) similar to that of alloy wheels, but are economical than the alloy wheels.

In the conventional form semi-full face designs pose a high challenge to the manufacturers in meeting the strength requirements (life-cycle requirements).Our innovation helps to eliminate the drawbacks of low fatigue life while retaining its excellent appeal similar to alloy wheels.

In addition, it also helps to reduce the weight of the part, thus reducing the costs considerably. The design will be highly attractive for SUV a vehicle which is in high demand all across the world.

We are already supplying Semi-full face wheels with the innovated design concept for Renault Duster globally.

Kindly take the same on your record please.

Thanking You.
Yours Faithfully,
For Steel Strips Wheels Limited
